Thread: [Compilation of Keyloggers Section :: Navigation :: Q&A's :: Various Link's](#)

Onyx - June 9, 2010, 6:58 pm

Updated 10/06/2010 20:30 pm GMT, 24 hour clock

Compilation for the keyloggers section
Written By Onyx

Even though I'm against these malicious files, this thread is to help out the new users.

In this thread, there are several parts about keyloggers, from question and answer to some links to the popular free keyloggers.

This is my first guide/compilation I've ever created, so any feedback is appreciated, I'm sorry if this has already been created.

Note: If you are looking for help on removing any type of the malicious program from your system. See here:

[Read Here If Your Infected](#)

Keyloggers Q&A

Illegal:

There are thousands of illegal keyloggers, for the obvious reason that they are used for a form of hacking, which is illegal

[Google Search](#)

Legal:

There are not many not legal keyloggers out, but the ones that are legal, are mainly used in work areas and educational areas, to keep track and to watch that nothing goes wrong.

[Google Search](#)

Q - What is keylogger?

A - A keylogger is a malicious program that is used to infect computers and keep a track of the infectee's keystrokes

without the person acknowledging any of these processes happening at all.

Q - How do keyloggers work?

A - Keyloggers are mainly used in .exe files, but can also be used various other ways. There are used to keep a track of the infected user's keystrokes, which would then be sent via smtp to an online inbox with all the details that have been typed. Here is an example:

Spoiler [\(Click to View\)](#)http://i47.[censored].com/r7t1s5.png

Q - Downloading a keylogger

A - Well you can find any type of keylogger on Hack Forums in the [keyloggers section](#), there are over

hundred's of keyloggers,
some which work, some which don't work. There is a huge amount of variety in keyloggers on
hackforums.

Q - How do/can I control my keylogger?

A - Once you have created your keylogger server and then started to spread and infect computers,
you have not much control weather you can "un-install" the server or not.
the server, when creating a server it should be done with common sense.

Q - What's needed to set up a keylogger?

A- Well, for setting up a keylogger there is not really much you shall need, but as long as you have
at-least 1 of each:

window's OS, 1 keylogger client and a FUD (fully undetectable) crypter and a UD (undetectable)
binder.

Q - How can/do I make my keylogger server Fully undetectable (FUD)?

A- Some keylogger servers are made FUD when they are built and some are not, which are then
needed to be binded with another (if wanted/necessary)
then crypted with a FUD crypter. (some link's below)

Exploitations - June 10, 2010, 12:03 am

Great guide! It helped me navigate quickly :D

jammet - June 10, 2010, 3:16 am

good..., this will help me a lot.....,

bump for this so others will see

Oxycotton - June 10, 2010, 3:20 am

Nice thread bro... this will help lots in need of a logger. It helps me as well :D

Onyx - June 10, 2010, 2:11 pm

Thanks for the positive comments.

Jordan.. - June 10, 2010, 2:21 pm

Extremely helpful thread, hope you don't mind me adding this in my keylogger thread.

150+ views, 8 posts?

-mothered- - June 12, 2010, 6:42 am

Although I know this, I must say that It's a well documented tut, that's very easy to follow and comprehend. I like the referenced categorization of compilation threads, and all that follows beneath that.

Keep up the good work mate.

V1P3R - June 12, 2010, 12:49 pm

thank you very much :D it helped me ^^

Onyx - July 27, 2010, 8:05 am

Bump, hope it helps new users.

DarkSeven46 - July 27, 2010, 9:23 am

You should add my keylogger. DoctorLogger.

MZTR - July 27, 2010, 9:26 am

Why aint Honor logger there?

DarkSeven46 - July 27, 2010, 9:29 am

(Jul 27, 2010 09:26 AM)Tuoseli Wrote: [\[CITE\]](#) Why aint Honor logger there?
Because the GUI is so bad, lol. You should improve on that.

(Jul 27, 2010 09:29 AM)DarkSeven46 Wrote: [\[CITE\]](#) Because the GUI is so bad, lol. You should improve on that.

At least our is popular. yours is hanging on the third page all the time :D

/e/ oops :D you got 10000 views :D

Lol but the gui is crappy coz we got complains about the old one and i dont have time to do better...

DarkSeven46 - July 27, 2010, 10:00 am

Lol but the gui is crappy coz we got complains about the old one and i dont have time to do better... lol, you should see how old the thread is tho. I made the GUI for the logger in photoshop in about 15mins.

Onyx - July 27, 2010, 10:09 am

added more popular keyloggers, to help more user.

MZTR - July 27, 2010, 10:52 am

Onyx - August 3, 2010, 11:12 am

Bump for help on all users. enjoy.

Nikola_M - August 4, 2010, 5:47 am

Thanks for tut man ! im on the neighbour comp right now, downloaded lots of Keyloggers, none of them wont open ...some 00345 error click OK to terminate process... idk what is that, i will try them on my own computer... i reinstaled OS 2 days ago here (xp), no software instaled, maybe thats the problem?

Schizoid™ - August 4, 2010, 5:49 am

Good job.... Thanks to this tread...

Onyx - August 21, 2010, 8:04 pm

Little thread bump for the members with help needed.

Arcobaleno - August 22, 2010, 7:45 am

Thx for the guide, gave me a better understanding of what i want to use.
