Thread: [\[FREE\]Email Bomber With Spam Filter Bypass + SOURCE\[/FREE\]](#)

Uzi London ++ - March 5, 2015, 1:27 pm

So I got bored and decided to get into vb.net. I spent almost 3 hours making this believe it or not xD, but I made a bomber that bypasses the spam filter by adding a random number between 1 and 1320 at the end of the subject and body. And if you are wondering what I used to randomize it, take a look in the source. Anyways, it's pretty basic and it's the 3rd functional vb.net program I've made. Tell me other shit I can add. I'm gonna post some screenshots of it working and I'm NOT upload a virus scan. If you somehow don't understand why, please... just... idk, kill yourself? Anyways, it's free for everyone to fuck around with in the source :)

If you don't trust it, don't download it. I'm providing the source so idk why in hell you wouldn't trust it, but that's not my problem.

EDIT: I ended up posting a vscan. Shut up :D

If you download, please don't forget to post here to keep the thread alive.

Hiiro - March 5, 2015, 1:41 pm

You're releasing a bin too, post a virus scan.

This would be way more useable if you could add the option to send bulk mails to a list of mails (.txt file)

Abhax - March 6, 2015, 8:38 am

Very nice source, however I agree! you should add a (.txt) feature so you can mass mail multiple emails at one time, however nice release and thank you for this!

Adderall - March 6, 2015, 11:03 am

The source code download link doesn't work but the program works I just spammed my brothers email ?

Shikatanai - March 7, 2015, 5:37 am

Download link works.

I just change the victim textbox with listbox for spamming

titanbullet - March 7, 2015, 6:50 am

Pretty cool. Since you learned the basics of coding,try using a simple vb theme. It will truly change the feel of your program.

kournfie - March 7, 2015, 8:06 am

Thanks for download links and source code.

So, now i can use this for more victims ? like that: email:email:email

c??? - March 7, 2015, 10:56 am

Very nice, thank you for the Email Bomber.

BinaryFox - June 5, 2020, 1:25 pm

please re upload impossible to download
