I get this when I click the link:

Quote:Service Temporarily Unavailable

The server is temporarily unable to service your request due to maintenance downtime or capacity problems. Please try again later.

Might want to fix your website OP.

Well, any update on when your site will be back up? Really need to resolve some Skype accounts.

EDIT: or if you could post the resolver API or anything, that would've been appreciated. Can't seem to find any resolvers that can resolve my Skype.?

Time Jr™ - March 2, 2015, 6:51 am

It's back up. And i will be making a free skype resolver api. (site is now running on multiple proxies.)
