Thread: [Hacking Facebooks to show a skid he's not a member of anonymous](#)

qzan - February 28, 2015, 8:03 pm

hey, so basically there is this kid at my school who claims to be a hectic hacker, saying he is a high ranking member of anonymous (lol) and that if I can get his facebook, he will give me \$50 and shut up

So pretty much I've got permission to hack his facebook, but hacking facebook's really is not something I can do; Does anyone either know how and be able to do it for me (I'll even film his reaction haha) or point me in a direction of a reasonably simple tutorial?

Thanks in advance HF

Comedic - February 28, 2015, 8:57 pm

Try recovering his account, guessing his recovery questions, you're probably not gonna wanna infect his computer since he'll probably see it coming so do that or try cracking it with sentryMBA

Studxx - February 28, 2015, 10:30 pm

Explain to him about what Anonymous is. There is no "high rank" in Anonymous. There is no leader in Anonymous. Anyone can join in Anonymous. He's using the Anonymous name to give himself fame. He can't do that. Anonymous made uploaded a video on youtube explaining who they're, what they do, and how to help. He's nothing, but a phony. The Anonymous name shall not be used as a threat or to be used for self-purposes.

KK123 - February 28, 2015, 10:36 pm

Basically you joined HF, know nothing about hacking because you got in a little fight with your friend about whose more l33t. I'm assuming. Tell me if i'm wrong.

shapeshifter420 - March 1, 2015, 12:32 am

first, what you should do is get him around a big group of people and have the follow facts. explain to him that anonymous does not have ranks in its members, anybody that claims to be hacker openly = skid, and number 3 you dont have to know how to "hack" to be anonymous.

Benign - March 1, 2015, 12:59 am

Tell him that anonymous are a bunch of know nothing twats who got loads of media attention by the efforts of a few people who were only loosely affiliated with it.

Anyone who claims they're into security then mentions anonymous in the same breath is only good for laughing at.

Also, trying to "hack" someone's Facebook is not hacking and only serves to demonstrate further that neither he nor you know anything about security.

xfreedom - March 1, 2015, 3:53 am

There's other solutions than getting into his facebook account.

First one is to learn a little about different methods of hackings, tools, programming language and ask him to explain it to you while being in a middle of a group to show how ignorant he is. But he might know a thing or two and you have to be confident in the informations you got.

axel - March 1, 2015, 4:18 am

Pay someone \$30 to hack it for you and get \$50 from him after. ?

m4573rdum8455 - March 1, 2015, 7:38 am

anyone can join anonymous and there is no one "high ranking" in anonymous, so maybe just point that out to him so the skid will shut up lol

xxVoidVendettaxx666 - March 3, 2015, 11:34 pm

Anon is a collective. Not a fucking military or some shit. Just ignore him. He sounds like some lame 13 year old who wants fame.

qzan - March 4, 2015, 6:06 am

Hahaha cheers for the responses guys, I got his Facebook in the end and now Im \$50 richer ahaha

LogoiLab - March 4, 2015, 8:00 am

Gather as much info as you can...his password is probably imal337ub3rhax0r...what I'm saying is, socially engineer him into giving you the answers to his security question...if this skid has heard of two factor authentication you're done right there...might as well call game over, nothing short of stealing his phone will let you bypass 2FA.

ProxNasman - March 4, 2015, 8:03 am

You call him a skid but yet you don't know what the fuck you're doing.
Lol.

They're many methods be smart about it instead of making this thread wasting your time.

Or just call him a skid tell him he's a retarded kid and move on with your life.

AutonomousGirlFriend - March 4, 2015, 9:01 am

1337 h4ck but has a facebook account that alone is enough for me to tell him to stfu :D

viewfinder - March 5, 2015, 7:48 am

Greetings everyone- i got similar situation.. if someone can help there is my Skype: tevs.zeme.latvija

noel - March 5, 2015, 8:17 am

sry for off topic, but this is mainly to m4573rdum8455.

could u send me pm, i have smt to ask u. i hope i can answer after.

p.s. need 25 post in order to send pm.

markzuckerberg - March 5, 2015, 8:29 am

It's not about money or shutting up.. it's about hacking a facebook account, I don't think it works because all the ways that you need to do are not working anymore.. he isn't that dumb to trick him by phishing.. Cracking(Bruteforcing) won't work too because facebook is too high secure for bypssing the Captcha i won't talk more because my post will be a tutorial then lol i will tell you 1 (ONE) thing that works.. install a keylogger on the School's PC so that he will login thats it.

Regards

so do that or try cracking it with sentryMBA

Don't talk about stuff you never used; Facebook has a proxy protected login page.

Highly doubt you'll make it with Sentry MBA.

viewfinder - *March 5, 2015, 8:52 am*

I can't write or answer to pm messages, please contact me someone via Skype / name:
tevs.zeme.latvija

Topyscho - *March 5, 2015, 10:03 am*

Hacking something like Facebook accounts is hard. You get all that crap on the internet but they don't work.

HACKED BY CHAOS HACKRS #G - *March 5, 2015, 10:33 am*

Add him as friends on Facebook, create a Yahoo email account, import his email from FB and continue from there.
