[My site is working pretty well now so i thought it'd make an official thread about it!](#)

- [Spoiler \(Click to View\)](#)

The site shows a live updating OmniCoin value with a preev-like calculating interface.

We currently support:

OMC -> USD

OMC -> BTC

OMC -> GBP

OMC -> EUR

OMC -> CAD

OMC -> AUD

I'm looking for a logo if anyone fancys making one for me!

Just updated a little bit of the backend php to make the site a little faster at loading. OMC to BTC updates every 60 seconds and conversion rates of fiat currencies update every page refresh.

Just did a little update on this, ironing out problems and beefing up the server due to high load.

**Understalker** - May 17, 2015, 12:34 pm

Thank you .Matt for your high quality website.

**Krew** - May 17, 2015, 12:35 pm
