Would be careful asking for this.... Some people will backdoor your file so you will be sharing the infections... Js OP.

No worries man I would not even bother crypting until you know a little bit more about how it works... Send some files that are detected and you will still get infections :D

No disrespect to mooimaturkey, but as OP doesn't really have alot of knowledge about this subject, and you have -rep and you can sell crypting services for money I wouldn't really trust all this. Just my honnest opinion.

swiftblackhat - July 26, 2015, 11:02 am

Id crypt your stub for 1\$ and screen share and talk you through the whole process

Kill?Muvz - July 26, 2015, 4:34 pm

I'm sorry to break the news but i can guarantee 0 free crypters will be even close to FUD. There are many crypters on HF for as low as 8\$ that are v/ good.

This thread was also grave dug so badly, I doubt he needs a crypt anymore guys, especially since he's banned.

Sorry didn't know this thread was old. Is that true about your experience with a free crypter?

Yes it is, sadly it's only for upgraded members now due to the fact that many users were scanning on VirusTotal.

Its a shame people have to spoil luxuries people release but its understandable why they only allow active and upgraded members to use the service.

Yeah, it only takes one person to ruin it for all the others.

If you want a free crypter, try Enigma Crypter. It's probably not FUD at the moment but I'd recommend it if you're looking for a truly free one which any user can get.
