Thread: [\[FREE\] Mobile friendly website coding - Bootstrap](#)

Aur3xis - March 14, 2015, 8:39 am

Yo HF, i've got some free time and im using bootstrap for about a week now, i don't have any ideas to train my skills anymore so i decided i will code some mobile friendly(responsive) websites 4 you guys. Remember to keep it simple requesting as im not an proffesional/experienced web-dev.

Don't expect too much ?

Also i don't guarantee that the results will be 100% as expected/designed/wanted etc.

No l33t/ub3r required to request, hmu ?

NoMercy - March 14, 2015, 9:06 am

Can you help me make this site mobile friendly?
