LOphtCrack Password Auditor & Recovery Enterprise 6.0.20

LOphtCrack 6 is packed with powerful features such as scheduling, hash extraction from 64 bit Windows versions, multi-processor algorithms, and networks monitoring and decoding. Yet it is still the easiest to use password auditing and recovery software available. LOphtCrack 6 provides a scoring metric to quickly assess password quality. Passwords are measured against current industry best practices, and are rated as Strong, Medium, Weak, or Fail. Pre-computed password files is a must have feature in password auditing. LOphtCrack 6 supports pre-computed password hashes. Password audits now take minutes instead of hours or days. LOphtCrack 6 imports and cracks Unix password files. Perform network audits from a single interface.

LOphtCrack 6 has a built-in ability to import passwords from remote Windows, including 64-bit versions of Vista, Windows 7, and Unix machines, without requiring a third-party utility. System administrators can schedule routine audits with LOphtCrack 6. Audits can be performed daily, weekly, monthly, or just once, depending on the organization's auditing requirements. LOphtCrack 6 offers remediation assistance to system administrators on how to take action against accounts that have poor passwords. Accounts can be disabled, or the passwords can be set to expire from within the LOphtCrack 6 interface. Remediation works for Windows user accounts only.

Features:

- » Password Scoring
- » Pre-computed Dictionary Support
- » Windows & Unix Password Support
- » Remote password retrieval
- » Scheduled Scans
- » Updated Vista/Windows 7 Style UI
- » Executive Level Reporting
- » Password Risk Status
- » Password Audit Method
- » Password Character Sets
- » Password Length Distribution
- » Summary Report
- » Foreign Password Cracking

Note : Please do virus scan before you install
