Thread: [Auto buy licensing system?](#)

GhostProtocol - March 11, 2015, 1:39 pm

Hello fellow programmers,

I am currently working on a massa mailer.

I am going to sell this later on when its finished i am looking for a sort of licensing system with auto buy for bitcoins.

So an user comes to my website and needs to buy and then gets verified so they can use my product... If any of you know some kind of api or tutorial please post below!

Also the product is made in laravel so maybe somebody knows one which corresponds to laravel!

Thanks in advance!

Use Payivy. They have bitcoin/litecoin/omincion as payment options. You just need to add serials.

<https://hackforums.net/showthread.php?tid=4722006> It's free, unlike payivy, they use coinpayments, they take a percentage.

I believe you can do so easily with paymentwall, however this is a tutorial for points not a product but you can take parts out of it: <https://hackforums.net/showthread.php?tid=4707327>
