Thread: [Can someone test if my server.exe is working ?](#)

Elfly - March 13, 2015, 5:51 am

Hello everyone, I'm new on HF and hope to get along with all of you. It's my first post and thread. Can someone test my server please ? I'm not sure it works well...

I also have many problems with VM setup i'll post an other thread about that. actually, saying that I'm going to do an other thread about that is not really useful but I said that.

Nice to hac.... nice to meet you everyone !!!

Alison Wonderland - March 13, 2015, 5:53 am

swee you want it tested

run it on yourself or in a VM like every other Newbie needs to realise they can do

youre welcome for this life lesson glhf

KlaidasKlaidas7 - March 13, 2015, 5:54 am

Download sandboxie > run the virus on that > problem solved

flutterking - March 13, 2015, 5:55 am

Wouldn't launch it on your own PC (It's a bitch to get off) just download VMbox and try it on there.

go to your RAT client

Uninstall server

if you made the servers you can easily remove them, after all you know what they get called and what they install as and where and everything

Elfly - March 13, 2015, 5:58 am

Thanks for the help guys, i'll try that...

Ainan007 - March 13, 2015, 6:01 am

I'll test for you add my Skype: Ainan007

Sendiebox is really good! Vouch for it :)

I stilll need someone to test my server please...
