This is off for now,

thanks

AvengingShadows - March 2, 2015, 3:43 pm

Will you give any vouch copies on HF? I'll do a review

Juthetopp - March 2, 2015, 4:10 pm

Only to trusted members, but i made a discount coupon for you guys : AWESOME

Will give you 30% discount :)

AvengingShadows - March 2, 2015, 4:15 pm

I don't count as trusted? :(How often will updates be released? And are these detected? And if they get detected how long will an update take?

Juthetopp - March 2, 2015, 4:20 pm

When a game update, the hack is ready 2-3 hours after :)

Check this to know the status : <http://juazeyscheats.com/check-the-status-of-the-cheats>

Also note using any DayZ hack is risky at the moment :)

I'm well aware of the risk ;) #livingontheedge #yolo ?

Hmmm....I'm debating whether or not to buy this haha.....I'm not trying to sound rude I promise just you don't have any reviews on here

Can anyone vouch for this guy? If someone can vouch or give a good review I'll buy it

Juthetopp - March 2, 2015, 4:35 pm

Use Coupon : AWESOME

It's gonna be very very cheap :) :)

AvengingShadows - March 2, 2015, 4:36 pm

I bit the bullet and bought it :) I'll write you an honest review :)

Juthetopp - March 2, 2015, 4:37 pm

If you buy the DayZ Cheat make sure to understand that this is only for Windows 8.1, and it's not 100% safe for the moment :)

You can talk to me in PM if you have any questions before purchasing

Mis??? S??li - March 2, 2015, 5:02 pm

Is this a monthly or lifetime hack? very curious

Juthetopp - March 2, 2015, 5:03 pm

It's not monthly like i said, you only pay once for it

AvengingShadows - March 2, 2015, 5:06 pm

I bought the H1Z1, so far it works amazing. I did find one bug however. I had the dead players and players ESP on and the game froze when the player died (went from player to dead player)

Other than that...ITS AWESOME! A good hack, the menu could be a little better but hey...It works. A big vouch for this guy

Mis??? S??li - March 2, 2015, 5:06 pm

Bought the hack gonna test it out now :) ill be back with a feedback soon.

Juthetopp - March 3, 2015, 4:04 am

All good then, AWESOME COUPON is still on :)

AvengingShadows - March 3, 2015, 12:44 pm

Yeah like I said earlier huge vouch for this guy, his support is fantastic as well. Don't hesitate to purchase

Snorlax - March 3, 2015, 11:25 pm

I can vouch for JuazeyCheats, i've been using his methods for a few weeks now, with DayZ and haven't been banned (Just ESP).

Legit Guy with a good product.

dinosaucer - March 4, 2015, 4:13 am

Your menu look exactly like x22's. like they are identical.

Juthetopp - March 4, 2015, 4:53 am

Snorlax : If you use the ESP version, you should ask me for the new update :)

Trip - March 4, 2015, 5:21 am

Will you ever going to coming out with an Arma 2 OA Version of an injector? Due to the fact now we cant use a modified version of xenos and I tried using mallocs method and its a no go :(

Juthetopp - March 4, 2015, 5:27 am

Well i'm actually, i'm a hack seller but i don't suggest you to buy any hacks to play on Bohemia Games at the moment :p

BE is very angry right now :D So wait a bit !

itsMeCherry - March 4, 2015, 5:36 am

Very cheap prices, considering its a one time payment.

chaddious - March 4, 2015, 8:04 am

Posting so I can buy when I get off work. Thanks OP.

Juthetopp - March 4, 2015, 8:33 am

DayZ hack is now updated for today update, please note that if you hack on DayZ, use at your own

risk

H1Z1 is updated, but only an ESP for the moment

Anyone can copy and paste external hacks and get banned. But that's the same with internal hacks ;)

Done properly they can be equally as good as internal hacks.

CS Go hack is very nice but recently got raped by the new update, dont know when he plans to fix.

Juthetopp - March 6, 2015, 5:51 am

Updated, check your private link guys :)

xSlappz - March 6, 2015, 6:36 am

I've had Juazeys CS GO hack for almost a week now and all i can say is... wow. This hack is great for the money, only €7.00 for lifetime! not to mention this thing comes with esp, radar, and trigger bot... that's cheaper than the \$20 a month the cheap trigger bots make you pay. The hack works flawlessly and is quickly updated after cs go updates, so no waiting around to use your hacks again. I would highly recommend this cheat to anyone. If you're looking to get a cs go hack, do it right, and get Juazeys.

I negged him not because he didn't reply to my PM, but I then updated my neg after he threatened me.

AF1s - March 12, 2015, 12:28 pm

I'm not sure what the problem this group is having with Juazey or what they meant by stating that he threatened them but the service I've gotten is the opposite of that. I bought the CS:GO package and I haven't been disappointed in the slightest you get a download as soon as you purchase and the product is such a cheap price for what you get.

I've seen similar products go for \$30 and above, recently I've seen prices as high as \$65 for lifetime access. I would not hesitate to buy from this seller and its sad to see that he has a neg rep right now to me as he is a legit seller.

CTRL or Mouse3, but i will think about addings some keys, just give me suggestions

?S??????? - March 23, 2015, 11:51 am

Hi, News about dayz Update? :)

Regards

Zeltu - March 24, 2015, 12:20 am

I've been a user for this cheats for a while. Yesterday I received a VAC ban - I was playing legit.

1 hour later, I made a thread on the forum asking if it got detected, or some kind of explanation of why I got VAC banned.

Today, logging in - My thread has been deleted.

[THREAD URL](#)

Just after finding the URL, I lost my proof of making the thread.

My profile joining yesterday

This is a good cheat, but I have no idea why Juazey had to act like that.

Juthetopp - March 24, 2015, 4:16 am

It's not me but the moderators, you better contact me in PM for those kind of issues :)

Also OW sometimes turn in VAC atm, if the cheat was detected, it's everyone who will get a wave at the same time :)

PM me if you want !

H1Z1 CHEAT JUST UPDATED :)

atzo - March 24, 2015, 5:31 am

Ow does not turn into a vac ban unless the hack is detected lol

Juthetopp - March 24, 2015, 7:13 am

Actually it's possible, but i may know why it happenednened :)

Talking to him atm

.mbe - March 24, 2015, 8:33 am

I added you on Skype. Please answer back.

Wiak - March 25, 2015, 1:38 am

CS:GO hack is working like a charm! I just want one thing! A trigger button! After that I'm done, this is everything a cheat needs!

- Regards Wiz!

Gozzy - March 25, 2015, 10:35 am

All the hacks are on the wrong monitor. Any way to fix this?

Juthetopp - March 25, 2015, 1:03 pm

Just use F4 to toggle trigger dude :)

Nero™ - March 25, 2015, 1:09 pm

Huge fucking vouche for this, love this dude he gave me a copy of the CSGO hacks free haven't played without since.

FreeAnneFrank - March 25, 2015, 1:11 pm

Does this hack work on Mac OSX? If so let me know!

k?'rlzm? - March 25, 2015, 1:11 pm

Juazey! I love you (no homo shit)

He is legit! Don't hesitate to buy from him.

I was just wondering I bought your dayz hacks in January and stop playing for months due to stuff happening now my question is can I get an update for free or not?

Plague - March 25, 2015, 3:30 pm

So how are H1Z1 cheats working? Undetected still? Is there an option to use just the esp and not aimbot and all that other stuff?

yes they are working just tested today and he updates often so still fully undetectable. also you can only use the esp if you like ?

Juthetopp - March 27, 2015, 6:12 am

Bump, come get your awesome cheat :)

Juthetopp - March 28, 2015, 8:17 am

Yeah it's available :)

Can you please check your PM Sith ?

Deus_ - March 28, 2015, 12:41 pm

Pretty good hack, but I'd like a "better" Aimbot for h1z1 hoping for more updates :)

The other features are epic!

Juthetopp - March 29, 2015, 1:08 pm

Thank you for the vouch, i appreciate it :)

Gozzy - March 30, 2015, 8:31 am

Thanks a lot i appreciate your vouch :)

NJKL - April 3, 2015, 10:27 am

Did the cs:go hacks are undetected from VAC?

Nas - April 3, 2015, 2:48 pm

H1Z1 is not working. The Aimbot does not work.

Juthetopp - April 3, 2015, 2:54 pm

Yes the CSGO cheat is undetected, and the H1Z1 cheat works, you just need to get the update on your access, PM me if you want :)

Are you sure it works? Even people on your forums saying the hacks on BR is not working. I pmed you.

Casads - April 3, 2015, 3:03 pm

Hmm, I see on your thread you the features there are

- Name ESP
- Health ESP
- Boxe ESP
- Intelligent TriggerBot
- Radar (Mates/Ennemies position, alerts)
- No Recoil
- No Shake
- Overwatch Tips

But in the hack there is only health ESP, box ESP and Trigger bot(kind)

This isn't sales trash I just want to know is there something i'm missing?

Juthetopp - April 4, 2015, 6:50 am

It does, seems like there is some issues with it in the mod, i will check into that :)

Mt. Everest - April 4, 2015, 7:48 am

Just bought DayZ cheat and its very very hard to understand how to set it up. I messaged him while he was online and active and he ignored me. I checked his profile and he was doing different things so I know he was on. I expect some help soon.

????? - April 4, 2015, 2:16 pm

I bought the CSGO hack and i like it however I think it is missing some key features.

The ESP looks outdated and there is little room for customizing key binds as far as i know

As for the ESP i would like something like an outline of their body, like the outside of chams.

The recoil system does not do much as far as I am concerned but the cheat is functional and is well worth the price

Juthetopp - April 4, 2015, 3:42 pm

Thank you for the vouch, i will check that for you asap Cobain ok :)

Jisatsu - April 5, 2015, 9:11 am

Juazey is the man, awesome csgo hack! Can't wait for what he has in store! but Dayz hack is out now? I must have it!

Mt. Everest - April 5, 2015, 11:27 am

Purchased the DayZ hack because according to his site it said it was working, and it doesnt. Wouldnt purchase hacks from him until you personally ask him if they are working or not. Will leave a review once I use his hack.

Juthetopp - April 6, 2015, 3:26 am

DayZ Cheat works but i do a lot of maintenance on it :)

Please contact me on skype to get the actual version, thanks

Juthetopp - April 7, 2015, 4:06 am

Yes i will add some new features for sure and every customers are gonna get them for free :)

Juthetopp - April 7, 2015, 6:47 am

Hello, i appreciate your suggestion, but the thread you linked is not related to me at all, also there is no proof in it except irrevelent screenshots from skype :)

I'm not selling a product for DayZ, just a method to inject scripts, i think you got the wrong person here :)

Also, i suggest your to read the rules of this forum, since you seems new here, harrassing other members or posting false accusations/unrelated stuff isn't allowed here

If you want support, PM me or make a thread on my forum, i will gladly help you :)

Juthetopp - April 7, 2015, 8:23 am

H1Z1 Cheat works perfectly and can be buggy in BR as every cheats out there, if you are not happy with it, you should wait a couple of days or ask me to cancel your access, it's alright :)

I resulted to opening a claim on PayPal as it doesn't work. You haven't accepted me for updates either and the support is shit.

I want a full refund ASAP or a scam report will be opened on you selling GTA V hacks that are free and public and you're not helping with the support said on something that doesn't work at all.

It has ton of features better than an aimbot :)

Punkbastard - April 27, 2015, 3:29 am

The thing is, I don't want to take a big risk.
So I'll never use Godmode online for example.
But ESP and (headshot)aimbot won't make me look very suspicious.

So I assume H1Z1 won't update until the real cheat provider updates it and you steal it or what?

Because according to a lot of people you steal all your cheats... I hope this ins't true. I kinda want to play H1Z1 Imfao

Juthetopp - April 28, 2015, 11:35 pm

It is already updated since a few hours, i'm not on my computer 24/24, also if you want a very fast support or anything like that, i suggest you to buy a cheat monthly for 15 euros/months, they are a lot of website providing this :)

But you might get hwid banned in a day or two

winkiface - April 28, 2015, 11:40 pm

nobody said anything about very fast support ; but it does says in your website that it usually takes 3 hours after update. so i have no idea what you're talking about and im pretty sure wulf would say the same thing lol.

Juthetopp - April 28, 2015, 11:47 pm

Have you actually checked what my readme say ?

Also note that we have different time zone, i'm in EUROPE, so when it's the day in US, it's the night here and spamming me in skype or in the forum saying "H1Z1 UPDATED I NEED UPDATE" just slow my work i have to answer to everyone just because they haven't check the readme

Quote:UPDATES ARE ALWAYS AVAILABLE PRETTY FAST, IT'S USUALLY READY 2-3 HOURS AFTER H1Z1 UPDATE, CAN SOMETIMES TAKE TO 12 HOURS DEPENDING IF THERE IS LOT OF CHANGES TO MAKE, SO DON'T FREAK OUT IF NOT HERE YET

winkiface - April 29, 2015, 12:09 am

lol its been 8 hours but again what r u talking about ? i havnt said anything about h1z1 cheat nor have i ever once spammed you in skype saying anything about h1z1 , but do admit i have spammed you about dayz and yet STILL NO REPLY! and btw im pretty sure everyone that has you on skype or has the cheat can tell you live in europe LOL because when you buy the cheat its in euros and in paypal it says euros and it shows what time it is for you in skype lol , smh

ps|i dont even think wulf spammed you in skype about it because you havnt even added him back ! and even if he did why would it matter you dont even reply back! you're website has 2 pages of people saying no reply lol. ; but how long do you think it will take to update for h1z1 ?

Juthetopp - April 29, 2015, 12:19 am

I already said it is updated :)

Add me again :)

winkiface - April 29, 2015, 12:24 am

lol yeah cause you just edited the post but thanks for update ! and i have multiple times but what ever. but my buddy wulf bought the h1z1 cheat for another buddy but used his email but wulf put his name so how does he update ?. i wish i could pm to make it much easier

Hi,

Also wondering if ur using one of those trainers or a personal made one, because the mod menu's are way to easy to download and also easy to use online. if u made ur own private one, then im interested. otherwise its just a rip off to be honest. as they are free to download..

Question is about: GTA 5.

Juthetopp - May 2, 2015, 4:06 pm

The menu is my own, but got patched, currently updating it :)

Do not use any cheats or glitch on GTA V atm, it is very risky since they are ban waving !

If you bought GTA V and want your subcription moved to another game, just give me a PM, i can also refund you :)

Im not sure what is going on with my Google docs account and it seems I cant receive the updates? I know you said you added my email to the list but it hasn't worked...

Would I be safe not receiving updates? Or how can you reapprove me into the doc...

Oh my bad, I think it wasn't your hack, I had used console hacks on MW2 1850 days ago, when they had free weekends. It didn't say VAC banned, and I bought CS Go on that account, I got to play two games before it said I was VAC banned, so I am not sure if it was your hack or not, I don't think it was. Steam scammed my ass hard though, not telling me if I am VAC banned or not, and when I buy a game, it says I am VAC banned :D

Yes, should be all fine like that :)

DianTama13 - May 8, 2015, 1:07 am

Well. Just bough this csgo cheat and i need to say the feature is not good.

I have some point that make this cheat is not worth to buy.

1. In Site they said "Intelligent TriggerBot, Legit"

Well this triggerbot not legit doesnt have hold button and its look really suspicious if you use it.

2. ESP Sometimes broken.

3. in Site They Said Has "No Recoil, No Shake, Crosshair" Feature, But in reality this cheat doesnt have this feature. Recoil Still same.

4. Support so slow. Juazey online and im asking some point but yeah he ignore me.

So GL with your sale ;)

Juthetopp - May 8, 2015, 2:17 am

Trigger works perfectly fine, you can enable / disable it whenever you need

ESP always works and there is no issues with it

Recoil is On by default

Support is fast if your question is important

And it is undetected since release so

JoshGB - May 8, 2015, 3:57 am

Your website says the BF4 cheat has the features toggle-able.

How can one toggle the features? In-game menu?

JoshGB - May 8, 2015, 7:24 am

When you bought it ?

Please make a dispute on paypal, i will then send a refund instantly, i haven't had the time to work on CSS for the moment :)

Or you can get access to any other cheat without paying, your choice :)

How can you explain that everyone get the same hacks?

> I bought hacks from different websites and always get banned within hours or days- now I'm afraid, is your hack really undetected?

Yes it is undetected, (i'm selling unique hack build per customer for maximum safety.) That said, if any bans happen, it's your own responsibility.

> How do I get the cheats after Purchase?

It is actually very easy. Once the purchase has been complete, (you will be generated a download link.)

I just tested it and it way harder to use, is there a way you can put it to control again?

EDIT Number 2 : The aimbot doesn't even work with Q all it does is just look someone else very fast, I aim at a person and it will look at the sky... Disappointed.

I have just purchased the GTA V hack, but it doesn't work, it just makes my game crash when it is loading, then it returns to social club login form, where it says that that i have been logged out because my account has been logged in elsewhere. It cant be a coincidence because it happens every time, offline or online. Is there any way to fix this, or is it just a scam?

I have done everything that you have written in your hack, and i do know how to use ScriptHook, as i have used it to other things also.

EDIT: Sorry for the rage haha. I thought about ScriptHook as i mentioned it, and got to think about other cheats that i had enabled. I removed them from the folder and i am able to start the game now

:) Will comment soon on how it works :)

EDIT 2: The trainer are not working. The activation key doesn't do anything, it only works for turning action replay off.

Hmm GTA V updated recently ?

variable7390 - May 14, 2015, 2:45 pm

Just purchased the CS:GO cheat I'll tell you how it is.

After playing one match with it, I can not stand using it because It makes me lag out due to me having a really bad computer (integrated graphics), If you could make this have a toggle for the esp that'd be great so I could actually use this.

Edit: The no recoil didn't work for me and the esp's were buggyish but worked.

Juthetopp - May 25, 2015, 4:44 pm

Ok sure, thanks for your purchase :)

jexz - May 26, 2015, 2:00 pm

tested today, really nice

AnonMousey - May 26, 2015, 6:15 pm

Hello,

I want to write an honest review of the CS:Go.

So I have been using it for 2-3 weeks now and I haven't gotten banned yet. I don't really care if the no-recoil doesn't work, because if it did, the hack would be too obvious and Overwatch would catch you. The ESP used to work fine, but now it's a bit buggy as in, it shows false boxes sometimes, which is fine with me because overall it works. All you have to do is get close to the enemy to see the box. The ESP doesn't have weapon or name, but it has the health.

The triggerbot is fine, it works to the extend it can help you climb ranks and not get banned by Overwatch. I am really satisfied with this hack so far.

However I would love if you could add a B-Hop button, instructions for buttons (F4, INS etc.) or an update note (Which date did you update it in?)

Also CS:Go just updated, I don't know if you have to update the hack or not, but I am just saying. Let me know!

Heres my review:

I bought two different hacks from this website, the first one was the h1z1 hack. Which works pretty good.. except the aimbot. The aimbot doesn't function at all for me, I've contacted him on skype several times and after he heard my problem he just refused to message me again. I also tired to get on the updates thing he has and it took me years to do that too, considering he wouldn't reply on Skype. It almost seemed like he didn't know how to fix the hack.. or really how it worked at all.

I also bought the cs:go hack, it's not bad other than lowering my fps lower than 10.

Juthetopp - June 4, 2015, 2:20 am

Yes i will update it,

H1Z1 Aimbot works fine, you need to check the video on my website to use it, or change key in the config files :)

CSGO product is very simple and shouldn't make your fps 10, so it might be computer issue here

Second time being banned using this cheat on H1Z1, I do not recommend purchasing. The first time I was banned I figured I would give it the benefit of the doubt in case I did some type of suspicious activity. Second time I was banned I didn't do anything besides run around in the game for a couple of hours. I wouldn't care as much if I was banned after using it a couple of weeks however, being banned after one day of use is ridiculous.

If you run WineBottler would this mod still work the same? I think you should test it or have someone test it for you because if it works it would get a lot of mac users to buy ur mod. WineBottler is a program that lets you run .exe just a btw

ESP nor does the aimbot work for H1Z1...

Iggaming - July 9, 2015, 11:43 pm

The CSGO hacks need to be updated, nothing is working, also, you list these hacks, Glow ESP Advanced Player ESP Name ESP Health ESP Distance ESP Box ESP, No recoil, and I don't see a single document on how to activate these things, I really need no recoil, and the esp features would be a plus, but how do we even use them?

Juthetopp - July 10, 2015, 3:12 am

Of course it's not working because CSGO just updated, please think before posting such comments next time rofl

You're treating a buyer like this?

Because I find what's wrong with the shit you do? God you must be fucking 12 if that makes you upset, grow the fuck up and learn how to code correctly.

No one wants to buy cheats that don't work as you advertise them, quit being a fucking baby and make them work.

I complain this much because you say you're going to do something but instead you just make it fucking worse or you don't do it at all. Learn something from someone who actually listens to there

buyers instead of ignoring everyone and taking peoples money because you're too lazy to make it as you said.

"you got an unlimited h1z1 hack for 9 euros" Exactly I paid for your cheat that should properly work as it is said, the Aimbot does not fucking work for shit, when I pay someone I expect the shit I bought not some shitty ass cheats that I have to "Complain" about for you to do something.

And really go find another cheat? I'd like a refund then so I can go buy another cheat, you know that actually works as advertised.

Juthetopp - July 15, 2015, 1:03 pm

As I already said, you can buy another hack for 15 / euros month if mine isn't fine for you :)

clubmine - August 10, 2015, 10:26 pm

I vouch for this guy. I purchased the GTA V cheats and it was totally worth it. Not more than 10 minutes later I was flying around the city in a bus with my friends. Be careful though and don't do anything that will throw up red flags with Rockstar. I spawned in money with caution in the beginning and as I became more comfortable with the mod I became a bit careless and spawned in millions of dollars fairly quickly. I randomly crashed a couple minutes later and was greeted with a 2 week ban upon restarting GTA Online. Provider probably tries hard to avoid detection but he can't help if you use your power like an idiot like me. So be careful and enjoy the products that Provider has to offer.

The readme file is still the same, I just downloaded the hack again. It still doesn't have the hacks it claims to have on the site.

zyvox - August 16, 2015, 10:18 am

Just purchased the CSGO too, uhm although I'm unsure if it's my Windows 10 that messes things up...

It appears to only have ESP and triggerbot. It's a also purle and green, not yellow like it says in the readme file... It also doesn't say "by xx from yyy.com" like it says in the readme, it just says "by www.juazeycheats.com" (won't disclose any names here except your site). So I'm wondering if maybe this is an outdated version or something?

The ESP also seems to mess up badly some times, like place boxes where an enemy has previously been. It also does not work until you've seen an enemy for the first time a round. I don't think that recoil thing is working either. Then again all of this may be because of my OS, I have no idea. I was gonna send you a PM asking before I bought it but you logged off so I just went ahead.

West Coast Ghost - August 22, 2015, 11:02 pm

I purchased this looking for something sort of bottom of the line, and that's what I got. Unworking aimbot, basically the only useful features are the ESP. And using ESP crowds the screen up A LOT. It would be great if you would remove workbenches from the item list when using Items ESP.

Arrakis - August 23, 2015, 7:33 am

After some time using the H1Z1 hack, here is my opinion and rating.

ESP: 6.8/10 -While functioning the esp does not refresh as often as it should and has a tendency to lose entities such as players that are sometimes far away and other times very close. The ESP tends to clutter the screen a lot with unnecessary items such as some designer doors and other

static objects. It also has a tendency not to show smaller entities such as ammunition until you are very close.

Aimbot: 1/10 The aimbot is terrible, and has yet to see improvement since the release. It swings violently when you can get standing or crouching a lock (so far the only solid lock is when you are proned) which is very annoying and near impossible to use on the move. The only reason it gets a score above 0 is that it does in fact exist in the cheat, just not functionally.

Support: 5/10 Overall I was unimpressed with the support. Despite multiple messages on skype over nearly two weeks time I was never answered and had to troubleshoot my own problems. In the readme file provided that explains how to get your updates you are promised to be activated within a few hours during weekdays. I purchased the cheat on a sunday and sent in my update request on monday, it took four days to get access and I never got a response on skype despite multiple attempts at different times and days when the user was labeled as online.

Overall: 4.2/10 For an external use it gets the job done. It is clearly an open source project that can be found on several public sites, but I will say that it has been clearly modified to make it unique to this project. That being said it is obviously 90% c&p code which you can clearly tell from the interface and the files that you use which could be packaged into the actual cheat but I suspect the creator doesn't know how or it would already have been done. It would be cheaper and easier to simply find the source code and compile and obfuscate it on your own which took me all of 20 minutes to do.

All of the thoughts above are my own opinion and should be taken as just that.

Good Luck With Sales.

SirZio - August 23, 2015, 5:00 pm

Bought the hacks last night they seemed to work fine. Apart from the aimbot Is a little fidgety and

Isn't always the best but apart from that good work.

EDIT: Used the hacks the first night of playing worked fine followed the instructions perfectly. Re logged on this morning and found this. Spoiler [\(Click to View\)](#)

Quote:I have less then 5 hours played on each game :), and I have bans in each game care to reason why I am banned on cs go and gta? I'd like to know

Because you obviously don't know how to use a hack, my CSGO hack is out since almost 1 year and no one got vac banned afaik :)

As for GTA, you probably abused the money or leveling features

And for H1Z1 it is your own risk

Also when i'm saying that my hacks are undetected, it doesn't mean they are undetectable, there is

no hacks that are undetectable

Using the word lol makes you seem childish.

I'm not a spammer, I just had to try and get the message across that the vouch you put on your thread for Mia Khalifa (My old username) was fake and I never gave you that vouch. Your hack doesn't work like it is said to, it is very buggy the ESP and the triggerbot and no recoil don't work. The reason you deleted me again is because you know I have enough proof for people to never buy from you again because as hundreds of people have said on here, your hacks have got people banned loads of time for all games.

I was banned 5 times now on CS:GO you claimed to have sent me a refund and never did, you did the same thing to some poor guy the other day who was banned because of your shoddy hacks.

I think it's time you faced the facts that you have been lying to loads of people, your site and your thread both claim that all the hacks are undetected but they aren't and also claims that the hacks include many things that just aren't there for example the glow esp, that is a load of bullshit and everyone knows it.

Just stop ignoring the things I say which you know are true and replying about something else like you did for the last 3 replies and you replied about the triggerbot and not about me being banned 5 times or you coding the hack yourself.

Any chance of the CS:GO hack working on windows 10 any time soon?

Still not been able to use it and been trying since win10 release.

Juthetopp - September 21, 2015, 3:18 pm

I accepted the access, should be fine :)

H1Z1 Hacks are awesome. Great job Juazey. Haven't been banned for 30 days +

Creative Cloud - September 22, 2015, 2:28 am

Still no reply about win10 support. Don't want to downgrade to win7/8 just to use the csgo hack

Juthetopp - September 22, 2015, 4:13 am

Then you can just dual boot, takes like 15 min to do it

Loving the new CSGO hacks, however the GUI looks really bad

Im on windows 10 it works fine

Prepubescent - September 22, 2015, 2:13 pm

Works on Windows 10 but there are some options that aren't explained in the readme file.

I also messaged you on Skype about if there is an option to always have trigger-bot on and not have to hold a key as it makes it more difficult in my opinion. Sadly you probably didn't get my message as you removed me and probably blocked me.

Juthetopp - September 22, 2015, 2:42 pm

you just have to check the toggle box for that "To"

Hi, i'm interested in buying cs:go cheat, but i saw that some users got banned. After i buy could you provide me support to set the cheat in order to never be spotted? For example how many hours should i play max per day etc...thank you!

Creative Cloud - September 23, 2015, 11:20 pm

On next update please make a more easy to understand (and a not as eye sore) UI if possible. Got it working on win10 after getting the new update.

Hinch - September 24, 2015, 9:05 am

Sexy update but the GUI could be hella improved + the new triggerbot kinda sucks I don't like that its not auto but the esp is sexy

Prepubescent - September 24, 2015, 9:33 am

The Triggerbot just stops working when I take away the key to hold and tick the To box. It stops working even if I activate it and the box that is for if it doesn't work.

Juthetopp - September 24, 2015, 10:15 am

you just have to check "To" to make it works like the other one

He always gives me the excuse of it's my computer so I tried making a point I tried on a few high powered gaming pc's and a gaming laptop and making the triggerbot automatic with the To box ticked doesn't make it automatic without holding keys.

No. I have it set to my Tab key and it works when holding a key but it doesn't work when I tick the To box and try making it automatic like Juazey said it would.

Wtf LOL that "Undetector"..... All it does it append a bunch of random bytes to the end of the hack file LOL

```
Code // HashChanger.Form1
public static byte[] genBytes()
{
    Random random = new Random();
    byte[] array = new byte[random.Next(10, 26)];
    random.NextBytes(array);
}
```

```
    return array;

What does the 'B' function do in the CSGO trigger hack? Also what would be the best key to bind it to without making it too obvious?

Fein - October 30, 2015, 8:33 am

The warz cheats are more than the actual game xD

Juthetopp - October 30, 2015, 10:20 am

B is burst mode of the trigger

I'm updating it, check what i said :)

Mommy???????????? - January 4, 2016, 6:59 pm

Just purchased the CSGO hacks ... having a problem getting them running. wish the readme was more detailed. It says just press f5 but nothing is working

?Genghis Khan? - January 4, 2016, 8:25 pm

I sent my gmail in for the updates.

I would like to see a update soon because this is the second time purchasing to receiving dull hacks.

If there is none soon I will request a refund.

Juthetopp - January 5, 2016, 5:55 pm

For CSGO there is a readme, read it lol ...

Hash1brid - January 6, 2016, 1:36 am

Legit hacks, i have bought this hack over a year ago and its working fine. I havent gotten VAC'd or OW at all. The GUI is kinda weird, i wish i can set the VK's myself or idk if i can. But CSGO cheats have been on point for the past year no complaints at all.

Read how to configure bone settings and smoothing. Also aim bot only locks on everytime you left click or hold left click.

If you can't open the program, run the hash changer and change the programs hash, then it should work. It's happened to me before and I have no idea why it works like that.

Juthetopp - January 7, 2016, 2:07 am

Yes, exactly, run the exe while in a match on csgo :)

Sure, as long as you and some others put up one aswell (because no one cares about new account with 1 +rep lol), I'm currently locked out from my main account that's why. But I'll put up one right now.

There's also some others asking about the H1Z1 cheat from page 140-144 or so, I can't PM yet, but you could maybe PM them asking if they could put up one aswell?

squat21 - January 15, 2016, 5:18 am

Going to be buying this soon, will let everyone know how it goes

aph3x - January 15, 2016, 7:07 am

So yeah,using your hack I managed to get into Global elite,without being overwatched or banned.
I can't say that your hack was the best but it was enough for me,and as others did I also learned to use it to be as smooth as possible.
Now,I've tried the hack after the recent update and I can clearly say that you managed to ruined it

up,this hack as became from legit hack to a total rage hack,not only that the aimbot sometimes doesnot hits at all (on higher soomth settings) but when it does you can clearly say that's an aimbot,it moves to the next target really fast even tho the target itself isnt close to my crosshair. Also please add the glow on the teammates back,It was really usefull for me.

Dawn? - January 15, 2016, 11:11 am

CSGO is VAC Confirmed. I dislike sales trashing but the cheat hasn't been updated for a month+ now and he promises private builds but in reality it is just a file he uploads to dropbox and provides the link to all buyers.

Not quite,he updates it once in while after updates usually,but you can tell he doesnt really gives a damn about the service.

Too bad the recent update fucked the whole hack over.

johnjohnson250 - January 16, 2016, 5:17 am

My review,

- Aimbot = ok at times but sometimes very glitchy and looks like an aimbot and you will be reported
- Glow ESP = works most of the time but sometimes you have to peek first before enemies register
- Name ESP = not in the hack
- Health ESP = not in the hack
- Boxe ESP = not in the hack
- Intelligent Trigger But = intelligent? Barely works
- Radar (Mates/Ennemies position, alerts) = not in the hack
- No Recoil = not in the hack
- No Flash = works every now and then
- Overwatch Tips = not in the hack

For the price I paid, I am not disappointed but 6 of the stated features isn't in the hack, also no instructions on how to use the hack.

Also contacted on Skype, request sent few times also emailed as well but no response as of yet, so support is not great either

RockFeller - January 16, 2016, 6:26 am

TriggerBot is to spotted you need to add a settings for delay before shot like 1 sec

This. Since the update the cheat is super obvious now. Aimbot switched to the next target right away after a kill making it look like your hacking right away. If you can fix that or make a delay. This bot has gone down in quality after the update

The hack is awful, the triggerbot is shit, bhop doesn't always work and land the hops and aimbot is the most obvious shit which can't be configured to be less obvious. the ESP tends to not always show people so you walk round a corner and can't see them until they're directly infront of you and you're pretty much already dead. There is a skin changer that doesn't even work. The hacks are NOT Undetected if you're using them, you will every so often get viewmodel errors in console which leads to a VAC ban because untrusted account!

CS:GO hack is a bit obvious, everybodycan see that you using hack when u spray the weapon on someone it insta swap to other person even when you cant see enemy
if you fix that then its alot better

Ive mention this the past month but no update. I think he is content with how the cheat is or we would've made a change by now. Spraying with a weapon makes it so blatant switching from targets and even if they are behind a wall it shoots

This is why you shouldn't even buy here, completly ignoring everyone on his thread, just want to bump it again and again.

This is really the worst cheat "provider" i ever seen in my life, i'd still prefer to go for aimjunkies or even gamerzplanet pretty sure its more safe than this.

If you guys are searching for good cheats i will recommend only a few names like chods-cheats, interwebz & aimware (also X22 for some games)

Hi,

Can I ask you if the CSGO cheat is as described by the seller in the thread? Because I bought it and I got an error during the purchase so I contacted him and he send me a cheat updated 5 weeks ago too but I don't have the same functions as described (for example I don't have the No Recoil, the Radar or the No Flash, no Name, Health or Boxe ESP and I have some FPS drops by using this cheat even if I use a good computer (MSI)...) So if you get the time, please try to reply to me because I don't know if it's just a mistake from him or something else.

Hmmm, checked the site and on status GTA V cheats were undetected and working so I purchase, only to get a hashchanger and a .txt referring to a .exe that was not in the archive. Nice hacks buddy, might be worthwhile to update the status of your cheats, PM me when I can get my hacks.

I know but still, potential buyers would go straight through the thread link, maybe flick through the last page, if a vendor's website status page says that it is undetected and working, that's what you'd expect them to be. Thanks bud, I'll wait.

Yeah, his website is completely incorrect and the cheats he sells can be publicly found for free on mpgh and unknowncheats

Someone please answer me, what happened to the CS walls.

firecode - June 21, 2016, 3:38 pm

im sorry juazey , but my brother bought your cheat and get 0 support .

he isn't the best at manage cheats , same as me.

he send you alot of friend requests via skype and you did not respond him.

also send you like 5 tickets in web he didnt want to spam you , but still he never got anwser about that .

the cheat wasn't work for him , says any error that no one was know to solve..

he never get's anwser from you and his time has been over sorry bro but thats its the truth..

im saying what i see.

good luck anyway bro, wish you the best earrings on your sales !<3

Please try to fix the Arma hack.

I know nobody on UnknownCheats have pasted a source how to inject but maybe you can fix that yourself?

Probably not I guess since there is no update but man, I hope

this cheat is fucking garbage and so is the support don't buy

ZookeGames - October 19, 2016, 7:32 pm

Bad support, Low Prices = Low Quality Cheats, Do they work? Yes, but good luck getting updates straight away as to be honest he doesnt do anything himself, theyre pretty much straight up C+P from public sources. And you see that H1Z1, Arma and DayZ are under maintenance? I know one reason... BattleEye, theyre not under maintenance he just cant get them to work without instant ban

That's a given anyone without knowledge in the cheating industry does not know how to make any anti-cheat, and they've been undergoing maintenance for a while now, at least the h1z1

boxman500 - October 26, 2016, 9:48 pm

CSGO hack needs update.

Also for haters, I have been using juazeycheats since 2015, I can say only way to get banned is playing too suspiciously. Hack is 100% undetected by VAC also.

Vouch for these cheats. Only bad thing is that updating takes way too long.

Puuropaska - November 12, 2016, 1:48 pm

I can vouch for the csgo cheats.

The updates take a long time to come but its mostly worth it.

Neither does the Csgo hack have any of those features he mentions in the website.

It only has esp, triggerbot, aimbot and bhop.

They need update every time csgo updates and the updates can take anywhere from 1 day to 2 weeks

You download the program and that's it.

You can change it's hash and you can configure it in it's config file.

It's pretty simple.
