Some of the cheapest hits around still. To compare to others, our base model equates to 9k Hitleap hits for \$0.50!

Or even 20k Othits for \$0.50!

Otohits is really freaking fast, so I don't think you'd need more spots there.

Hitleap has rush delivery options for each spot. Twenty percent more per slot.

Akame - April 11, 2015, 1:07 pm

Sadly, they are not. There's almost a 100% chance Hitleap will be detected, and a high chance otohits will be detected.
