First Reviews we have received:

<http://cpanetworkscript.com/testimonials.html>

mic141414 - March 20, 2015, 8:12 am

We released our script on Feb 11th and like any other new script, we are bound to have bugs.

But in our case, only small ones as we have tested it intensively (and fixed what was wrong) before it was released.

We do take care of our customers and our script. We have fixed our small bugs as soon as we were aware of them:

Update 18th Feb: Small fix in Paypal MassPay, Small fix in Daily report.

Update 5th March: Meta tags added on the site, Fixed one postback, Fixed problem with admin profit.

Update 20th March: Fixed Adscendmedia. Minor Improvement in postback.

Once we are done with bug fix and I think we are with today update, we will be working on real updates.

Order before the price goes up and the updates will be free for you

mic141414 - March 27, 2015, 6:52 am

Update 26th March

We have added a new network to our script:

[FiralMedia Network](#) (uses HasOffers network)

"Firal Media is a global advertising and CPA network. We provide the best service in the industry with the best paying offers from the top advertisers. We offer a wide range offers focused mainly on mobile, adult, and gambling. If you use paid traffic sources than we would love to work with you!"

Can you explain in detail what i does? I don't really get it yet. So does it auto click on ads or?...

mic141414 - February 10, 2016, 7:39 am

It is like running your own CPA site.

Do you know CPALead, adworkmedia etc???

It is to have a site like that. To recruit publishers so they can promote the offers and you as admin earn a % on each lead they bring.

This is not an auto clicks. It is a regular CPA network site.

No I am sorry it seems you don't understand how the system works.

You buy the script, set up your site, and promote it. Publishers will then sign up for your site.
