I have just bought VPS, can I test your DDos protections with 100Gbps attack?

SIM-2223238 - March 2, 2015, 11:37 am

Yo, Do you have windows vpses also?

If yes, contact me.

Proxy.King - March 2, 2015, 11:42 am

i am looking to get linux vps with whm , also with 8 extra dedicated ips , actually i need to setup power mta enterspire ..may i know the best resonable price for it

Please read Terms of Service. You can try, but as soon as we get an abuse report, we will have to take action.

I am going to contact you about this now.

Just to post feedbck, I have sent DDoS attack of 120 Gbps and their protection is really working! I am definitely ordering now.

xoptical - March 3, 2015, 12:39 am

So you are reselling OVH and advertisiing 120Gbps protection? Reason i know your reselling OVH is cause you say 460Gbps on your website.

rSync - March 3, 2015, 12:44 am

(Mar 3, 2015 01:30 AM)Sivisoko Wrote: [\[CITE\]](#) Just to post feedbck, I have sent DDoS attack of 120 Gbps and their protection is really working! I am definitely ordering now.

Thank you for your feedback. We doesn't mind if you test it as soon as you do not have legal issues which can come from datacenter. So take care and have a nice day.

Dear sir, we are not reselling OVH and we are not advertising 120 Gbps protection. We are advertising 160 Gbps protection and if we have 460 Gbps written on website please inform so we

can correct the mistake. We do have our servers at OVH datacenter and each of 3 OVH locations are powered with 160 Gbps protection infrastructure which gives 460 Gbps. So our server has 160 Gbps guaranteed protection, not 460. Thank you. Is there anything else I can help you with?

N3oNight - March 3, 2015, 11:12 am

from the ddose protection it looks promising,
best of luck with the sales.

I really dont recommend this host. Waited 48 hours for my domain to go live, nothing happened. I then go and check on the host and the service says active but trying to modify in any way it said my domain was not an active service. I sent in a ticket with HIGH response request time and did not receive a response until I sent PMs and came on the forums. They will not refund my service and they said in 40 more hours my domain will be live.

I do not recommend. Good prices on hosting tho.

I would strongly advise to deal with caution when purchasing from the Hosting company.

A friend purchased a package from his site via PayPal and obviously his Payment didn't go through correctly on his sites IPN, occurring him not receiving the package he initially purchased.

He also submitted a 'Support Ticket' a few days ago, no response what-so-ever.

In my opinion it seems like he isn't dedicated.

Stay as far away from this hosting as you can, it sucks.

The admin has no clue what he is doing and has terrible customer service.

He wiped an entire shared hosting server without giving notice to any of the people on it, and does not make any backups.

STAY AWAY, there are a ton of better hosts with english support and people who can actually solve your issues, and that make backups and don't fuck over customers.

He PM'ed me and asked me to remove the -rep, lol.

Hi,

If you wish to get your website online, we recommend our cPanel Web Hosting to begin with. We can upload your website for you and connect database. Please login and submit a support ticket if you are already our client so we can help you out with your needs.

abewater - October 12, 2019, 11:21 pm

Hello, i just bought a cpanel now and i dont know ur nameserver. pls send it to me so that i can point my server to it?

Hi,

You received email from us containing this information, do not forget to check your spambox. Please set ns1.hosteve.com and ns2.hosteve.com as your nameservers.

Sorry but we can allow that only on our dedicated servers, not on VPS.

faxxgrid - October 15, 2019, 10:28 am

Hi

I have waited for your confirmation and gone ahead to buy your VPS. I hope it works well ? ? ? ?

As my previous post said, we DO NOT allow it on VPS. Please order dedicated server instead.

rSync - October 17, 2019, 5:25 am

Hi, we also have VPS reselling solution, hit me up for it. :)

rSync - October 20, 2019, 10:10 am

Still waiting for what I paid for here, but I'm also looking for alternatives in the meantime

Edit: 11/25/2019 forgot to come back and say I received my hosting about 4 days ago. Fast server, slow service.

rSync - December 4, 2019, 9:25 am

Hi,

We are very sorry about this, we usually give out support through support tickets / emails, please refrain from asking for support in the thread/PM.

There is a small delay on the bitcoin payments because of payment processor network and anti

fraud system. Paypal payments do INSTANT hosting activation and delivery.

Do you allow cracking/hacking forums , warez linking , porn tubes , adult dating ?

R??j??s - December 5, 2019, 3:01 pm

I bought a website hosting service but where is this hosted? Is the ping to the website supposed to be 122?

Do you have any webhosting services based in Europe?

Hi just bought the hosting for one of my domain. Hopefully this works out fine!

SIM-2090815 - March 30, 2020, 2:14 pm

Just purchased, I am awaiting for my service to be activated. Normally with WHMCS services are activated instantly after payment has been confirmed. I'm assuming you manually activate them for some reason

SIM-4147789 - March 30, 2020, 7:29 pm

I've purchased webhosting, however I cannot access the nameservers to use my namecheap domain! I cannot find them listed anywhere on the site! I've reached out over 2 hours ago with no response.

OMARATION - April 1, 2020, 9:41 am

IF only services were automatically activated upon payment.

Also please send nameservers thanks

I have been experiencing on and off downtime with my website, Made a ticket 3 days ago trying to get support on another matter. Would appreciate some help from OP

This is not meant to deter others from buying, I believe this hosting is actually really good and speedy. For the price who can complain, Just need to provide faster support

Wolfblack - April 10, 2020, 5:05 am

My service is not activated yet, I have opened a support. OP last online a month ago. Are there any other mods available?

I have opened a ticket too kindly check. OP I have sent you a PM in HF with the mail ID I registered.
