Thanks for this tool, I've tested it myself and must say it does what it's supposed to. Maybe in the future you can possibly make it so that it creates a new server with the extension instead of changing the current one. Nonetheless great stuff!

Both are reputable online virus scanners. These are basic programs my man. Google just has a history of doing things like this. Let me know if you have any problems with it.

Alison Wonderland - March 13, 2015, 7:24 pm
