Alright, so I am going to new game on my blue version and I am going a different route. I am going to be picking squirtle and then going my way from there. What do you guys suggest will be the best line up to use?

Try to catch a Pikachu in Viridian Forest or whatever its called. Squirtle + Pika = Dream team.

Okay - Beat Brock, going to misty. Squirtle is level 18. Butterfree - level 14. Geodude - 10. Paras - 10. I'm fucked with misty because I don't have a thunder or leaf, and the only pikachu I saw died one hit.

Why do that when you can play the actual game on the actual console? Also, how is there related to the thread whatsoever?
