Thread: [PS3 Jailbreaking/Downgrading help desk #2](#)

Tenno - March 8, 2015, 9:12 am

I started a help desk a while ago, but it died, so I decided to start it again!

Ask me anything about modding, jailbreaking or downgrading. I cannot promise that I know the answer to everything, but I'll try to do my research.

I won't help you with piracy, and ODE's. I know nothing about ODE's and I'm too lazy to read about it.

If you would like to view my older post, which contains a few personal tips and other usefull advices, click on this link: <https://hackforums.net/showthread.php?tid=4559930>

So if you got questions, ask here!

SpeakerKnockerz - March 8, 2015, 3:14 pm

I have heard that spoofs were patched lately, and now I cannot go online. I am running the PS3ita 4.55 DEX firmware. How can I fix this, if there's a way at least? Thanks.

There's alot that goes into it. First off, you need to check your model number (can be found on the back of your PS3) and check your minimum downgradable firmware (Search up MinVerChk)

Keep in mind that Superslims won't work

If you PS3 is downgradable, you may proceed to purchase an E3-Flasher or any other hardware flasher to downgrade. This process is quite hard for those who have no knowledge of this. I would advice you to search around and understand the basics of it. The point is to get your PS3 to OFW 3.55, and then install your desired CFW.

Ask any more questions if you have any :)

How much would an E3-Flasher cost? And are there any free alternatives?

MeIT3d - March 12, 2015, 10:33 pm

The only way I'd imagine to get one free is if your friend has had one before.

But they can cost around \$70

If anyone needs help, post here! I'll answer what I can.

WuTangClan - March 19, 2015, 8:08 am

Tenno I'm getting my ps3 back next week. It will be on 3.55.

What tools I need to have so I can go online without any problems?

Tenno - March 19, 2015, 8:28 am

What tools I need to have so I can go online without any problems? You would need to spoof your PS3 to the latest firmware.

You should also spoof your console ID, to reduce the ban risk.

EDIT: You would also need to upgrade to Habib 4.65 CFW, as I think that's the only CFW you can go online on atm

WuTangClan - March 19, 2015, 9:19 am

Mate PM me your skype so we can talk about this when i get my ps3 back.

Tenno - March 24, 2015, 7:10 am

If you guys need help, post here! I will try to answer as soon as possible :)
