Thread: [Will resolve your cloudflare sites.](#)

?ULL - March 15, 2015, 3:47 am

I have recently discovered a couple methods to resolve cloudflare protected websites and i want to put them to the test. Go ahead and post the site or PM me and i will resolve it for you. My goal here is to see how reliable this method is, Please dont troll this post with large sites like Leageoflegends.com or any other cloudflare protected "Giant".

Thanks.

wethecom - March 15, 2015, 8:12 am

if by resolve you mean get the actual site behind cloudflare there is a default setting in cloudflare that lets you do this as a user...
direct.sitename.com

c??? - March 15, 2015, 8:37 pm

playboon.co <--- Thanks in advance!

direct.sitename.com

No he means getting the sites IP which can be used to send packets lol

Lykos Thrylos - March 15, 2015, 11:05 pm

Hey I sent you a PM thanks for the service.

mafialeader - March 16, 2015, 12:39 am

Hey Buddy, I can't PM you now. Can you please send it to me .Thanks In Advace.

matt - March 16, 2015, 12:41 am

I assume it's a private niche, he's not giving it away he's testing it for other people.

Hopefully if this works you could sell a cloudflare resolver, and API. ;)

Bobbo - March 16, 2015, 10:54 am

How about fakethebitch.com?

Thanks!

Nachfolger - March 16, 2015, 10:57 am

unviewed.net

Go for it. It's my personal site.

IMxSOxCOOL - March 16, 2015, 2:28 pm

<http://fagbooter.net>

yo man I really need this shit cause I got ratted and someone from cali signed into my shit and they said I was sharing accounts and I paid 50 for the login so im just gona down there shit so if you are able I would like the ip to there.

tyxik - March 16, 2015, 2:32 pm

<http://www.btc.com>

can u resolve this for me?

?ULL - March 16, 2015, 3:39 pm

I have PM'd most of you, some of the sites could not be resolved.

I have come to the conclusion that this method can work well along with the other methods that are used as a "Second attempt" to resolve cloudflare. The first two sites i tried on my own time were both able to be resolved flawlessly by this method, although i think the owner of VHF doesn't know what the hell she is doing.

Anyway, i think i will be making an API as Midnight has suggested, PM me m8, i have some questions for you.

Sorry, a couple problems.

- 1.) This isnt protected by cloudflare.
- 2.) This would be considered a "Giant".

Some interesting things though, it was once hosted on host gator and bluehost :P

wich is the site....like i said.

default setting in cloudflare has an adress to get to the actual site bypassing it
also there are may other methods of getting the ip if you just look at cloudflares setting..another method by default <ftp.site.com> will get the actual site bypassing cloudflare

"We added a FTP subdomain for you that does not pass through the CloudFlare network. If in the past you FTPed directly to site.org, now you should FTP to <ftp.site.org>. You can change the default name of the subdomain to something other than ftp for enhanced security."

SSCARL24 - March 17, 2015, 7:31 am

ugbase.eu

Try this. The owner brags that his website can never be resolved.

Vanesh - March 17, 2015, 7:36 am

I have some target that you maybe could help me to get the real IP, pming you as soon I can.

Thank you for this service.

Yes i am aware that normal cloudflare resolvers use these methods, the methods im using go a completely different route.

Well he should quit bragging then, i just resolved him. PM'ing you now.

Melty - March 17, 2015, 4:05 pm

I have a site that no one has ever been able to resolve the backend IP, PMing you the site now.

?ULL - March 17, 2015, 4:34 pm

Unfortunately the site was not resolved lol, thanks for trying though. ?

Kasra - March 17, 2015, 4:45 pm

Vouch for OP, his method worked on the site I needed :)

?ULL - March 17, 2015, 5:07 pm

Your welcome Kasra, i have began working on an API for my cloudflare resolver.

ItsFluffy - March 17, 2015, 7:08 pm

is this like a simple api that can be integrated to a site?

?ULL - March 17, 2015, 7:17 pm

(Mar 17, 2015 07:08 PM)ItsFluffy Wrote: [\[CITE\]](#) is this like a simple api that can be integrated to a site?

Yes, when finished i will give a handful of lifetime's out, but after that it will be a cheap monthly subscription.

ItsFluffy - March 17, 2015, 9:19 pm

ok, keep me in mind for pm for lifetime?

making new stresser and would love to use it

Snapbytes - March 17, 2015, 9:23 pm

crimeflare.com/cfs.html <-- i use this all the time to resolve cloudflared websites.

?ULL - March 21, 2015, 11:05 pm

Im still testing this method, API is almost finished.

Autocorrect - March 21, 2015, 11:16 pm

Holy fuck! This user just resolved a kid's Cloudflare protection right down to the IP that's hosting the site, which looks to be a home server. ?

I'm very impressed. This is legit! I'm messaging the kid to confirm the address but I know that it's his city because he lives in the same state as I do.

?ULL - March 22, 2015, 5:07 pm
