Thread: [Free Logos, Backgrounds, Sigs etc.](#)

Cory™ - March 2, 2015, 3:30 pm

Hey guys, I have been using photoshop for many years and I got decently good at it. I can make logos, signatures, backgrounds, etc. Just message me what you want and I'll get working on it :)

fadegaming - March 3, 2015, 12:08 am

Hey man! I need a new Youtube avatar/logo done for my new youtube channel called: The Lazy Gamers. Since my GFZ skills are absolute garbage I say just go crazy with the design (do whatever the hell you want, just incorporate the tagline "The Lazy Gamers" of course and it should be gaming related if that makes sense). I PM'ed you a few details as well. If you could do this for me, it would be greatly appreciated. Thanks!

G???????f????s? - March 3, 2015, 12:09 am

I'd like an avatar. Message me when it's done please. And base it off Red Dead Redemption

2Gud4U - March 3, 2015, 2:24 pm

Please can I have a logo with Baby Green/White colours with the text "Parah", much appreciated.

Manyaco - March 3, 2015, 2:25 pm

Hello. I'd like a signature, thanks for your hard work.

x INathaaan HD - March 12, 2015, 12:20 pm

iya - I'm in need of a logo, nothing too complicated for a website I have to design for my A levels (the graphics is not part of the overall grade)

However - I want this website to become more realistic for a made-up client. I'd be more than grateful if somebody could design me a logo, around 200 x 125, however that can obviously be changed if need be.

Requirements:

Must be technology based (i.e. a mouse wire or something to underline the logo or something like that...

Size: 200 x 125

Text: The Computer Centre

No specific colour or anything else.

Many thanks in advance.

erik4boss - March 14, 2015, 8:34 am

Hello! My name is Erik4boss on this forum.

I am a super moderator over at www.csgo4coins.com, a forum that is made for selling and buying skins in cs:go.

Recently we moved over to a new forum software, Xenforo, and by that we also changed our theme. Currently we are using stock images, but I'd love if you could make us a background that fits the color-scheme.

I had an idea for how it would look cool <https://i.imgur.com/gH5XBHG.png>
