Thread: [Common C++ Mistakes You Need to Avoid](#)

Warren Buffett - March 17, 2015, 7:56 pm

Here are a few mistakes programmers make. Some can be dangerous as a compiler won't detect them.

Give this a read.

<http://www.learncpp.com/cpp-programming/eight-c-programming-mistakes-the-compiler-wont-catch/>

Also, yes I know the learncpp tutorial online has biased views towards how they teach but the link above shouldn't really matter.

I find this to be very true. Thanks for sharing mate.

lilmarty10 - March 18, 2015, 12:19 pm

These seem like common sense that any C++ programmer should know. Thanks for the share regardless, keep it up. ?

I kind of thought the same thing and I'm no expert on C/C++. A lot of this is basic syntax and type conversion that applies to any modern language.

One stupid mistake that makes me cringe for hours is the division operator.

I tend to mistake it for \ at times.
