it tastes exactly like dirt lol. People normally add it to coffee to mask the taste, the feeling you get after drinking it is awesome though.

I couldn't say I've never been high.

It's a feeling of relaxation and a clarity of mind; your mouth will go numb but it's a good type of numb and relaxation.

unlike drugs or alcohol you will have full control of your mind, thoughts and body.

It will be packaged in a 8oz mason jar and vacuum sealed. From there it will be sent to you; I'm pretty well known for selling food products on HF

You shouldn't the taste honestly isn't too bad or strong; the side effects won't make you vomit either. I've never heard of someone vomiting from kava

Durk - March 6, 2015, 11:52 pm

I sent you a pm. I'm interested in buying a 8oz.

which strain of kava are you using to make this tea? How concentrated is it? how old are the plants you are using?

just to clarify, kava IS a drug. It is a drug with cultural importance and used for medicinal and ceremonial purpose.

It is is a drug with narcotic, hypnotic, diuretic and muscle-relaxant effects.

It is true the active ingredients of kava are unrelated to morphine or alcohol ; they are a series of lactones called kavalactones found primarily in the plants resin.

A warning to potential customers :Kava can cause liver damage, so be careful with drinking too much of it and too often.

do not take kava if you are taking anticonvulsants, anxiolytics (CNS depressants such as benzodiazepines), antipsychotics, levodopa, diuretics, and drugs metabolized by CYP450 in the liver.

do not drink it with alcohol.

<http://www.nlm.nih.gov/medlineplus/druginfo/natural/872.html>

EDIT: if you are selling it outside the U.S there are some legal concerns for customers in the following countries

It is illegal to import kava into australia except for scientific and medical research with a permit unless carried into the country in accompanied baggage.

<http://www.health.gov.au/internet/main/publishing.nsf/Content/importation-of-kava>

it is prohibited for sale for human consumption in wales scotland england and northern ireland but doesnt apply to posession or for personal use

Thank you for that set of information. If you would like to categorize it as a drug it would fall under the same category as caffeine and tannin.

EDIT:

The kava used will be 'awa grown naturally here in Hawaii. The amount to consume is one 8oz jar per person. This will be the equivalence of 2 Apu o `Awa. The age of the plants vary

This drink Brings back a Memory!

I remember when I first got my braces and the Orthodontist provided me with numbing Cream, My Friends mom cam over later that day Know I just had braces Put on and my Mouth was sore.I remember her Handing me a Cup of it and Said "Listen this stuff is really gross But will help you a lot"I remember trying to talk my way out of it then my mom Said Ill give you 10 Bucks to drink the damn thing as she knew what it was.At first it literally tasted like dirt but I felt Super good After it, It gave me a High like feeling after hitting a blunt but my mouth and my mind was like "oh shit"

Glws Homie I hope people Purchase this, It is Really cool to drink and feel the Sensation Afterwards I brung some to school a few weeks after and it was the bEst feeling to be in Class!

caffeine is a stimulant. Tannin is an astringent, bitter plant polyphenolic compound that binds to and precipitates proteins and various other organic compounds including amino acids and alkaloids.

Kavalactones have a wide variety of effects including amnestic, analgesic, anticonvulsant, anxiolytic, nootropic, and sedative/hypnotic activity caused by numerous interactions with the central nervous system via a myriad mechanisms.

I fail to see how any of that is related or in the same category.

'awa is not a strain/cultivar of kava. that's just the hawaiian word for it.

Different strains/cultivars have different kavalactones and in different concentrations, and different kavalactones produce different effects.

the hawaiian strains of kava are:

Mo'i
Mahakea
Opihikao
Papa ele ele
Kumakua
Mapulehu
Nene
Papa Kea
Hanakapi'ai
Honokane Iki
Hiwa
Panaewa

Which one are you using? Are you just using wild kava?

I was not joking around in my previous message.

you need to include a warning in your original post that you cannot take this with alcohol or those medications i listed.

you're right im probably looking far too into this but I just don't want to see anyone potentially get hurt and i was also interested to find out if this is a noble cultivar you are using or a 2 day cultivar which is why i was asking you about the strain. Not being a party pooper but check your country regulation's before buying this product. Just from a quick search I found it's illegal to buy it in the UK, for example.

lol, We've sent it to the UK multiple times with out issue; we claimed that it was kava in the forms

Crowley - April 20, 2015, 11:05 am

Honestly it may be banned but people have to understand that kava is harmless its just idiots who over dose on this mess themselves up.

Hydra - April 20, 2015, 11:13 am

Recommend people to research kava before purchase because it has side effects that make you unable to drive if you take too much of it.

Would not recommend, I haven't gotten my kava and i ordered almost 1 month ago.

I can agree with this user as he did not receive the kava, this was not on our behalf though this was due to USPS not delivering it.

You should get it soon be patient. ?

I don't think USPS only screws up your orders, because when ever I use them its completely fine.

Literally my order got screwed up to and I am pretty sure it was on your end on putting the wrong address

Again, we are sorry for this issue as it rarely occurs. We are currently not taking any more orders until we sort out the mishaps in the past few days. Please be patient as we are working to get your orders filled and shipped as soon as possible.

lanx - April 22, 2015, 3:22 pm

Interested in this once everything is cleared up.

Also, try putting a few vouches in OP for easier reviewing by potential customers? :P

I'm from the UK btw lol

Crowley - April 22, 2015, 6:52 pm

There are alot of vouches already people are just starting to sales trash this... USPS messes up ALOT. If you're interested in this either contact me or who soup with concerns dont derail this topic by telling people to research when they can research if they want to buy something. Everyone researches before they buy. Thank you ?

Hey guys I'm re opening this service as well for the holidays. I feel as if it hasn't gotten as much hype as it should have.

This is definitely something unique and helpful to purchase.

kiahnna - December 18, 2015, 9:50 pm

how numb does it make you? and also is there any way to drink it hot?

PVCK - December 19, 2015, 12:51 am

Is this legal to buy and ship in the US?

anatho - December 19, 2015, 9:49 am

Hey

so this is liquid or a powder? If this is a powder, you mix it with water to drink? Or you can also mix it with other beverages?

How many days till you ship it out? Will I get tracking?

Is this product taken from the root only and how many % kavalactones it has?

boost - December 19, 2015, 11:03 am

I think I've tried this at a Indian friends house. It tastes like beansprouts lol. Glws though, haven't felt the effects, but I've heard it works.

Scar . - December 19, 2015, 11:13 am

I was interested in this but did a little research on this and it acts similar to the anxiety pills I already take which I hate. Glws though.

It makes your mouth numb and relaxes your body, it kind of depends on how much you drink; it's a hard feeling to explain.

yes it's legal to buy and ship with in the US

the shipping is normally around 3 days and yes we do provide a tracking number. It's a liquid but we are also willing to sell it as a powder form though ti will be a lot more since 8oz of powder can make like 5 gallons of drink. Yes this is taken from the awa root; we didn't measure it as we grow it out self so I'm not sure exactly what % it contains.

Lawsuit - December 19, 2015, 3:38 pm

I though this was a Kurva shop

Hicupish - December 19, 2015, 3:52 pm

Shame it's not allowed in my country.. I'm being serious I was literally about to purchase before I saw it wasn't allowed to be shipped here..

As a powder, it is also \$8? well maybe better to ship as a powder, at first it is true, 8 oz of powder enables to make a lot of drinks, and second if the package is tossed around in transit, if the jar is broken and contained a liquid, then I get a wet packet, but if it is a powder, it is still in the packet and usable.

shipping is 3 days, so 3 days till it arrives or 3 days till you ship it out?

the powder will probably be a lot more

SparkMasterTape - December 19, 2015, 8:55 pm

What does it do for people with adhd? I have habits that my mind makes me do something and if I don't do it I feel like complete shit eg. making high and low pitches when everything is really silent like in math class I can't stop doing it.

anatho - December 20, 2015, 4:22 am

In case I want to order where do I have to send payment to?

Also if it is already liquid so you can only mix it with cold beverages I suppose? I think mixing it with hot coffee spoils the coffee and the kava ...

It should make you a little more relaxed, it's not like adarall or something though. It just makes you feel good and relaxed

Imao, i remember when i bought and drank this around last year, brought it to school in a waterbottle and me and a couple of friends drank it, we were chilled out and my friends were trippin (probably exaggerating)

but it was funny as hell and it was worth it, tasted like shit but worth it!
