Movie Lander | The High Converting Movie Landing Page Generator!

If you've ever tried to promote movies in order to monetize them using CPA or PPI then you know the pain of having to make landing pages for each movie, editing code and doing other obnoxious tasks. This is why I have created Movie Lander!

The concept and website is new, I'm working on it everyday to make it the best it can be. I'm looking forward to the next few updates because they will increase the Conversion Rate once again! With locale detection publishers will get more leads because their traffic will be shown a website in their own language. Other features will include free video courses about using the Generator and about promoting your links.

OP, what would you say the best method of promoting this landing page would be?

Social Media, such as Facebook, Twitter, YouTube etc. It can be promoted whatever way you want to though! ?

Cool, thanks. Are you yourself earning using this?

Nice, you finally shared it :D

It really has a good cr (20-30% + for me personally) way better than what I used to use :)

Good share. Vouch.

You should allow custom link (and ad 2-3 short .COM domains to pick from)

urlhu.co/godfather is sure more trustworthy then

http://movie.nichehost.info/streaming?movie=tt*****&bg=C6BDUNG&al=1NhLQ65&s=15

Anyway, good idea, good service ... saves tons of time (or improve monetizing) to many people.

Both of those suggestions are going to be implemented soon! :D

The link has fallen down the well.

When will it be up again?

Auxil - March 8, 2015, 8:56 pm

I actually really need this. I run a CPA site for movies.

polatalemdar12012 - March 9, 2015, 10:20 am

Is it me or the site is not loading?

BlueShiftXD - March 9, 2015, 10:30 am

Sorry guys! The site took a huge hit of traffic recently. It will be back soon. I bought some new hosting for it to handle the traffic. Stay tuned!
