I made these two for my grandfathers business (hauling cars)

What do you think? Of course they are not supposed to be all colorful etc.

What do you think? :P They will just go on the side of trucks like these

The first one looks outstanding. It will attract more attention and looks simple.

Not bad at all honestly. I think it'll look pretty good on one of those ugly ass flatbeds.

Premortal - February 28, 2015, 7:29 pm

For its purpose I think that it's pretty good. Not a huge fan of the font, but I don't think it's super detrimental.

Text could have been a little better.

OP - Isn't this just a clipart (Silhouette) with some text and a outline ?

Yes, it is.. The icon is fully allowed to be used for any purpose free of charge :D

I am not that expert yet to be creating images from scratch ! :P

they can be worked alot more mate, they are very rushed i must say

Strayta - March 1, 2015, 2:40 am

Maybe a better font? That's all I have to say and maybe red eyes in the deer

Thanks for the replies guys, but I lot of you don't get the point.

It's not supposed to be all colorful and tons of detail.. It's a logo for a trucking business in the south.
:P
