Thread: [How to make redirect from http to https](#)

king1245 - March 7, 2015, 11:16 pm

How to redirect from http to https.

1. redirect <http://example.com> to <https://www.example.com>
2. redirect <http://www.example.com> to <https://www.example.com>
3. redirect <https://example.com> to <https://www.example.com>

Like facebook, google ??

Please help me with code in .htaccess or another

Bdwi - March 7, 2015, 11:32 pm

you would need to use the .htdocs and code it up there for it..pm me your skype and ill be able to help u with it.

You're running a web hosting business and you don't know how to do basic rewrites? Eek.

Are you using Apache, Nginx, or something else?

itsMeCherry - March 8, 2015, 9:31 am

There are many ways to achieve this. If you are using PHP you can do it with a code like this:

PHP Code

```
<?php
//
// FORCE SSL
//
// Use HTTP Strict Transport Security to force client to use secure connections only
$use_sts = false;

// iis sets HTTPS to 'off' for non-SSL requests
if ($use_sts && isset($_SERVER['HTTPS']) && $_SERVER['HTTPS'] != 'off') {
    header('Strict-Transport-Security: max-age=31536000');
} elseif ($use_sts) {
    header('Location: https://'.$_SERVER['HTTP_HOST'].$_SERVER['REQUEST_URI'], true, 301
);
    // we are in cleartext at the moment, prevent further execution and output
    die();
}
//
// FORCE SSL END
//
```

IF SSL is installed on your server.

Forcefully Redirect http to https via .htaccess file

.....

RewriteEngine On

RewriteCond %{HTTP_HOST} ^websitedomain\.com [NC]

RewriteCond %{SERVER_PORT} 80

RewriteRule ^(.*)\$ [https://websitedomain.com/\\$1](https://websitedomain.com/$1) [R,L]

.....
