Thread: [New OmniCoin Wallet IOS app \[Update thread\]](#)

Exigo - March 10, 2015, 1:56 pm

Donations would be appreciated and help with the development
oTrArkBbBdsRTAGbher1X9ZmhnHZjMnM1k

I'm going to develop a iOS OMC wallet app for iOS. Here I will post updates along with screenshots and videos of my progress.

I plan on having the app finished within 1 - 2 months.

The basic outline of the app is that the user should be able to sign up for a wallet as well as log in. The user can view nearly all details about their account from their wallet address to their balance to their recent purchase if the api allows it.

Nearly everything the Omnicha.in api offers I will implement.

Update #1 10/03/2015

I've begun work on designing the app, expect an update with the design in the next few days.

#Update 2 10/03/2015 22:05 GMT

First look at the early design for the sign in screen, open to criticisms and suggestions as that's how the app will get better.

Spoiler ([Click to View](#))

UPDATED 22:18

Spoiler ([Click to View](#))

Update #2 11/03/2015 17:51 GMT

I've designed the main screen of the app. It's not perfect and could be improved on so I look forward to your suggestions.

Thanks.

Spoiler ([Click to View](#))

#Update 3 13/03/2015 16:15 GMT

Updated the main screen of the app to include some of the suggestions people have put forward.

Spoiler ([Click to View](#))

I'm tired of designing so the next step is to actually code something. I'll be recording the actual coding and speeding it up so people don't have to watch hours of coding. Look forward to an update soon!

Update #4 13/03/2015 22:02 GMT

I didn't get a chance to record actual coding sorry guys. But I have a video here demonstrating the login and register features. It's still a work in progress but nearly all the function is there. I still need to add alert views though.

The video below shows the the login and register prototypes working:

Spoiler ([Click to View](#))

[Video: <https://www.youtube.com/watch?v=-2dIDjIJiK8>]

#Update 5 15/03/2015 1:42 GMT

I'm beginning work on core functionality of the app and for this I'm in need of small amounts of OMC. If you can spare a few OMC to help me test the app I would be very grateful!.

address:

oTrArkBbBdsRTAGbher1X9ZmhnHZjMnM1k

#Update 6 23/03/2015 19:28 GMT

Development has grinded to a halt due to a bug in the api that has yet to be fixed.

Will update soon.

#Update 7 1/04/2015 21:32 GMT

I've been pretty busy as exams are coming up but as Abe said the problem has been fixed and development has continued, although at a slow pace due to the looming exam season.

I've made significant progress on the main screen. I've just got to fix up a few bugs here and there.

#Update 8 10/04/2015 18:53 GMT

I had some time to work on the app so I rewrote the transaction code as I wasn't happy with it. Right now what is working is that it makes the call to the api, get the results, sorts the results and displays the different cells based on the values.

Video is below:

https://www.youtube.com/watch?v=ukCcJEFp_Hg

#Update 9 12/04/2015 0:11 GMT

I've finished the transactions part of the app. The transactions part of the app displays all the transactions made today, all transactions made within 7 days of the current date and all transactions made this month.

The next step is to add the screen that displays when you click on a transaction to see more detail.

A video of the transactions working is below:

<https://www.youtube.com/watch?v=r5c5bARTFNq>

Feedback is welcomed.

Update #10 12/04/2015 03:49 GMT

I had a coffee a bit too late tonight so I haven't been able to get to sleep. I really didn't like the current design so I'm going to be spending a few days updating the UI. I managed to get a very nice looking design incorporated into a test project to not accidentally ruin the main project. I'm going to incorporate the design into the main project tomorrow. The image is below, I'm making a poll for whether I should use the new design style or the old one. The login screen is below:

Spoiler ([Click to View](#))

Update #11 13/04/2015 15:28

Since I've finished the main page which holds the transactions I need a small team of testers, maybe 3. I've messaged MeshCollider a copy of the source code to look through and approve. If you want to view the latest source code the link to my Github repository with the latest code is below.

<https://github.com/AlexCatchpole/OmniWallet>

FRANKIE - March 10, 2015, 1:57 pm

Curious to see how this will turn out. Going to bookmark & watch development as it goes :)

SpeakerKnockerz - March 10, 2015, 1:58 pm

Posting to check it out. Good luck on your journey, OP, will definitely be checking daily!

Dr.Penguin - March 10, 2015, 1:59 pm

Awesome, I wonder how this is all going to play out.

ZuGgY - March 10, 2015, 1:59 pm

Ok, as long as the OMC team tests this out and approves of this first, so we can trust it and all, I'm fine with seeing this.

Thanks.

Exigo - March 10, 2015, 2:01 pm

I'll be allowing the OMC team to fully test out the app before putting it on the app store.

(Mar 10, 2015 01:59 PM)ZuGgY Wrote: [\[CITE\]](#) Ok, as long as the OMC team tests this out and approves of this first, so we can trust it and all, I'm fine with seeing this.

Thanks.

NoMercy - March 10, 2015, 2:06 pm

Sounds brilliant. Thank you for doing something so awesome for the community! Keep up the good work!

Exigo - March 10, 2015, 3:07 pm

Added a early design of the sign in page, suggestions welcomed!

Aeroslim - March 10, 2015, 3:10 pm

Don't hate me for this.

Not got an account? Sounds different, maybe you just had it there. Other than that, sick asf bro, love it!

Exigo - March 10, 2015, 3:12 pm

(Mar 10, 2015 03:10 PM)Aeroslim Wrote: [\[CITE\]](#) Don't hate me for this.

Not got an account? Sounds different, maybe you just had it there. Other than that, sick asf bro, love it!! I don't quite get what you mean by "maybe you just had it there"?

Aurora - March 10, 2015, 3:15 pm

(Mar 10, 2015 03:12 PM)Vaillant Wrote: [\[CITE\]](#) I don't quite get what you mean by "maybe you just had it there"?

I think he's saying the way it's phrased.

"Not got an account?" sounds a bit funny.

"Don't have an account?" sounds better.

Exigo - March 10, 2015, 3:19 pm

(Mar 10, 2015 03:15 PM).Sinister Wrote: [\[CITE\]](#) I think he's saying the way it's phrased.

"Not got an account?" sounds a bit funny.

"Don't have an account?" sounds better. I've updated the design to change the bottom text.

Abraham Lincoln - March 10, 2015, 4:18 pm

Although I love the alternative logo design, you should probably stick with the official one so there isn't any confusion.

Exigo - March 10, 2015, 4:28 pm

(Mar 10, 2015 04:18 PM) Abraham Lincoln Wrote: [\[CITE\]](#) Although I love the alternative logo design, you should probably stick with the official one so there isn't any confusion. I'll try to work that in.

Thanks.

SIM-2015410 - March 10, 2015, 10:33 pm

(Mar 10, 2015 02:01 PM) Vaillant Wrote: [\[CITE\]](#) I'll be allowing the OMC team to fully test out the app before putting it on the app store.

The omnicoïn team can really only give full approval if you make it open source, please keep that in mind. Can't wait to see some progress here :) design looks good so far.

Exigo - March 11, 2015, 9:33 am

(Mar 10, 2015 10:33 PM) ?eshCollider Wrote: [\[CITE\]](#) The omnicoïn team can really only give full approval if you make it open source, please keep that in mind. Can't wait to see some progress here :) design looks good so far.

I'll have to think about making it open source but in the end it probably will be open source.

Updated the post to include a design for the main screen.

Suggestions are appreciated.

Doctor Blue - March 11, 2015, 2:31 pm

(Mar 11, 2015 09:33 AM) Vaillant Wrote: [\[CITE\]](#) I'll have to think about making it open source but in the end it probably will be open source.

Updated the post to include a design for the main screen.

Suggestions are appreciated.

Please change OmniCoin to Omnicoin. You might also want to emphasize the address over "Sent" and "Received". You could even indicate that with an arrow instead or something.

Exigo - March 11, 2015, 3:37 pm

(Mar 11, 2015 02:31 PM) Doctor Blue Wrote: [\[CITE\]](#) Please change OmniCoin to Omnicoin. You might also want to emphasize the address over "Sent" and "Received". You could even indicate that with an arrow instead or something. Thanks for the feedback, will implement that tomorrow.

EziNet - March 12, 2015, 3:45 am

Looks good man, when this will be available for download?

Crypto™ - March 12, 2015, 7:44 pm

Looks awesome man :) Excited to see how this goes! Sadly, I can't test it, because I have an Android :D

Auxil - March 12, 2015, 8:19 pm

Windows Phone users come together and cry silently. :(

Great looking app so far though. I would add transaction details when the transaction is clicked on.

Purist - March 12, 2015, 8:20 pm

Subscribing to thread.

Curious to see the outcome of this little project.

Good Luck OP.

Exigo - March 13, 2015, 9:17 am

Updated the main screen to include some of the suggestions people have suggested. I've also sorted out the alignment of the text.

Feedback is welcomed.

FRANKIE - March 13, 2015, 9:22 am

Definitely liking some of the updates, the wallet sending and receiving part looks really nice.

Vexane - March 13, 2015, 11:10 am

Are you planning on charging for this? If not consider open sourcing this app. I'm sure security freaks will raise an eyebrow at this, and you'd gain much more users simply by open sourcing. Plus I'd be more than happy to contribute and help with bugs reports!

Exigo - March 13, 2015, 11:34 am

(Mar 13, 2015 11:10 AM)Varosion Wrote: [\[CITE\]](#) Are you planning on charging for this? Plus I'd be more than happy to contribute and help with bugs reports!It'll be free and open source and yes I'd love the help with the odd thing! Thanks for offering!

Updated to include quick video on progress of app and an early prototype for the login system.

Vexane - March 13, 2015, 6:51 pm

I remember hearing Blockchain was removed from the AppStore quite a while ago for being able to send cryptocurrencies.

<http://www.pcworld.com/article/2095060/apple-removes-blockchain-last-bitcoin-wallet-app-from-mobile-store.html>

If you do get rejected, I really have no idea how to get around it, but it is very possible.

Source is outdated, checked the AppStore and it's been added back since! Looks like you're in the clear!

<https://itunes.apple.com/us/app/blockchain-bitcoin-wallet/id493253309?mt=8>

I have a custom OMC address and I want to be able to manage it on mobile, does Omnicha.in support private key importing?

Abraham Lincoln - March 14, 2015, 12:44 pm

(Mar 14, 2015 12:32 PM)Manuel Neuer Wrote: [\[CITE\]](#) I have a custom OMC address and I want to be able to manage it on mobile, does Omnicha.in support private key importing?

Yes, you can. It's a little server intensive so all imports are processed manually.

The Scarabian - March 14, 2015, 12:51 pm

(Mar 14, 2015 12:44 PM)Abraham Lincoln Wrote: [\[CITE\]](#) Yes, you can. It's a little server intensive so all imports are processed manually.

Ok, and I understand that you are handling the imports, i'm new to crypto-currencies, when I import the private key, would it still retain all of its OMC?

Abraham Lincoln - March 14, 2015, 1:00 pm

(Mar 14, 2015 12:51 PM)Manuel Neuer Wrote: [\[CITE\]](#) Ok, and I understand that you are handling the imports, i'm new to crypto-currencies, when I import the private key, would it still retain all of its OMC?

The private key is just the "key" to your OMC. Importing the private key is just giving the wallet the key to your OMC.

So if you have the key in your desktop wallet and in an online wallet, they both have access to the OMC.

So yes, you still have access to the OMC on your wallet.

The Scarabian - March 14, 2015, 1:10 pm

So yes, you still have access to the OMC on your wallet.

Okay, is there a way you can import my key without seeing it? Im just paranoid like that, dont wanna lose my 2\$ lmao.

Abraham Lincoln - March 14, 2015, 1:28 pm

(Mar 14, 2015 01:10 PM)Manuel Neuer Wrote: [\[CITE\]](#) Okay, is there a way you can import my key without seeing it? Im just paranoid like that, dont wanna lose my 2\$ lmao.

Yes, it will all be done by the API. You don't have to send the key to me.

The Scarabian - March 14, 2015, 1:32 pm

(Mar 14, 2015 01:28 PM)Abraham Lincoln Wrote: [\[CITE\]](#) Yes, it will all be done by the API. You don't have to send the key to me.

Ok, sending you a PM about this.

OP, I just had an idea for you, Touch ID login, even Blockchain doesn't have that.

Exigo - March 14, 2015, 3:28 pm

(Mar 14, 2015 01:32 PM)Manuel Neuer Wrote: [\[CITE\]](#) Ok, sending you a PM about this.

OP, I just had an idea for you, Touch ID login, even Blockchain doesn't have that. That's accessible but the Omnichai.in api does not have any method for staying logged in without storing the hashed password and username locally so you will have to log in each time you want to use the app.

I might add a poll to add a feature to circumnavigate this such as "remember my credentials in which case your details are saved to the keychain"

The keychain is very secure and the app would only ever store hashed credentials.

The Scarabian - March 14, 2015, 3:31 pm

(Mar 14, 2015 03:28 PM)Vaillant Wrote: [\[CITE\]](#) That's accessible but the Omnichai.in api does not have any method for staying logged in without storing the hashed password and username locally so you will have to log in each time you want to use the app.

I didnt understand half of that, but does it unlock the app with Touch ID?

Exigo - March 14, 2015, 5:36 pm

(Mar 14, 2015 03:31 PM)Manuel Neuer Wrote: [\[CITE\]](#) I didnt understand half of that, but does it unlock the app with Touch ID? Basically you have to login each time you want to use the app. You can't simply launch the app and view your balance.

The Scarabian - March 14, 2015, 5:38 pm

(Mar 14, 2015 05:36 PM)Vaillant Wrote: [\[CITE\]](#) Basically you have to login each time you want to use the app. You can't simply launch the app and view your balance.

Could you make it so Touch ID puts in your details for you?

Exigo - March 14, 2015, 5:42 pm

(Mar 14, 2015 05:38 PM)Manuel Neuer Wrote: [\[CITE\]](#) Could you make it so Touch ID puts in your details for you? What would I do for devices predating 5s then? Also I'm not sure I like the ideas of locally storing credentials.

Bigandrewgold - March 14, 2015, 5:59 pm

(Mar 14, 2015 05:42 PM)Vaillant Wrote: [\[CITE\]](#) What would I do for devices predating 5s then? Also I'm not sure I like the ideas of locally storing credentials.

what do other financial apps which let you sign in with touch id do? I can sign into my discover account and robinhood account with touch id

Exigo - March 14, 2015, 6:02 pm

(Mar 14, 2015 05:59 PM)Bigandrewgold Wrote: [\[CITE\]](#) what do other financial apps which let you sign in with touch id do? I can sign into my discover account and robinhood account with touch id They probably have a lot more sophisticated systems then the ones i'm willing to implement into this.

You know how Spotify allows you to login with your Facebook but it only asks you once? When you first login you are given a session token. These are only useful for 24 hours. When that one runs out the application uses the expired token to ask for a new one meaning that no credentials are ever

stored on the system.

omnicha.in api does not have that functionality yet although I think Abe is thinking about updating the api soon if I'm not mistaken.

The Scarabian - March 14, 2015, 6:18 pm

BETA TESTING YOU SAY. Could I partake in such tests?

The Scarabian - April 18, 2015, 1:30 pm

(Apr 16, 2015 03:01 PM)Van Hohenheim Wrote: [\[CITE\]](#) BETA TESTING YOU SAY. Could I partake in such tests?

Im pretty sure that if you have a version of appsync, you can compile the source into an iOS app. I could be completely wrong though

Exigo - April 19, 2015, 3:19 am

(Apr 18, 2015 01:30 PM)Manuel Neuer Wrote: [\[CITE\]](#) Im pretty sure that if you have a version of appsync, you can compile the source into an iOS app. I could be completely wrong though I plan on using test flight which Apple recently bought. I can't do it for a while as I'm doing another project for a business so actual projects take precedence over side projects.

Vexane - April 19, 2015, 8:00 pm

Sent a pull request to support all devices rather than just the iPhone 5. If you send me the entire layout for the new design I could implement it in a pull request.

So how do I compile the source code into an app that can be used with AppSync?

<http://www.grobinson.me/developing-and-debugging-my-own-apps-on-jailbroken-ios8-1-using-xcode-6-1-without-paying-apple/>

Just grab Xcode, change some project settings and you should be good to go. PM me if you have any weird issues.

I'll get round to doing what needs to be done after my commercial project is done and exam season is over.

Thanks again!

You have to merge (approve) the pull request on GitHub in order for the changes to actually mean something.

I was also thinking of a different look for the iPad version and not simply a stretched version of the iPhone version.

I'll talk to you soon about if you could help with constraints because I can't do jack shit in that field.

Cheers

Haha, just making sure you didn't assume it merged automatically.

Anyways, I'd be more than happy to continue helping with constraints. It has taken me more time than I'd like to admit to get the hang of them.

Good luck on those exams!

Vexane - September 21, 2015, 9:17 pm

Is this still a thing? 35 characters are a bitch...a big bitch.

It's dead for the time being, I can't allocate it time over other more important projects atm.

That's unfortunate, this would be pretty cool. Maybe in the future as/if OMC grows more. ?

Vexane - September 25, 2015, 2:29 pm

Working on an alternative now. This one has been inactive for months.

Wouldn't be any help in development, but if/when there's a testing/user phase count me in. ?

I'll open a TestFlight build soon, but not until I finish at least the wallet view. I'm shooting for a stable TestFlight build on October 10th.

EDIT: sigh school is very demanding, let me change the expected beta date to October 20th.

Phreakdaline - September 27, 2015, 10:20 am

Excellent, I'll be checking back for that. ?

Vexane - September 27, 2015, 11:11 am

I've checked the Omnicoin faucets and it appears, they're all dry. Any small 'donations' to oXWzUHPS4T5RbJP6gMC3uTXBGaR6BruC49 would be highly appreciated. I will send them right back, I just need to have some transactions in my history.

EDIT: Thanks to however sent that, now I can get working on the wallet view with confidence.

Terrorize - September 27, 2015, 6:13 pm

I'd love to see this for Android even though I do have an iPhone 6 lying around somewhere.

Nyctophiliac - December 13, 2015, 7:58 am

Isn't Omnicoin Dead ?

I suggest make it a multicoïn wallet

Bulgarian - December 13, 2015, 7:40 pm

Can't we bring it back? How does one revive a dead coin? I'm willing to try!

Magicmann - December 13, 2015, 9:31 pm

Omnicoïn isn't dead. It has a few people that are doing what we can to get the network stable again. Once the network has miners to process transactions, it can be sent between people again and any Omnicoin related services will be working well again.
