Thread: [DDoS Host Booter without waiting for server](#)

gethacked1 - March 18, 2015, 11:45 am

Hi im new here and i didn't know what category to post this in, sorry.

I recently purchased a host booter for one month and it works great and hits hard, usually hits most people that i try to hit on xbox live but some people just have strong connections i guess and can't be hit.

My problem is that you have to wait until a server is free until you can boot which is annoying because some people boot for like 3000 seconds at a time, and my games are over before a server is even free so i can't boot.

I am wondering if there are any good booters out there that dont require you to wait for a free server before you can boot and you can boot whenever you want but is also very strong and hits them off every time. By the way i am willing to pay.

I guess you're using grimbooter? Use some other stresser from the marketplace, probably none of them will wait for a free server.

gethacked1 - March 18, 2015, 12:09 pm

can you recommend me a good one that will hit people offline every time?

Syracusia - March 18, 2015, 12:10 pm

Hello sir my recommendation to use it to create your own stresser using a free and advanced service such as <http://novalytech.com> to create your own APIs easily.

I have never communicated with you in my life, also I have never scammed.

BTW you are 100% a multiaccount, but luckily for you I don't have time to waste the mods time.

Thank's for buying l33t though I guess. ?

Alpis - March 18, 2015, 11:57 pm

Buy a cheap stresser, you don't need much power to down a HC at all. Theres cheap stressers, 1\$ or so ?

gethacked1 - March 20, 2015, 9:53 am

like which ones, most of the ones i see on the marketplace booters are website based in the same style of the one i have right now

which booters have you guys had in the past or have and have good experiences with that fit my requirements above

KoOp - March 20, 2015, 10:24 am

like which ones most of the ones i see on the marketplace booters the base
