Thread: [New adf.ly trick..\\$1~2 a day.It's on your work.It's great trick. "Not leeches"](#)

RKO - June 10, 2010, 8:37 am

EXAMPLE

Almost all traffic exchange websites not allow frame breakers
sites like "adf.ly" "linkbux" etc.I have a trick to advertise
frame-breaker in traffic exchange website.

You will need:
Web Page Maker. "GOOGLE IT"
A Webs.com Account.(Or any web hosting)

Just open webpage maker.
Then go to Insert--->iFrame.
[\[IMG\]http://media.use.com/images/s_4/82ed1c3f2e63e3b86d45_1.jpg\[/IMG\]](#)
And paste your adf.ly link.Press OK.
[\[IMG\]http://media.use.com/images/s_4/82ed1c3f2e63e3b86d45_2.jpg\[/IMG\]](#)
Now add text.
[\[IMG\]http://media.use.com/images/s_4/82ed1c3f2e63e3b86d45_3.jpg\[/IMG\]](#)
Write"Site under construction"
[\[IMG\]http://media.use.com/images/s_4/82ed1c3f2e63e3b86d45_4.jpg\[/IMG\]](#)
Place it in the following format.
[\[IMG\]http://media.use.com/images/s_4/82ed1c3f2e63e3b86d45_5.jpg\[/IMG\]](#)
Now insert many iframes with different adf.ly links.Make them
smaller.And put them like this.
[\[IMG\]http://media.use.com/images/s_4/82ed1c3f2e63e3b86d45_6.jpg\[/IMG\]](#)

Now export it as HTML format and upload it to webs.com and

advertise it.
I prefer Easyhits4u.com because it is best.You can you auto

surf website too.Have fun with your free money.With this

trick,you atleast earn 0.1 cent per page view.Hence,you can

get almost 100s of view a day,you earn \$1 a day.It's

great,simple,and new.
Make sure to not use linkbux because it open in full window.
Thanks for reading this.

Easyhits4u detects iframe codes from your site. To bypass it, you can try link shortening sites. Shorten it like 2 times or more. Be sure to use links shortening sites which doesn't have ads or something like paying you to shorten stuffs.

Yeah, good example.

I used this method long ago, then got tired.

I cashed out like \$12 from easyhits4u and can't remember how much from adf.ly..

That was so long time ago.

Don't know if this still work.

*If it still works, i recommend you on putting a large picture or something to cover up your iframes, put iframes below the picture users might see it and report you, i got caught many times.

*or you can try minimizing the iframes sizes and remove the scroll panel and border in the iframe. Makes it look like its in the layout.

it didnt work with me :S

We are sorry but we do not accept this URL to participate in our exchange due to the following reason: framebreaker (site breaks frame)

I think,you posted a direct adf.ly link.

This will not work.You have to ad your adf.ly link in iframe and then ad it.

LINKBUCX NOT WORK.

Too lazy right now. You can do as HackthisWorld said, use a webpage maker. Here's an example. <http://tesite101.webs.com/>

Ranger11 - June 10, 2010, 9:47 am

This has been shown many times, and it doesnt work, ive tried it with link bucks and it just loads one page full screen.

xmoonx - June 10, 2010, 9:49 am

i did the page and uploaded it to webs.com

this is my link

www.enthaz.webs.com

try to add it in the easyhits4u.com ??

Atrain - June 10, 2010, 9:49 am

Just so you know, adf.ly is like .0015 per click not .01 (I saw someone post in this thread that it was .01)

if you add 20 iframes with different links,you will earn 0.03 with only 1 view.

If you get 100 views,you earn \$3 a day.Just think about it! :D

(Jun 10, 2010 09:53 AM)BigBadSoft Wrote: [\[CITE\]](#) how would you do this, because you have to have iframes?

I can't answer that question but i used this method log time ago, i shortened my .webs.com link in is.gd and shortend is.gd link in another shortening site, and submitted it to easyhits4u and it accepted it. but after 1-2weeks easyhits4u deletes your link.

Can't say if this still works.Too lazy to try.

xmoonx - June 10, 2010, 10:24 am

i tried many times .. every time i got the same result .. any one can help me :(

Dexdrex - June 10, 2010, 7:19 pm

any sites like easyhits4u ? i already shorten my links 6 times, still the frame breaker error appears.

Uncle Drew - June 10, 2010, 10:22 pm

yibbida.com works. and it's better, it's an autosurf site.

sohailhusain - June 11, 2010, 12:19 am

hello i am still not getting it if i put iframes so when people will open my web page...in those iframes adf.ly links will be loaded...? am i getting it correct?? but what if it gets loaded in the full page like how its happening here...<http://www.enthaz.webs.com> (<--- this is not mine)

lemonaids - June 11, 2010, 12:38 am

I programmed an adf.ly bot a while back and they kept resetting my earnings to zero. I figured they'd

check IPs by now.

Uncle Drew - June 11, 2010, 1:43 am

Use this, Just Copy - paste it to a new web page in webs.
Change the links below with your adf.ly links

```
Code <html><title> aw </title>
<body>
```

PUT YOUR EFFIN LINKS HERE!!

```

but i dont want to use youtube. i wanted to use exchange traffic D:

and yes i am filipino.

Uncle Drew - June 11, 2010, 2:55 am

Yibbida needs to accept your site first. Forgot that part.

Here's the trick to get accepted find a basic html layout paste it to your .webs page and submit it to yibbida. Dont put the iframes first. Might as well, put something like site is uder construction to let them think it's not finished yet.

Ussually takes 1-2 days to get accepted.

Then after getting accepted, edit your .webs page put your iframes and tralalalala. HITS.

Langgam - June 11, 2010, 2:58 am

thanks Captcha123!

so i have to wait for 2 days. ?

and i already have surfed 580 sites. ?

yeah. can be 1 day?

uhm, remove your iframes first before submitting your site. yibbida does manual checking of sites for iframes and stuffs.

Langgam - June 11, 2010, 3:30 am

i removed it. then i'll edit it after it gets accepted.and i'll add my adf.ly links to it.
got it. :D

Sucks guys, but adf.ly patched this already. Just like spam did.

But you can use this to distribute views to your sites or like youtube. Or you can find other sites paying you to shorten links and try out if it works with this.

This will definitely gonna detected.

You made big iframes and don't put scroller on it.

Include images on your site.

TIP= Create new adf.ly links with only adf.ly.

Do not shrink any other link on it.

So shrink google.com with adf.ly and then include.
