How to acquire OMC step by step on [Bittrex.com](#)

We previously had a great tutorial by [Optimized How to acquire Omnicoin - Noob Friendly - Step by Step! - With Pictures! \[ALLCRYPT\]](#) on how to use Allcrypt but since we have moved on Bittrex I feel like we need a new one.

What do you need?

- A bitcoin wallet with a few BTC on it
- An email address
- And of course internet access ?

How to register an account on Bittrex?

You need to go on [bittrex.com](#)

At the top-right corner you can see "Register" that's where you want to go ^^

You will be redirected to this page where you just have to put your email address and choose a password for your account:

You will soon receive an email of confirmation. Just click on the provided link in your email and your account is ready ?

How to add BTC on your bittrex wallet?

Once you are logged go to your bittrex wallet (top-right corner again) to see this page:

Click the  at the left of Bitcoin.
Something new appear:

Now click on "New Address" and your deposit address will be generated !

Simply use your Bitcoin wallet to send some BTC to this address and after a few network confirmation they will be available to use.

Now how to buy some Omnicoin?

Click on "Market" at the top left corner and enter OMC in the search field:

Click on "OMC" to access the trading page:

For buying OMC you need to fill in the "Buy OMC" fields (top left square) and take a look at the sell orders (bottom right square):

You can either choose to buy the OMC available at the lowest price or set up your own price and wait till someone decide to sell his/her OMC at your rate

How to withdraw?

At this time I suppose you already have bought the OMC you need...

Return in your Bittrex wallet and click the  at the left of Omnicoin. You will see this:

Simply enter the address where you want to send your coin and of course the amount of coin. Then click "Withdrawal" you will receive an email at your registration address with a link to confirm the transaction.

Final word...

I hope this tutorial will help some people with our new exchange platform so our coin will continue to grow in price and expand its user base.

Credits:

All of the Omnicoin team for their great work:

While anyone that's used exchanges before can easily figure it out, it's awesome of you for getting a tutorial up for less savvy users so quickly.

For someone who is remarkably lazy like myself, this post really helped as i didn't even have to think about the process.

If you've used exchanges before and needed this, you're remarkably lazy. ?

Thanks for making this. I know there's a lot of users on HF who are new to cryptos so educating them on how to use this exchange is very useful.

BTB™ - October 29, 2015, 9:46 am

Have asked this on PM to Mesh too. He is offline and I am getting a bit anxious. So will ask here too....

I followed the tutorial and it says - "For buying OMC you need to fill in the "Buy OMC" fields (top left square) and take a look at the sell orders (bottom right square)."

However, below is what I see in the Sell Orders -

[img]http://s29.postimg.org/if2zth93r/Untitled.png[/img]

Can you guys please explain me what these lines say that are marked in RED.

I mean, Why such huge variance in "Size (omc)"? Almost same BTC and such a huge variance in OMC?

Am I missing something, please help.

-snip-

ASK: How much BTC he wants per 1 OMC

SIZE: How much OMC he's selling in total

TOTAL: For how much BTC you can buy all of his OMC (ASK*SIZE)

SUM: Total if you're buying all of his OMC

BTB™ - October 29, 2015, 4:55 pm

So according to that it is always beneficial to pick the first row. That would be the lowest demand. Right?

Yes, thats right

Phreakdaline - October 30, 2015, 3:16 pm

Didn't read it all, but very useful for people just starting to exchange. Good work man, I'm sure this'll save a few people the hassle of figuring it out.

Who Soup - October 30, 2015, 9:57 pm

Very nice contribution to the OMC section ?
