Uhm, it's the same fucking thing. ?

It's all legal given it provides nothing sensitive (passwords, CC's, SSN's, etc.) and it was all publicly available before...which, by the way--it is.

Dox = Legal

Releasing the Dox = Illegal

Ddos = Illegal.

Authorities don't give a shit about anyone doing any of these things.

Threatening to "kick someones teeth in" = illegal

Authorities do give a shit about threats like this, especially because the kid is a minor.
