Really cool thread design man! Happy to see there are a lot more designers here than I previously thought there would be.

I'd use this but I make my own stuff, and I don't have much to advertise :p

I'm curious to whats the point of that purchase button if this is not even an interactive design. And also curious why people think flat is a design to be as simple as possible.

A [purchase now] button, because thread designs mostly are linked to a site like Paylvy, where you can purchase it.

Also, people can edit the design to what they like.

DragonTTK - July 10, 2015, 8:06 am
