Thread: [Looking for a Professional Coding Group](#)

Hopeful Goods - March 2, 2015, 2:14 pm

I am kind of new to HF and want to be part of a group.
I have heard of a few, but don't really know which one I want to join.

Are there any groups that require you to code private scripts and post in the group? Basically I want to trade my private scripts for other peoples.

If any group leaders want to throw me a bone and get me into a group, I will be sure to be an asset to the team.

Look at this thread <https://hackforums.net/showthread.php?tid=4457531> It will tell you what groups are recruiting? you then have to go for a recruitment process. Also some groups offer a buy in so if you have the funds, You'll get into any group.

I looked that over, but I still don't know which ones to choose.
I will just find coding related ones and sign up, I guess.

Your going to have to fill out a application or atleast be able to show them that you know what your doing.

Wouldn't an application just be me telling them what I know?
I am good at Python, Perl, and PHP!
