Why should I invite you to Specialists? Show me your achievements, don't be shy, show me whatever you have to offer

Please do not do PM me your application

It's self explanatory, I'll be reviewing applications the minute you post, this means you can be invited within 30 seconds of you posting your application if it's enough eye candy for me and if I'm online obviously

Good luck to all

Gustav - March 7, 2015, 4:28 pm

Specialists is a group of specialists, nothing more. Be sure to make your application very special!

matt - March 7, 2015, 4:29 pm

I'm a good programmer I'm currently working on a multi platform botnet that's very stable! :) Hasn't been released yet though.

I think I'd be a good addition to the group. I might not be the best but I try my hardest and I'm very creative.

I know the basics around multiple languages.

Can you show me some progress of your current project(s)?

Wheezy Gang - March 7, 2015, 4:31 pm

Listen here Vinnie, I'm the specialest specialist so I expect to see a new userbar next to my name within the next 5 minutes.

?BowmanBot? - March 7, 2015, 4:33 pm

I like having fun, I love helping people!

I have multiple emotional support threads in both group and Innuendo sub forums. I am learning to code in different languages, I already know Java.

I am an entrepreneur and currently have an idea for a social media site. I cannot complete this project as I need help with the programming and coding for mobile apps and the website. I am hundreds of ideas to make money and I would love to share them with Specialists, I don't post them in the main forums as I don't trust most members (regs) who could steal the ideas.

Hope I get in! Good luck everyone!

Haste - March 7, 2015, 4:33 pm

Yo just take a listen to my mixtapes you'll see some real skill there!

But really good luck with your applications everyone I hear this is a pretty sweet group. I would apply but I have nothing to show for my existence. Except my mixtapes. Which you should listen to.

Justin Timberlake - March 7, 2015, 4:33 pm

I mainly contribute through specific help desks in the personal life section like Education Nation, before that in Innuendo. I can go into my past threads and find examples of my helpdesks if you want but they don't have very many replies. I mainly post on other member's threads and help through PM, plus I've made some money doing so. If I join I'll most likely join Astute's thread and help out there.

sorry for the lack of eye candy, pls be fair to me

Try to post some proof of your current work, projects and whatnot. I'm going out for a bit so when I'm back I'll reply to all posts and send out invites to suitable candidates.

I don't expect you guys to waste your times making your replies nifty but just make them easy enough to understand with proof, that's all that I ask for.

Well I'm not really known on here yet, suppose I could drop some programming-related guides in the name of Specialists to prove you my skills.

A bit about myself: Living in Germany, working as some sort of

IDon'tKnowTheEnglishTerm-IT-Manager at a big local real-estate agency, developing stuff in my free time in languages such as C#, AutoIt and skiddy VB.

Some guys on here said I know my shit, might be able to prove it one day as I said earlier. Compared to most of the German members on here my English is... Amazing.
Right now I am at a friend's place you know, on my phone and my high-speed data reached its limit, so I have to browse the NSFW-Version of HF...

That's it, let me know mate!

FRANKIE - March 7, 2015, 4:40 pm

What can I offer the group?

I definitely feel like I have a lot to offer the group. If I have the opportunity to join I will be posting many threads, tutorials, and giveaways in the name of the group. I also would like to have the opportunity to be able to meet other interesting members and individuals on the forums.

Specialty?

My specialty would definitely be interacting in creating a positive relationship with other members as well as knowing how to legitimately market and brand not only myself but products as well. I take pride in everything I do and in myself. Image is everything to me, personal branding is one of the most important things in the business world and I feel that I do a very good job of portraying that not only through my profile but also in real life.

I am passionate about cell phones. Jailbreaking, Rooting, installing ROM's, any form of hacking, spoofing, etc.

I own an SMS+Caller ID Spoofing website and have it registered as a company in the US. After adding a few more features, I'm going to be releasing an iOS and Android app for it.

I am working on a legal and commercialized Android RAT under the same company. After that, I'm going to be working to re-create it as close as I can to iOS.

I've been jailbreaking since iOS 3 up until now.

I've been rooting Android phones and Tablets for 4 years and know about the best apps and tools for hacking and general improvements to the device.

I would love to be accepted, thanks!

Encrypting's Application

Who am I?

I'm a Fun person, I'm not some douche

I'm a computer person, been using one for almost my entire life.

I specialize in "Having fun, contributing, and being an active member in any form I can"

I'm know intermediate SQLi and currently learning advanced SQLi

I'm looking for a solid teacher to educate me in the coding language "Java"

What can I contribute?

More or less contribute, I can be a very active person, like I have been for the past few months. I've been looking to fill the void in my past groups and I want specialists to be that void. I'm more of a Science, Religious and Philosophy person, not some wannabe hacker or anything that revolves around those subjects. The base fact is, I'm looking to contribute, and I know specialists is looking for people who can, I'm a person who learns easily and I love to be educated on subjects, ranging from coding to knowledge of philosophy.

What have I contributed?

I love starting religious and important subjects worldwide, and Engaging in debates, such as these below:

<https://hackforums.net/showthread.php?tid=4560524>

<https://hackforums.net/showthread.php?tid=4608183>

<https://hackforums.net/showthread.php?tid=4540681>

<https://hackforums.net/showthread.php?tid=4552005>

In spite of all this, I still want to learn, and I know that many trusted and reputable members are in Specialists, and I want them to teach me, I have 6+ hours each day to do random things, and I want to dedicate myself to something.

Conclusion:

Sure I may not be that Prodigy coder, or that "HQ" member that post tutorials and help desks everywhere, but in all honesty, that can change today, tomorrow, or any day. I'm just waiting. I know I've said this a lot but it is true, I'm constantly free during the weekdays and weekends, and I'm tired of just sitting around. I seek knowledge.

Why should I invite you to Specialists?

I am a fun person who likes to chill and just relax when I get home from school and I am someone to crack some jokes with. I am not the person that's lame asf and immature as well.. I am mature but fun at the same time haha.. Tbh, me and you talked a lil bit and had a few convos but I don't really know what to say, this is the weirdest application for a group I have ever made.

Some achievements..

Getting on Omni's good side, and not getting banned for being a multi.

And GFX you could say. I have made everything from logos, icons, signatures, HFNews Header, avatars and more.. I also am proud that I got paid a whopping \$8 to write Mango on my forehead. I am happy that I have made multiple legit smooth deals on here etc..

Some proof:

Work for people on HF (free) (Top Most Recent, still learning, getting better):

Specialty? My specialty is saving money. Since gaming is my passion i put that specialty mainly to use for many things game-related. Such as getting games on steam for 50% off or more, getting good games in bundles for cheap by using different kinds of websites, and even using social engineering to talk a seller down to a cheaper buying price, and i would love to start sharing methods to the people in specialists or even thinking of new ones with them. Proof? Currently the only proof that i currently have is this thread right here

<https://hackforums.net/showthread.php?tid=4675993>

But If you want I'd love to PM you pics of my steam account of all the games that ive bought for 60-40% off, and share with you some of the methods/websites I use.

Thanks for reading my app and considering me?

I've been busy lately with school but my latest project is my VPN (<https://dissemble.me>).

While most businesses use WHCMS + Freeradius, I have developed everything on my own. This is awesome because the only costs I have are the servers.

The front-end looks good in my opinion, I've coded it from scratch using the HTML, CSS, javascript(including jquery) and the Bootstrap framework.

For the back-end I've used node.js and mongodb. All the other servers that constitute the VPN also use javascript to authenticate the users to the main website's database when they connect.

Besides javascript, I'm also know other programming languages such as C, Java and Python. I am developing a Crypter in C that will arrive the market in some weeks.

I'm a capable programmer and system administrator and that's why I think I should be allowed into the Specialists.

Well I managed to make money online without any sort of initial investment money wise, not much though, but I have exchanged over 500\$ I believe in around two days between Bitcoin and Paypal (Both combined), I managed to flip a Gamertag that I bought for 50\$ and got a "okay" Gamertag that was in the 160\$ area.

I have also tried to make myself "respected" in the communities of forums I browse on (2 main ones, and a couple of smaller ones). I try my best to try to become successful at my age(14), it is my goal to make at least a name for myself both online and in real life,

Thank you for reading my application.

Good luck to all applicants. Add me vinnie this is my ninja application ?

Reborn Angel - March 7, 2015, 5:39 pm

Ok, here is my remade and to the point application..

My Skills:

- Baseball
- Building in Minecraft
- GFX
- Making Money (IRL, not so much as online)
- Business

For Baseball, although it may not have to do much with a online group..

I made all-stars every year. If you're not familiar with all stars, it's for the very skilled players and

each team in the tournaments there would be 2 people picked from each team.. I was picked every single time. I am a amazing picture and my longest strike out session was 13 strike outs in a row! I have been in 2 News Papers, loads of medals, I have had game ball multiple times, many trophies and more. I am not here to be cocky but I was also well my mother was always getting calls trying to get me to switch teams. I hope to go to college and get a sponsorship from baseball as well.

For building, this may help if we ever open a server etc but I have helped on a lot of MCSG maps, I have been payed from Bandors etc to build! I recently wiped my PC so I have no screenshots but if you would like to give me a challenge I can build it and post a screenshot after I am done.

I have a strong passion for GFX, I love that knowing my imagination is not limited and I can make whatever I want! I am still learning but if Specialist every needs any GFX done, I can help out with that too! But I have made everything from HFNews headers, to minecraft server icons.

Port (Not much, just made it yesterday): <http://staxgfx.carbonmade.com/>

Making money... I don't just have the name 'Stax' for a reason. In Baseball every game I would always give out \$20 to the best player every game (lol) and on special games \$40. I am not the type to just get money and spend it. I work for it and then I spend money to make money. I have done several loans to random people to my grandfather. I always find a business opportunity and take it! I should be having loads coming in very soon since people can pay me back from there tax returns as well ;P

Business, this sort of guys with making money. I take quite a few business classes at my school and I know how to make deals. I am very smart when it comes to business.

I think I should be recruited because for one, I think I would be able to further increase my skills within the group because I have heard many good things about your group. Not only that but I could also help people inside the group if they need help.

I don't really have much achievements because if someone needs help I don't really post a tutorial, I privately message them. But here is just some examples:

Hello, I would love to join your group. I can help out fellow members and be as useful as i can, here is some of my experience:

Not only have I had the prestige of working with some professional web development companies, I have also got my hands into alot of web based development. Two years ago I started my own company in the UK, we offer development and hosting solutions. Due to the success of the company, I am now able to work full time running my company and creating innovative solution for our clients. Currently we are hosting over 92 websites which we have developed with our sister companies.

Inside of HF i have recently opened a web development/hosting service which has gone rather successful. I have recently finished a project for a HF member which can be found [here](#). The thread for my service can be found [here](#)

Just some of the things I have developed;

forum software, CMS software, CRM software, anti-spam software, website analytics application, full blown e-commerce system with order tracking, invoice software and many more..

Overall my main two specialties are:Graphic Design
Minecraft Server Administration

Graphic Design:

I'm currently taking graphic design courses at my school, on top of two years of prior experience. I mainly use Adobe Illustrator Adobe Photoshop, Adobe After Effects, and some inDesign, but I'm hoping to expand my horizons even more in the near future.

This is my current [portfolio](#), but I plan on just wiping it and going to a personal identity-type portfolio.

Minecraft Server Administration

I've owned three servers, two of which were networks. They were all very successful, and if you'd like proof of earnings I will gladly PM them to you. I'm starting my next large project, and I have invested a little over \$2k into it. I am well-rounded when it comes to the management of a server, and I know many large server owners as well. If you'd like to see this project, I can give you the IP via PM.

Thanks for your time ?

My main speciality is Marketing

A bit about myself:

I live in Denmark, 18 years old. Been studying marketing for 2 years now. I own 2 companies. These companies have been struggling in the past as i haven't had the funds to run them perfectly. As the companies were struggling i contacted some entrepreneurs and they were very interested in working with me. The companies are running very smooth atm and i've reacted alot of money the past couple of months.

After alot of hard work i now drive a BMW M5. I'm thinking about going to uni next year.

Why should i invite you?:

Well first of all, i bought into your group (was Instinct back then) some time ago. I got kicked out for apparently missing an activity check, which might have been true but that's only because my account was compromised. The hacker stole more than 4k from my bank account too.

I think you should invite me as i will bring alot of ideas to the table, and i'm sure we can innovate something together. I'm more than happy to put money into ideas too.

Thanks for reading.

I am a damn active person within the subforum. I bring a happy and chill attitude and love to talk to people. I love to game, I currently own both an Xbox One and a PS4. Pretty decent at gaming too.

I don't have any coding skills or graphic skills at the moment, however I am working on C++ and VB.net

I enjoy helping people though. If there's something that I can do to help someone, I would do it.

Achievements? I'm not sure I have a lot.

- Have gained almost 15,000 posts within ~3 years.

- Have gained almost 700 rep since I've started here. Never been repfucked.

- Post daily in the News section, I'm pretty sure I'm a top poster there, it's my 2nd most active section, after the Lounge, with almost 1,000 posts being made there and around half are probably threads.

- In 3 groups, active in all, never missed in activity check (except for Studio's once, due to me being offline for a couple of days, forgot to post in Inactivity Thread). Been in other groups though, Studio,

Respawn, and possibly more that don't come to mind at the moment.

- I got into your group Vinnie (Nightfall), the same day I applied :)
- I recently wrote my first ever quick tutorial [here](#).
- Have over 16 posts per day.
- Have over 2 months online time.
- I'm currently trying to teach myself Python whenever I have the time.

I will update more if any come to mind.

Thank you for taking the time to read the application.

Connor Wickham - March 8, 2015, 9:39 am

I decided to re-apply considering E-Whoring isn't a feasible thing to be a specialist in.

The second and probably the best thing I am specialist in is Music Production. My favourite genre to produce is FutureHouse, I have been producing for about 6 years and I have a Bachelor of Arts (Hons) In Creative Media (BACM) to my name, which if you didn't know, is the shit.

If you'd like to hear some of my latest remixes you can contact me.

I am currently working on a debut album which will be released onto iTunes, Beatport, Spotify and Amazon.

I prefer Java, but I can also code in Python/C++/C if necessary.

I also know a decent amount about crypto and anonymity.

immortalwon - March 8, 2015, 1:31 pm

Why Should I Join?

I have learned and specialized a lot in the botnet field, under the guidance of Bull himself. I learned through a lot of mistakes and help from Bull himself, which I believe I have become specialized in. I now own my own botshop, get my own traffic, and setup my own exploit kits. Although business is not that great, I believe I have a firm understanding in protecting my net from honeypots and working with other blackhat individuals. If I am deemed worthy, then I would like to join Specialists.

I am also specialized in the aspects of cryptocurrency and the current anonymity of bitcoin cryptocurrencies. I believe they a must-have for anyone in the blackhat field and using any other form of exchange can be very risky and traced back, not that BTC isnt, but since I know about using multiple wallets and shuffling the btc, then it's not a big deal.

Hopefully I am accepted and welcomed into Specialists.

I would like to join this group for the following reasons.

I'm a very good web developer and have made a few projects. All that I have earned money from. The project I'm running right now is Netflix Dispenser, I'm earning approximately \$500 the last 4 days, and it's my first month.

I'm very helpful at many different subjects, I have 5 open free graphics threads, making graphics for free for those who can't invest so much money. I have mentored over 10 people into making better GFX. I have done OVER 400 GFX requests for free and 100 paid approximately, ONLY on HF. I'll create anything based on HF things such as thread design signature. Etc. Not only that I do web development and Web design a lot. I have also done many UI/UX. I also edit pictures for people. VFX is a strong side of mine, I make intro for people on youtube. Im just saying I like to work my ass off all day without getting paid, because I love what I do and I have enough money otherwise.

I'm also specializing in business.

Why I'm standing out, as I have mentioned I do multiple stuff for free, without hesitation. And I think you'll need someone like me in the group. I'll constantly help people making their own projects, creating a good looking thread design or make them a tutorial in anything they want. I think this is what the group "Specialists" is based on. Specializing in something and helping other members.

If you would like to get proof from anything I have just said feel free to PM me, I'm really grateful to get this opportunity to join such a high quality group. Cheers Vinnie.

?ngineer - March 8, 2015, 1:47 pm

I'm not going to bother with a try hard application like most, I'm not poor like most members here, I work full time as an engineer and skills include 3D modeling and printing, physics and mathematics. I earn about \$70,000 from my job per year, as well as income from side project, investments and interest which is quite substantial. Let me know if you want too know anything else

Do You Want To Bet - March 8, 2015, 10:37 pm

my experince would be in the vape field(e cig that is). I started with \$100 bought all my supplies and started selling e juice . I started out with 4 flavors now i have over 60. I now create my own flavors and constantly mixing new flavors. I make about 2-3 flavors a day. It started off slow but i kept at it and grew it. It Took me a little under a year to grow my business to what it is now

Spoiler ([Click to View](#))

i know all about the vape industry. cartomizer clearomizers sub tanks, mechmods vv mods, vv mods, coils, rda, sub ohm builds, ect ect. I also helped a local shop start up.

I am Thomas, Born in Australia, Lived in Queensland my whole life. I'm 14 really interested in learning. I don't have any skills worth noticing on HF.

I just game and I personally think I am an out going person I could contribute to your group as I

learn and progress through my time at HF.

I would love to be apart of Specialists.

My Achievements would have to be I'm very committed in things I start. I have been racing motorcross since I was 9 and I'm 14 now. I have won many events (Not big Events, Just average). I play CS:GO way to much I have about 1500 hours and spent \$2,000 on. I have money to invest into projects if needed. Thank you for reading my application Vinnie.

I was in the TS with you like a week ago :P (Alias: Risky)

"Cryptography is the essential building block of independence for organisations on the Internet, just like armies are the essential building blocks of states, because otherwise one state just takes over another." -Julian Assange

"Knowledge is Power."

Age:14

About Me:I am 14 years old, and am in school. I joined Hackforums last year and have found the community great. During this time, I found an interest in Cryptography and started to learn about it in my own time. I also became very interested in the art of finding information. In my free time, I enjoy playing League of Legends. I am also working on a website with a friend to let people pay for hash decryption.

What fields do I specialize in?:I specialize in Cryptography. Specifically, encryption and decryption of information. Also, Private Investigations(Doxing)

My Skillset:I specialize in Cryptography. Not the Crypting of Stubs, which is making a file not detectable by Antivirus, but the encryption of files and text. I am skilled in the cracking of hashes with tools such as Hashcat. I also know how to make custom wordlists for certain situations. Many people think that having one massive wordlist (Rockyou.txt) for example will do. But, in most cases this is not true. By having different wordlists for different scenarios, speed and accuracy will increase. For example, a gaming site should have a gaming wordlist, a scientific site should have a scientific wordlist. Of course, these are in addition to the normal wordlists.

Also, I am skilled in more futuristic and theoretical cryptography, in things such as Quantum Cryptography, Quantum Key Distribution, and Post-Quantum Cryptography. This all involve Cryptography after the advent of Quantum Computing. I believe that this will be a great boost to Specialists because this will give Specialists new expertise that no group has. Especially, since Quantum Computers are getting closer and closer to being a full reality, this could give Specialists a great headstart.

Finally, I also have the knowledge of the algorithms used in cryptography. Many people only know how to use cryptography, but I have spent time to learn what's inside, and gaining deeper

understanding.

I am also a skilled doxer. I have completed many doxes of various people. For example, in an activism operation, I doxed the owner of a pro-terrorism website. I have also doxed various scammers. I am skilled in the use of tools such as Pipl, and Maltego. Other than doxing, I am knowledgeable in anti-doxes.

I used to run a Doxing, Anti-Doxing, and Doxing lesson service which was highly vouched.

One of the reason why I am skilled at this, is my mindset. Instead of just using tools, taking any information I get, and then stop, I use the information to get more information.

Why do I like Specialists?: As you can see from my posts, I am critical of many groups. I do not believe that many groups are helping the community. I also believe that Specialists is one of the exceptions. You have made many tutorials and opened many help desks, unlike other groups.

Why I am right for Specialists: I am a very hardworker and will complete all the tasks given to me. I want to make Hackforums a better place, and can help Specialists in completing this, by writing tutorials and helpdesks.

~ REGULUS APPLICATION TO SPECIALISTS ~

About Me

Hello there everyone. I'm Regulus and i'm 20 Years old EDM Producer

I just celebrated my 2 Years on HF on the 17th of February and I've never felt so loved and liked on a forum before to be honest. This Forum is like a second home for me, i can talk with others on here and talk about stuffs i normally can't talk about IRL.

I don't really know what to say about me and explain who i am. But i guess i'm a pretty down to earth kind of guy, i'm easy to talk with and i'm easy to get a long with. I'm always in a good mood and like to meet and talk to new people.

Why Should I Get Accepted | Specialties

I think i should get accepted into this group because this is one of my favorite groups on this forum and pretty much all members from Specialists are nice and HQ members from what I've seen here on HF. So i would love to get accepted into this group as i feel i can contribute with different things if you guys need anything.

My #1 specialist is producing for sure. I've been producing for 6+ Years and that's my #1 Hobby / Passion.

Anything Else You Wanna Share?

I don't really know what to share here but i guess I'll share things i'm good at and have skills in even though it might not count. But there might be times when the group need some specific help so I'll just share what i can do and maybe you'll need my help in the future if i get accepted

Skills: First of all i'm a music producer and i've been producing for around 6 Years now and i have no plans on quitting because that's my #1 passion and i love to produce music. The genres i'm currently working in is mostly Melbourne Bounce, Hands Up, Electro. And that's about it pretty much.

I also won [Basshunters](#) Music Contest a while ago which was a HUGE goal in my life. The track i made can be found on this thread: <https://hackforums.net/showthread.php?tid=4164171>

He's also dancing to the track i made here: <https://hackforums.net/showthread.php?tid=4162951>

No, of course I made it. I wasn't aware you wanted the logo to be the main display of the video. I

thought you wanted the use of the logo as more of a trademark to prove I made it.

I made a book and gave it away for free. It ended up helping hundreds of people earn bitcoin.
<https://hackforums.net/showthread.php?tid=4695925>

I wrote another book to help people get into PPD and that helped 50+ people. The thread is here:

Lastly, I did a tutorial on how to sniff peoples IP on Skype without a resolver.

I have many more threads I am proud of, feel free to check my Recent threads out.

To draw things to a close I wrote a shot autobiography of my time on Hack Forums. It is concealed in the spoiler, please enjoy yourself reading it.

To whom it may concern.

Hello! I am NoMercy and I'd love to join your group! I have many desirable qualities such as generosity, determination and forum punctuality. Over the time I have been one this forum I have helped many people in several different ways and I wish to continue to benefit this forum by join the best group on the forums, Specialists. When I first joined I was a undeniably a script kiddie with lots to learn and lots to do.

I started my journey in the hacking section with lots of things in mind but mostly I just wanted to hack people for a laugh. So I did for a bit and just got a long with it, I mostly used HF to find out what was going wrong with my RATs and to search for new spreading methods. At last I grew up and started to get interested in other subjects and from there I got interested in harder things and this lead me to be very interested in the money making sides of hacking. I got interested in Affiliate work and I was interested in how it worked and how to get commissions. I was really bad at this and didn't know what to do about it. So I just stated on learning about Crypto Currencies which was confusing as hell at first but then I started to get a grip of it. I started earning fractions of bitcoin and did some work with them to make myself good and from there I got interested in two altcoins, OMC and Doge, these where like little bitcoins that I could play around with and use to earn on the market. With time I became disinterested as I wasn't earning as much as I'd like but I'd earned enough money to buy a domain and I had gained enough knowledge from doing other small projects that I haven't

mentioned to learnt how to set up a site for PPD.

Now, 6 months after I started as a little script kiddie that just wanted to hack, I am trying to use my money wisely to succeed in the PPD world. I have my YouTube traffic coming in and my site looks good...enough. After all this time spent learning and doing well for myself I'd love to join this group and possibly even further open my horizons. Thank you for reading.

Thank you for reading my application! [If you find any errors in my application can you please PM me by clicking here.](#)

About me:

I am currently a Finance major awaiting my graduate school decisions. I have applied to Wharton (UPenn), Harvard, Columbia, Dartmouth, Stern (NYU), and Dyson (Cornell). Not sure if relevant, but I'll be getting my MBA and masters in Investment Management as well.

Other than real life crap, I do other cool shit on HF too:

[Thoughts on the Market \(Economy\)](#)

[\[INFO\] So, how much does a website cost?](#)

[\[The Empire\] Meta Tag SEO for Dummies](#)

[Special Relativity - Space Time Travel](#)

As you can see I'm quite a simple fellow - I like money, websites, and space and shit. However, whatever I focus on always reflects my true strengths. I am a goal-oriented individual with big dreams and the means to achieve them.

So yeah. Thanks for reading; made this short and to-the-point to save your eyeballs from burning.

Mutes - March 9, 2015, 6:26 pm

Technically (almost) anyone who applies should be invited. No? The reason I'm saying this is that we all specialize in a certain area. Is that not what Specialists is?

Take me for example, I mainly stick to the beginner havking and private methods... sections. I mainly focus on helping people dox. Yeah, it's not hacking, but I don't believe it states we're required to be a hacker to join. Doxing is my (strongest) area of expertise, something I can share with the group.

An additional point I'd like to mention is that I have a college degree in computer networking. I know the basics of it, but I don't remember enough to get too advanced.

I'm also strong in basic hacking; emails, social networks, etc... Anything mentioned I'd be willing to share with the group.

Frawshy - March 9, 2015, 6:41 pm

I believe I should be invited into Specialists, because I have two full rows of awards; something not many others can say.

Freerunning - March 9, 2015, 6:45 pm

I'm Freerunning obviously I love freerunning I'm one of the featured freerunners in our country. I'm currently working as PHP dev at day and freelance dev at night. I'm focusing on web development and web security. I want to get in because with Specialist I will learn a lot of things that help me with my career as an exchange I will share my knowledge too and gladly help my co-members.

Revamp - March 9, 2015, 7:07 pm

I am Concept, I specialize in VPS Hosting and VPN services. I've been in the VPS market for about 2 years now. I also know a lot about running a business and I'm currently studying Business Law.

I believe that I should be invited to join Specialists because I specialize in currency exchanging and have run one of the most popular currency exchange services on Hack Forums for a couple of years now. During that time I've completed thousands of exchanges and have never had a single scam report opened against me, not will I ever scam anyone because I hate scammers with a passion. You can check out my exchange service thread by clicking [here](#) or in my signature.

They're not all that great. I've been in 2, if you don't count Titans Casino. 1 stole my idea, then kicked me out. The other one kicked us all out, and ignored me. Specialists doesn't seem too bad, that's why I'm giving it a try.

You are damn Legit but exchanging funds is not a speciality ? Correct me if I wrong . ?

Nam Duong - March 9, 2015, 9:44 pm

I'm not a specialist at anything, I always want to be able to learn more about subjects I love. I've recently gotten into filming and whatnot and it's been a really nice adventure even if I'm not the best I could be yet. I plan on continuing with this and possibly get started with youtube and will definitely make more projects.

For now, all I can show you folks is this:

<https://www.youtube.com/watch?v=6x6P351abbs>

It's a film project I helped my friend on and most of the cinematography work was mine with the exception of some of the rougher clips.

If there's anything else you might be interested, I used to art yay
My portfolio is here and I was mostly into tagging so I'm not really the graphics kind of guy, but hey thought I'd share.

BooGod - March 10, 2015, 8:26 am

I'm a Android programmer (Amateur). I'm currently working on my second App for Android. Hasn't been released yet though because of some delays and errors that I need to search and study to fix them.

I think I'd be a good addition to the group. I might not be the best but I try my hardest and I'm very creative in the business ideas.

I'm currently in the army (not pointless) because I will finish my contract day 20th of this month. And after that I may start my own physical & registered business with a capital.

I know the basics around multiple languages (Java, C#, xml, VS). I have been working mostly with Android Studio Development but I also work with Eclipse, because it provides me more efficiently

work and more tools to create my ideas.

By having someone to help me creating this projects/apps in my side would be amazing.

I want to join in Specialists to get more involved in this area to work and learn with members who does have more knowledge and expertise on this than me.

I can show screenshots of my two android projects work.

BooGod ?

If it's not a specialty then why doesn't everyone do it? I mean sure anyone can do an exchange every once in a while but you won't find many people on here who have done near as many exchanges as I have for as long as I have. To run an exchange service for any amount of time you have to know how to protect yourself to keep yourself from being scammed, know how to treat customers, know what rates to charge to make sure that you make a profit but not too high to where no one will exchange with you, and above all else be legit so that people know that they don't have to worry about being scammed when they deal with you.

I mean if you can do something for 2 years straight and make tens of thousands of dollars doing it, then I would consider it to be something that you specialize in doing.
