Thread: [10mW Green Laser | Requires Key | Burns Matches | Over 10 Miles!](#)

Flacko. - March 2, 2015, 11:16 am

Well, I just got this yesterday; but sadly I have to sell it as I just blew a hole in my pipe on my KX250.. So now I need to come up with money to buy another. This laser can burn matches, go up to 10 miles, and come's with 2 key's.. I'm sad to see it go already as I haven't even had it for a full day yet.

Price: \$50.00

Or that, and buy a piece of shit 5mW Laser that'll last a few days, and can't burn.

Terentino - March 2, 2015, 11:19 am

Total bullshit lmao.

1. It doesn't burn matches
2. This thing is worth like \$10.

You got the exact same one as mine (as in how it looks & performance) which was \$10 so what's your excuse for over-charging that \$40?

The laser you have can blow up balloons?

So where did you buy yours? Nobody is going to buy it without knowing that.

Hey buddy, yes it can burn matches as I've done it. It can also pop balloons, that is why it requires a key because it is a higher wattage from the other lasers you see on eBay that are pieces of shit.

Hey buddy I have the same thing as you and it didn't do shit but wasted my time and money.

Lucid - March 2, 2015, 11:41 am

What brand is this? Where did you get it? Proof or purchase? You should add these things so buyers know what they are looking at and getting!

So what you're saying, is because you got ripped off and you were given a shitty laser, you're just going to assume mine is? No.

Krew - March 2, 2015, 12:48 pm

OP, why don't you post quality pictures of it so we can see it?

I bet your ass it has the same shit on the outside of the laser as mine.

funtela - March 2, 2015, 12:55 pm

If you can record a video of it actually lighting a match, I'll buy it from you right now.

My Grandad Bombed Asia - March 2, 2015, 12:56 pm

I bought this exact same one on eBay, and they're sick.

I've been out, not able to answer questions. But it's fine, I came up with the money. Thanks to all of you 12 year old Uber account buyers for commenting. :)
