What's the material like

It's a very hard flexible plastic, similar to if you were to put 3 + credit cards together and try to bend it

(Mar 23, 2015 05:02 PM)?Fish Wrote: [\[CITE\]](#) Is it hard plastic? Soft so I can bend it and twist it? What's the material like

It cannot twist like who soup said its like getting 3 credit cards and bending it, but it will keep your phones safe that's for sure! it's plastic yes, and its kind of hard to bend it but it can bend. :)

That may be true, but Androids are ugly af. At the end of the day, it's all about appearance, no one cares about specs. Said every 13 year old girl ever.

technically we can print anything including Android cases but we are very limited on the specs for an android. I currently have all of the iPhone generations so I know the exact fit of each case. Message me what case you have and maybe we can get you printed!
