Thread: [EdX.org course completion services, get certificates from Harvard, MIT, Berkeley](#)

Sunsetblvd - March 18, 2015, 2:23 pm

Hello HF Friends!

New service is now available exclusively on HackForums.net

We offer a Full completion with a passing grade and certificate to specific edX courses of your choice. Get certificates from

Harvard, MIT, Berkeley Cornell and other prestigious universities!

With our help you will complete the course and receive a certificate without the need of passing hard exams

and spending many weeks on learning and preparations, not to mention paying high tuition fees if you wanted to enroll

in the university as a regular student.

[img]http://sonamdawa.webwalker.to/wp-content/uploads/2012/08/edx.jpg[/img]

Some of the topics include biology, business, chemistry, computer science, economics, finance, electronics, engineering, food and nutrition, history, humanities, law, literature, math, medicine, music, philosophy, physics, science, statistics and more.

EdX is created by founding partners Harvard and MIT.

edx.org is a site that let's you take college courses from the world most prestigious colleges for free.

After completion with a passing grade you receive a certificate from that school.

Boost your resume or use the certificate in helping you to get in the college of you choice!

Some advantages of having certificate from Edx.org:

Grades in college prep courses, such as Advanced Placement®, are among the most important factors in college admissions.

To help students succeed in high school and get ready for college, edX offers more than 40 high school courses from top universities.

Advance your career. Stand out in your field. Learn the latest on topics of critical importance such as innovation, energy, medicine and cyber security from professors at the best institutions in the world, including MIT Sloan School of Management, Rice University and Delft University of Technology.

More Information:

<https://www.edx.org/about/student-faq>

.

.

How it works: IMPORTANT STEPS

1. Create an edX account here www.edx.org

2. Steps to enroll in course of your choice (except archived courses - after completing them you get no certificate)

A

B

C

D

3. Contact us and we will check if we can complete the course for you (not all the courses are within our reach)

4. Give us your login credentials and we will complete the course with a passing grade for you within 3-7 days.

5. We will complete the course for you with a passing grade. After the course completion you'll wait patiently for your certificate. Most courses issue certificates one or two weeks after the course closes.

Pricing

The Price range for the course completion service is \$30-120. Since every course is different prices depend on the course's complexity, length, the relevance of the course and the prestige of the school. Payments are accepted by PayPal.

To place an order contact via forum PM

Refunds

If we won't be able to complete your course with a passing grade you will receive a full refund!

Reviews

Reviews on course topic: [Introduction to Linux](#) will be available to 10 members. If interested in a review please post in the thread.

FAQ

All general information about EDX courses can be found here:

<https://www.edx.org/about/student-faq>

Q: Will I get a real certificate issued by participating university or get a fake copy created in photoshop?

A: The certificates are 100% real and are issued by participating universities like MIT or Harvard. We only pass the course for you, so you can receive the certificate.

Q: I get the certificate but won't have any idea what the course was about, so how can this help me?

A: Besides the certificate you will have a full unlimited access to your course online, anytime you can go through all the problems and exams at your own pace and get the idea what the course was about.

Q: What are the advantages of having such a certificate?

A: Unlike other online course applications, when you complete a course through EdX, you receive a certificate

that includes the name of the University sponsoring the course. Earning a certificate from HarvardX or

MITx or BerkeleyX gives you more credibility, than having just taken a course through a random online application,

even if the courses are taught by the same professors. So besides boosting your resume and helping you in getting

into the college of your choice it sets the path for your future career. Here are some shared success stories

by edx students: <http://edxstories.tumblr.com/>

Special Bonus!

For a limited time You will get [Introduction to Linux](#) course for free, with any other course completion service!

Do you offer certificates for cima? its an accountancy qualification.

Comedic - March 18, 2015, 3:44 pm

The good thing about edX is that it provides courses straight from Harvard, unlike Coursera. I just don't like edX's big ass logo on the certificate though. Nevertheless, nice service mate!

Unfortunately Edx.org doesn't offer any accounting courses at the moment.

We will do our best. Thank You!

Chickendipper - March 26, 2015, 10:28 am

I vouch for this service.

I got 97% in the Introduction to Linux course:

The pass was a 70% - so I passed with flying colours. Soon I will get my certificate.

Thank you for the service, will come back soon :)

Vintar - March 26, 2015, 12:36 pm

Looks like a really good unique service good luck with the service, I may be interested later :)

Sunsetblvd - April 4, 2015, 12:01 pm

@Chickendipper

thanks for taking your time to review our service, we hope to work with you in the future.
