Thread: [Need Compile to .DLL Auto Acceptor - MatchMaking CSGO](#)

keepitlseezy1 - March 8, 2015, 6:04 pm

I don't have the necessary programs on this pc but can someone compile it as a DLL
its an auto acceptor for Matchmaking CSGO

Code #include <stdint.h>

#include <string.h>

#include <windows.h>

static void *g_surface = nullptr;

typedef void (__thiscall *pfnPlaySound) (void *, const char *);
pfnPlaySound fnPlaySound;

static __forceinline is_main_window(void)
{

static HWND csgoWindow = 0;

if (!csgoWindow)

do

csgoWindow = FindWindowA("Counter-Strike: Global Offensive");

while (!csgoWindow)

return GetWindow(csgoWindow, GW_OWNER) == (HWND)0 && IsWindowVisible(csgoWindow)
&& GetForegroundWindow() == csgoWindow && !IsIconic(csgoWindow);

}

static void __stdcall playSoundHooked(const char *sample)

{

fnPlaySound(g_surface, sample);

if (strstr(sample, "inposition02.wav")) {

while (!is_main_window()) {

ShowWindow(csgoWindow, SW_RESTORE);

SetActiveWindow(csgoWindow);

Sleep(1000);

}

}

}

static void derp(HINSTANCE voidwhereprohibited)

{

uintptr_t matsurface;

while (!(matsurface = (uintptr_t)GetModuleHandleA("vguimatsurface.dll")))

Sleep(10);

typedef void (*ciface_t) (const char *, int *);

ciface_t create_iface;

do {

create_iface = (ciface_t)GetProcAddress((HMODULE)matsurface, "CreateInterface");

```

    Sleep(10);
} while (!create_iface);

g_surface = create_iface("VGUI_Surface031", nullptr);
uintptr_t p = *(uintptr_t *)g_surface;
fnPlaySound = (pfnPlaySound)(p + 81 * 4);
*(uintptr_t *)(p + 81 * 4) = (uintptr_t)playSoundHooked;
}

BOOL WINAPI DllMain(HINSTANCE hInstance, DWORD fdwReason, LPVOID lpvReserved)
{
    if (fdwReason == DLL_PROCESS_ATTACH)
        CreateThread(nullptr, 0, (LPTHREAD_START_ROUTINE)derp, hInstance, 0, nullptr);

    return true;
}

```

Not trying to bash you but is it that hard to click "Accept" when you're about to play anyways?

Ah okay that makes sense then dude.

?
