Thread: [Red Lions userbar remake!](#)

Autononymous - March 13, 2015, 6:59 pm

Rate it? Do you guys like it?

I remade their entire userbar.

Which one looks better?

Yeah I like your new one but tbh there isn't that much changed :)

Scymo - March 13, 2015, 7:16 pm

I like the text on the old one to be honest, it's easier to read

Autononymous - March 13, 2015, 7:18 pm

I'll fix the text right now, Just realized a mistake I made XD

lenaos - March 13, 2015, 7:18 pm

There's no change on this, the idea and concept is still the same, almost everything.

Update

It really doesn't look that different. You added a few more of the flames (or whatever they are suppose to be) and edited the colors a tad here and there. So... I can't really rate something so similar.

Much better, very more clear to read the text on the new one. Now it looks great!

This only took me like 10 minutes, it was an easy userbar.

Honestly the new one does look better, even though there are minimal changes.

I dunno. I definitely don't dislike it. The extra fray space is nice, definitely gives a cooler accent rather than being a plain old bar design, but I do feel like it takes too much away from the center. Maybe it could use a liiiittle more fray, just not so much.

Autononymous - March 13, 2015, 11:31 pm

Oh thanks, will try some more fray!

Yours has a lot more "volume" to it than the old one, but yea.

Same style, not much to say.

There's no change in font or anything, so this doesn't make ANY sense what so ever.
