Thread: [Can anyone netseal a source code for me](#)

Feanor - March 13, 2015, 5:41 pm

Hi, I need a source code netsealed please can anyone help, I can't pay anything now but I can pay next week when I get payed, please pm me, thanks

Ninja - March 13, 2015, 5:50 pm

The tutorials on the thread cant be more simple. Literally 3 steps and it is done.

I actually bought it for \$200 some guy ripped me and gave it me in an .exe, I'm a complete beginner and I was punching above my weight. He said all I had to do was decompile and netseal it and I thought that was the be all and end all of it. but I'm having trouble in vs there's loads of bugs and I don't know where to begin. I can see how it looks dodgy but if you look at my other threads then you'll see i've got ownership.

You will not get a clean decompilation from exe to a full source code, you were scammed.
