Thread: [XML - Considered?](#)

Sajuuk - March 12, 2015, 1:18 pm

I've seen people claim that one of their languages that they have a talent for is XML. Do you agree with this? I don't believe XML is a language you can be talented in at all. I can see HTML and CSS being languages one could have talents in/be skilled at, but not XML (for me at least).

What're y'all's opinions on this matter?

Exemplification - March 12, 2015, 10:48 pm

You'd be surprised how many people don't know how to use and read XML files correctly so any "talent" they have for it is worth something.

Wesley Snipes - March 12, 2015, 10:50 pm

XML is general, absolutely not. However, in Android, XML is used to style the layouts and therefore one could be talented in designing a layout using XML

And some games, such as, I believe, Grand Theft Auto IV, use XML for data storage like weapon accuracy/damage, etc.
