What is kikMe?

Maybe you just can't find enough clients... or any clients.
Maybe you're on ChatRoulette and it's just not going well.
Perhaps even kik hasn't been working out so well for you.
You've come to the right place.

kikMe is a revolutionary bot that sends out the requests you want, when you want it, and how many you want.

It's tailored to those who just want to prank their friends or make some cash on the side.

Features

1. User Friendly Design
2. Fast & Proxyless
3. Custom Message and Photo messages
4. Built-in auto-captcha solver
5. Lifetime License
6. Lifetime Updates to this version

- Venture Capital contacted me regarding reviewing of his product.
- Very helpful, friendly customer service.
- Downloading the product, and requires a license system. Very nice.
- Made a random overused E-Whore, very basic and saturated picture to see how well this really works.
- Starting running the product after entering the information for my E-Whore in the fields that it asked for. Very self-explanatory, and clean GUI.
- It's been 10 minutes, and I have 98 adds. Incredible.
- Mostly Auto-Pilot, although it asks for Captcha but it's implemented well.
- If you are browsing, it will pop up like so:
<https://i.gyazo.com/824c030d7c4089d1b0e27a8692d0c5cd.png>
- Still running and getting tons of traffic.

E-Whoring the people, made \$135 in around 90-120 minutes.

<https://i.gyazo.com/aeda6fe8c062e4349e77ae7c292283f2.png>

- Woke up the next morning after stopping the bot with over 400 adds.

This product is amazing, and has very much potential in the upcoming future.
Venture Capital has my vouch.

(Mar 12, 2015 12:18 AM)MNWKA Wrote: [\[CITE\]](#) Alright I have been using this bot for a couple hours now, and I HIGHLY recommend it for any eWhore. It has sections to upload a picture and a message to post on the site which I'm very happy is implemented in the program. There are many different Captcha solving sites that cooperate well with the program and it offers many different types of sites. I've been using DBC and with this program running in the background while I'm already making money eWhoring is a HUGE plus as I don't need to stop and post everywhere and wait, you can set it to when you want it to run through the sites again. I've already made my \$15 back that I paid for the program in the matter of minutes (seriously) again, I highly recommend buying this bot. There are plenty of sites the bot goes through and I'm sure they will be adding more sites when they get more to add, but don't worry there are a lot of sites it already goes through. The only downside I see to this program is this

I'm just kidding (: that was one person out of:

and to recap, this product is an all around great product and I don't know what you're doing still reading this when you could be buying this and making a lot of money on semi-autopilot..honestly go buy this now if you're hesitant you'll make the money back almost instantly, take my word for it. Nuclear Power - March 15, 2015, 12:31 am

A another suggestion for this would be some type of Mass message to all kik requests etc... So when you get people adding you put whatever you want to send out a mass message to all of them or some type of auto responder of some type.

Just a suggestion that would make it very simple. But I am interested in purchasing this especially if that was added.

Just bought this generator not too long ago.

I bought it ran into a very minor problem, I contacted the owners and they responded immediately and made sure that I received exactly what I payed for. They put hours and hours into work just to fix a small problem I had, which is HIGHLY appreciated. They tried every single thing in their book and made sure everything worked perfect on my end, and everything ended up working perfect.

Extremely satisfied with the support and response times, I have already tested out the program and it functions right and does exactly what it is suppose to.

- Made a random overused E-Whore, very basic and saturated picture to see how well this really works.
- Starting running the product after entering the information for my E-Whore in the fields that it asked for. Very self-explanatory, and clean GUI.
- It's been 10 minutes, and I have 98 adds. Incredible.
- Mostly Auto-Pilot, although it asks for Captcha but it's implemented well.
- If you are browsing, it will pop up like so:
<https://i.gyazo.com/824c030d7c4089d1b0e27a8692d0c5cd.png>
- Still running and getting tons of traffic.

E-Whoring the people, made \$135 in around 90-120 minutes.

This bot just goes to all the main kik adder friends websites and posts your username automatically.

My question, why can't i just do that? it would take 5 minutes longer but be free.

Also all the websites this bot users are completely saturated.

It allows for a custom message and image to be added. You could do that, and it would take longer than 5 minutes but this automates it.

We will be adding new websites to the list as time goes on. If you'd like to suggest any, please feel free to do so!

Contacted OP about this.

My review on this Product

Good Product,does its job up Until a certain Point.

Once this bot hit the site kikfriend.net it glitches and stops working for me because the site ask for email,sometimes it goes through.

Also sometimes when captcha box pops up its completely black and when i go to the main browser to view the captcha,i enter it in the captcha box and it does the captcha right but inputs details wrong and site gets a error,it then skips that site.

I Personally watched the bot and by the time it got to around 9th site its done because of kikfriend.net.(Unless thats last site in the list)

Good Bot but very buggy for me.

Also sometimes if i stop the bot and then click Run again it doesn't run.

Review On program overall: 6.5/10

Positives: Still gets traffic,not crazy amounts tho

Negatives: Buggy and missing a few key factors,cannot be maximized.?

Bdwi - March 30, 2015, 6:08 am

Ventures did u fix the problem of runinng like before?

StandardLibrary - March 31, 2015, 3:47 am

I am interested in a three-hour demo. However, I completely understand if you cannot give me a free copy, I'll perhaps buy it.

FusionMatrix - April 1, 2015, 8:27 am

Does this have an auto responder built in yet? Would love to buy it

No, it does not have a responder. But you could easily make one with a mouse and keyboard recorder.

Lycoso - April 3, 2015, 4:16 am

do you accept unverified paypal payment? i mean does this automatic system accept this type of payment

Yes, that is fine. ?

You can also contact me if you have any questions

Jay327 - April 3, 2015, 8:02 pm

update the kik bot, I am not getting any traffic even when I use a different e whore username. And its not the message that is not getting me traffic to my kik

BotMarket - April 4, 2015, 12:22 am

If you need any support you can contact me or Ventures, If you would like to suggest any ideas that would be great. I would suggest using a good message to get the most traffic per min.

ZYZZ BRAHHH - April 4, 2015, 6:28 pm

Will you ever make this available on devices?

cLopx - April 5, 2015, 10:27 am

looks amazing will surely buy it in a couple of days

The leaked version is V1 and it's backdoored on a different forum. If you'd like to check it out, by all means, please do. However, I HEAVILY ADVISE AGAINST using it because it's backdoored and probably doesn't work since it's V1 and NOT V2.

I will be online most of today taking support questions.

?FettyWap - April 14, 2015, 3:41 pm

Just Bought this Kik bot helps Get traffic EASILY. There are a few Minor bugs like Webbrowser Sometimes Crashing and some websites not working. But other than that its PERFECT for E-whoring.

The-Fluffy-Kitty - April 14, 2015, 3:42 pm

I think I will be buying soon, my other traffic sources are kinda dry and I feel like saving time.

How many sites will it post to?

It posts on all the big kik sites, but i am working on V3 right now and its going to post on a lot more kik sites and it will spam chat rooms too.

Should have V3 done sometime this month.

BotMarket - April 17, 2015, 9:41 pm

If anyone has a list of sites to add or any suggestions for V3 please let me know.

Thanks.

- Venture Capital contacted me regarding reviewing of his product.
- Very helpful, friendly customer service.
- Downloading the product, and requires a license system. Very nice.
- Made a random overused E-Whore, very basic and saturated picture to see how well this really works.
- Starting running the product after entering the information for my E-Whore in the fields that it asked for. Very self-explanatory, and clean GUI.
- It's been 10 minutes, and I have 98 adds. Incredible.
- Mostly Auto-Pilot, although it asks for Captcha but it's implemented well.
- If you are browsing, it will pop up like so:
<https://i.gyazo.com/824c030d7c4089d1b0e27a8692d0c5cd.png>
- Still running and getting tons of traffic.

E-Whoring the people, made \$135 in around 90-120 minutes.

<https://i.gyazo.com/aeda6fe8c062e4349e77ae7c292283f2.png>

- Woke up the next morning after stopping the bot with over 400 adds.

This product is amazing, and has very much potential in the upcoming future.
Venture Capital has my vouch.

Thanks a ton boxy for taking the time to review the bot.

Bot need V3 to come out.

Traffic income is very little to none.

Nothing as before

Teen La Queefa - May 11, 2015, 5:54 pm

Did you steal this from Anonkik?

It came out 4 months before this , looks identical , functions the same , and was written with ubot too...

Seems sketchy OP hope you aren't reselling shit for your own gain

Hey guys, a lot of the sites that can get you kik requests keep going down. I have been working on V3 for around a month now it's been a huge pain.

But please be patient.

V3 is going to have 100s of sites and fail safes.

Man i thought it was only going to take a week or 2 now its on over 5 weeks the sites that get you contacts keep getting shut down or ddos'ed so its been a huge pain thinking of the logic plus what sites to use.

Because so many kik sites keep running like shit or getting shut down i just started working on my own add me kik site.

Please be patient. V3 will not be released until its ready, i want it to be extremely HQ.
