Thread: [\[FREE\]Johntheawe's Extension Spoofer + Icon Injector\[/FREE\]](#)

Uzi London ++ - March 7, 2015, 9:54 pm

Hey sexy people :)

Closing this. TOO many LQ posters. Thanks to the people who actually appreciated me sharing. If you were going to reply, do so in a PM? Idk. Do what you wish. The flame was too real.

I was bored (again) and decided to make an extension spoofer. So I made one and then someone gave me the code for an icon injector. It was kind of hard to make the icon injector myself, so that's the only thing here that I didn't write. I usually don't like using other people's shit but this time, meh. Anyways, I will include a download link below these screenshots :) I hope you likez <3

Enjoy Gaiz :3

Keep in mind: I'M OPEN FOR IDEAS

Please post here if you have any other things you think I should code (At beginner level)

Also, REMEMBER to post in the thread to keep it alive :3

CREDITS FOR THE THEME GO TO AeroRev9

I found the credits within the class. I didn't know they were there.

Corios - March 7, 2015, 9:56 pm

And what is the purpose of slapping your name on every one of your copy pasted projects?

Uzi London ++ - March 7, 2015, 10:03 pm

(Mar 7, 2015 10:56 PM)Corios Wrote: [\[CITE\]](#) And what is the purpose of slapping your name on every one of your copy pasted projects?

None of them are copy pasted you little fuck. And I can put my name on something that has MY code in it. I can't credit the icon injector because my friend sent it to me and he doesn't know who made it. Fuck off. I'm tired of LQ users like you trying to trash other people's shit. I just started learning vb 3 days ago. I'd say this is decent for 3 days.

Plus, why would I provide the source of a C+P project when someone could look at it and fuck my thread for being LQ? -_- This is mine, fuck off.

If you are wondering about the theme too, my friend gave me that also.

And I looked at your rep and I'm sure everyone here would agree that you are just a prick who thinks everyone but himself is a copy+paster.

Hiiro - March 7, 2015, 10:11 pm

You should start writing mature messages in your MessageBox responses instead of crap like this:

```
Code MsgBox("Stupd fuck... LOAD THE DAMN FILE FIRST")
MsgBox("-_- You didn't load either the fucking icon, or the god damn file dumbshit. LOAD IT",
MsgBoxStyle.Exclamation)
```

Uzi London ++ - March 7, 2015, 10:13 pm

(Mar 7, 2015 11:11 PM)Anchronology Wrote: [\[CITE\]](#) You should start writing mature messages in your MessageBox responses instead of crap like this:

```
Code MsgBox("Stupd fuck... LOAD THE DAMN FILE FIRST")
MsgBox("-_- You didn't load either the fucking icon, or the god damn file dumbshit. LOAD IT",
MsgBoxStyle.Exclamation)I actually tried that... it didn't suit me. As you can see, this time I didn't
make the buttons and such immature :D
```

But yeh I really should.

EDIT:

Believe it or not, I wrote the message boxes after I was almost finished, because I was like "OH MsgBoxes" and right before I started, my brother pissed me off because he threw my jacket in a puddle of water because I wouldn't help him find his e-cig :P so I was writing half angry :DDD

Corios - March 7, 2015, 11:05 pm

is that why you write things like "nice person" and "stupid shit" on other applications too? You must be an angry person all the time then.

(Mar 7, 2015 11:03 PM)Johntheawe Wrote: [\[CITE\]](#) None of them are copy pasted you little fuck. And I can put my name on something that has MY code in it. And I looked at your rep and I'm sure everyone here would agree that you are just a prick who thinks everyone but himself is a copy+paster.

You started learning VB 3 days ago. THAT MEANS YOU SHOULDN'T EVEN KNOW HOW TO READ A FILE. You're google copy pasting functions in until they work.

And so as long as your friend gave it to you, that's not plagiarism? Man I wish that worked in the real world LOL.

And no, I call copy-pasters out for being copy-pasters, nothing you've made is yours and half the shit you've "made" doesn't do what you say it does. Generators. HA.

want to go through the people that negged me? Let's look at the last one:

Quote:Egoistic kid who thinks hes a programmer cause he wrote LoL Client with WPF. Stay away from this kiddo.

Reverse engineered the entire LoL client and rewrote it using latest technologies and features? Constantly post exploit examples? Definitely not a programmer B), he didn't even know what an overlay is. I can do this all day, I only call out people that have NO idea what they're doing, like you. Notice how everyone else is too?

Ya, I'm an ass, I know that and deserve every neg that calls me a prick, but I'm only a prick to stupidity.

Hiio - March 7, 2015, 11:15 pm

The credits to the Theme are inside the Theme class, might as well paste them on the thread; it shouldn't be too much of an issue.

Odus - March 8, 2015, 4:34 am

(Mar 7, 2015 10:54 PM)Johntheawe Wrote: [\[CITE\]](#) Please post here if you have any other things you think I should code (At beginner level)

This part here concerns me. To date, your releases include SMS & email flooders, extension spoofers, icon changers, and 'combo' makers (this one is reasonable). Now, on the combo maker thread (March 6th), you said you started learning the language 2 days prior. So in 4 days you've gone from "Hello World!" to file manipulation -- far from beginner level.

Does this have a point? Yes. Until now, you've done no real damage to yourself since you've been having fun and it's always great to see people taking on programming. However, now you're at the point where you decide which path you take: A) Continue ripping off various snippets you find online, paste them in, and slap a theme on it then make the release threads (cross posting is disallowed actually) and enjoy the praise from the members none the wiser. B) Hold off the releases we've all seen 1000x over, buckle down and actually learn programming.

Personally, I'd recommend the latter since it will you do much better in the long run than some ego strokes and possibly a few +reps. Your call.

Nervo - March 8, 2015, 4:48 am

Quote:I just started learning vb 3 days ago. I'd say this is decent for 3 days.

This is the main reason we know you are copy-pasting. I agree with Corios and senpai Odus.

Goodbye World - March 8, 2015, 5:03 am

Quote:" CREDITS GO TO WHOEVER THE FUCK MADE THIS!!! XD LOL I JUST FOUND THIS SHIT ON PASTEBIN
from the iconinjector.vb file.

So your friend didn't give you the file then? Then that clearly shows you've been googling for code.

titanbullet - March 8, 2015, 5:08 am

Ok, I see you are doing okish in programming. But please. PLEASE. Stop trying to sell those programs. Noone will buy them and its a shame for us,serious programmers that spend weeks to make something good and sell it for 5 bucks,and you sell an account "gen" for 1 month for 5 bucks? I mean, come on!

sh@rp - March 8, 2015, 6:39 am

I hate people who stamps the windows or dialog boxes of their programs with their name !

They want to convince others that the programs are theirs.... they are thieves.....

ElementalTree - March 8, 2015, 10:17 am

Please stop spamming this section with LQ posts, it's getting real annoying seeing you everywhere in this section, you're just another c&p skid. And I agree with Odus to 100%

zeroexp - March 8, 2015, 10:33 am

(Mar 8, 2015 10:17 AM)ElementalTree Wrote: [\[CITE\]](#) Please stop spamming this section with LQ posts, it's getting real annoying seeing you everywhere in this section, you're just another c&p skid. And I agree with Odus to 100%

This ^.

Also, stop using the vocabulary of a prepubescent 12 year-old. It's not only annoying but is pretty cringy to read it as well.

Only3 - March 8, 2015, 10:47 am

tnx for this will take a look later ?

Uzi London ++ - March 8, 2015, 1:37 pm

It isn't for the feel of the program. They are JUST for the accounts. Do you not see? Why would I give away all of those accounts that I spent time cracking so they can be non-working in 3 days?

(Mar 8, 2015 06:39 AM)Ch@rLi3 (3D?tD3v) Wrote: [\[CITE\]](#) I hate people who stamps the windows or dialog boxes of their programs with their name !

It is mine, it's all MY code except for the iconinjector. People need to read. -_- I started learning vb.net less than 4 days ago.

(Mar 8, 2015 10:17 AM)ElementalTree Wrote: [\[CITE\]](#) Please stop spamming this section with LQ posts, it's getting real annoying seeing you everywhere in this section, you're just another c&p skid. And I agree with Odus to 100%

K. Since the only thing I copy+pasted was the icon injector because I had no Idea how to begin that. And ofc I'm a skid at it right now I've been coding for 4 days. You were a little bitch copy paste skid too at one point so why don't you stop posting on EVERY one of my threads and get a life.

(Mar 8, 2015 10:33 AM)Wops Wrote: [\[CITE\]](#) This ^.

I've been made aware of it and I realize it's unprofessional. Thank you for your post.

(Mar 8, 2015 10:47 AM)Only3 Wrote: [\[CITE\]](#) tnx for this will take a look later ?
You are welcome. Finally someone who actually appreciates me giving stuff to the community!
Thank you for your post. ?

ElementalTree - March 8, 2015, 2:28 pm

I was never a c&p skid because I was one of the few that knew doing the stuff yourself is more rewarding. You're one of the biggest dicks I've seen here so far, you're replying like a dickhead to all negative comments that you get.

Oh and I wont stop posting on your threads, there are plenty of them to ruin. Thanks for the neutral ?

Stop being such a dick and stop posting such low quality threads and I'll stop.

Streetlight. - March 8, 2015, 2:41 pm

Lol your a pathetic waste of a mouse button click, please do not go any further into trying to be pro vb.net coder, your just gonna release stupid shit you see already,
crypters,skypesresolver,emailbomber,smsbomber,ddoser, please just stop. Oh, and you've been

coding for only "4 days" and you can make this right? 100% c&p ATLEAST leave credits.
