Thread: [Have a question? Want to hack something? Need tips? \[Helpdesk\]](#)

Private Network - March 9, 2015, 12:32 pm

So I read this section alot and most of the time it is people asking for something or how to do something.

So that is why I created this helpdesk for anyone to ask anything.

Want private help?

-sni-

Tips:

Dont use Skype when talking blackhat stuff, they log messages and read them. (Article:

<https://defuse.ca/microsoft-reads-your-skype-messages.htm>)

Here is a way to setup XMPP: <https://hackforums.net/showthread.php?tid=4717011>

Most questions can be answered by doing a search here: <https://hackforums.net/search.php>

Dont be afraid to ask me if you did not find anything or dont understand it!

What you can do:

1. Try to crack it (Targeted cracking is very hard)
2. Try to jack the account (Security questions etc.)
3. Send them a virus. (RAT, Stealer, Keylogger etc.)

If you need more help contact my Jabber/XMPP: JesseRIU@creep.im
Or email: JesseTheLegend@hackforums.org

I recommend 1.3 or 1.4.

I think I use Sentry MBA 1.4

If you need some configs for Sentry contact me too.

So if you really want to learn to hack you have to spend time and have to be dedicated!
Still want to learn?

Learn to program some languages like PHP, or Python/C++
(PHP mostly for web exploiting and Python or C++ for creating exploits/malware/game hacks.)

Python Guide: <https://hackforums.net/showthread.php?tid=1368539> and the Python subforum:
<https://hackforums.net/forumdisplay.php?fid=129>

C/C++/Obj-C Subforum: [Mobile Development](#)

PHP Subforum: <https://hackforums.net/forumdisplay.php?fid=154>

After you know some basic programming you will be able to understand exploits and use them correctly.

A big guide for small things: <https://hackforums.net/showthread.php?tid=1394754>

A guide for a beginner hacker: <https://hackforums.net/showthread.php?tid=3076198>

Also for communicating:

Dont use Skype when talking blackhat stuff, they log messages and read them. (Article:

Why are all the viruses now so malicious, what happened to the fun pop up screen viruses like back in the day, it seems all the viruses are for profit or intent to hurt someone? I know due to the updates in the systems it is harder for them to bypass for that purpose but still.
