Purpose

Code Elusive was originally created by Th3PonyWizard to host a friendly meeting between those who are skillful in the arts of exploitation, programming and generic creative technical thinking. We aren't interested in your "Quailty", Post count, Usergroup or Rep. We only value what sparks you and the core foundations of the things that make you be completely outstanding among those that are here to waste time and online bandwidth. We don't "strive", we have no goals, no needs, no common criteria other than our skill. We only have a single pure interest in mind and that is to become better at what we do. And we help each-other get it.

Member Interest

Code We are looking for security/programming enthusiasts, with an emphasize for experience and an extreme tendency to question what is "right" and test what is "limit".

We also posses extremely limited amounts of spots for beginners with an extremely high expectation course and a through interview.

Member benefits

Free IRC server OP privs

Free onshore VPN & SSH (You clean after yourself)

Access to priv8 material

Knowledge. Help. Support. Companionship.

Application ([PM](#) / Skype[niki-k1ng79])

Quote:name:

brief description of what you do best:

programming langugaes I know:

you've worked on (Not required):

Skype(If you have):

*Keep it minimal. I don't give a shit about any life details aside skill.

*You are going to be tested, measured, accounted and reviewed.

You're automatically disqualified if I ever happen to see the following words in your application:

Quote:botnet, DoS, RAT, ewhore, DOX, booter, keylogger, stealer, amp, putty, business, kali, backtrack, crypting, spreading, SentryMBA, cracking, deface, stresser, resolver, marketing, SST, VB.NET, SE, proxy lists, configs

Disparity - March 22, 2015, 4:34 pm

name: Disparity

brief description of what you do best: Learning and improving my current skills which resolve around Website Hacking and Security.

programming languages I know: None fluently. I have studied a fair amount of PHP and HTML, along with some Java and Javascript.

you've worked on (Not required): Various projects unrelated to the group.

Do you prefer Skype or IRC (Personal preference): IRC

Skype(If you have): N/A

Note: By no means am I skilled. Though I am probably more skilled than many members of this site, by anyone who actually knows something about my field's standards I would be considered a beginner. However, let me tell you now, I'm a determined one, and I sure as hell will prove it.

Th3PonyWizard - March 22, 2015, 4:59 pm

(Mar 22, 2015 04:15 PM)+One Wrote: [\[CITE\]](#) name: Amixony

brief description of what you do best: I'm an intelligent person who thinks logically, I love doing mathematics, also bringing me into starting with programming, in general I'm a chill guy.

programming languages I know: html/css/php/myself, javascript

you've worked on (Not required): netflixdispenser.com, and some other various projects.

Do you prefer Skype or IRC (Personal preference):

Skype(If you have): Skype. Sorry.

King Cin - March 23, 2015, 7:57 am

Ah, the memories.

Having worked with Pony before, let me tell all of you not to apply unless you're actually decent.

Th3PonyWizard - March 23, 2015, 9:08 am

(Mar 23, 2015 07:52 AM)S4mick Wrote: [\[CITE\]](#) name:S4mick

brief description of what you do best: i'm a dood that study security related stuff.. interested in networking, cryptography.

programming languages I know: Java,python,c,php .. (and web related stuff..javascript,html,CMS)

you've worked on (Not required): python rat\botnet..(bots commanded from remote site), workin on

a php shell

Do you prefer Skype or IRC (Personal preference): i use both..

Skype(If you have): s4_mick

we already met for xss.. top kekl will test you on Skype.

(Mar 23, 2015 07:57 AM)Cinnamonster Wrote: [\[CITE\]](#) Ah, the memories.

Having worked with Pony before, let me tell all of you not to apply unless you're actually decent. You're an old friend, did I remove you by any chance from my contacts?

King Cin - March 23, 2015, 10:34 am

(Mar 23, 2015 09:08 AM)Th3PonyWizard Wrote: [\[CITE\]](#) You're an old friend, did I remove you by any chance from my contacts?

Possibly. I haven't been active on the internet at all lately, so I don't know ATM.

0Boy - March 23, 2015, 10:49 am

name: Oboy

brief description of what you do best: I'm a Coding Junkie, Security enthusiast interested in Malware and Networking

programming languages I know: Assembly, C, Mastered Python, Learning C# lately

you've worked on (Not required): Automation Bots, Cracking/Brute forcing, Scanning frameworks

Do you prefer Skype or IRC (Personal preference): Both

Skype(If you have): I'll pm you if i get accepted

Th3PonyWizard - March 23, 2015, 12:20 pm

ShinySLM - March 23, 2015, 1:30 pm

(Mar 22, 2015 12:45 PM)Th3PonyWizard Wrote: [\[CITE\]](#) I just made this shit up. Don't diss me for the group name, I'm horrible at names. Look at my fucking username.

purpose and content:

I'm making a little chat because I want to meet more people that are good at this website. Regulars, leets, ubers, I don't give a fuck, I just need more knowledgeable people so I can properly collaborate on projects and generally produce stuff that isn't simply "HQ" (Fuck you HF standards), but well-thought, researched, and innovative. As for anything else: there could be a lot of money in this.

looking for:

We are looking for intermediate security/programming enthusiasts, with an emphasize for experience and an extreme tendency to question what is "right" and test what is "limit".

we can also make an exception for determined beginners. I promise you we won't find any.

While I personally prefer security enthusiasts, I also welcome programmers that aren't into it completely - all kinds and languages. Only that if you use VB.NET primarily you're automatically out.

application. keep it minimal, I promise you I'll thoroughly test you anyway.

PM/Post here/ add me to skype niki-k1ng79

I want to know if there's a a point setting up an IRC server, I personally love Skype and I want to use it as this group's way of talking

You're automatically disqualified if I ever happen to see the following words in your application:

And this is another reason why I withdrew my application, you seem arrogant.

The term "security activist"? Don't get me started...

I agree, if you are working or playing seriously in the security field then you need a firm basis of programming knowledge. I do work in the field, but most of my coding these days is bash and python scripts to speed up laborious tasks. You asked for intermediate skill level in security / programming - to me that means people with hacking and/or programming skills.

Th3PonyWizard - March 28, 2015, 3:11 am

Quote:And this is another reason why I withdrew my application, you seem arrogant. :)

Quote:The term "security activist"? Don't get me started... Yes. Lets get you started. Security activist - Somebody that is active within the security activists.

Quote:to me that means people with hacking and/or programming skills. If you're GOOD, I will take you regardless. I'm looking for GOOD people, those that innovate, those that have their own ways of performing actions that can leave me dazzled cuz I ain't getting that shit the first time I'm seeing it. That's the sort of people I'm looking for

Benign - March 28, 2015, 3:19 am

So its gone from being a group of intellectual programmers / hackers to chat with to you looking for security activists who can perform actions that leave you dazzled?

Why exactly are you looking for these people?

And no, I'm not going to go into how ridiculous a term "security activist" is. You may as well say hacktivist which makes me cringe. If you're looking for like minded people, they don't need to be activists, do they? :)

But anyway, I don't want to interrupt your recruitment thread, good luck with the group, have fun.

Th3PonyWizard - March 28, 2015, 3:25 am

(Mar 28, 2015 03:19 AM)Benign Wrote: [\[CITE\]](#) So its gone from being a group of intellectual programmers / hackers to chat with to you looking for security activists who can perform actions that leave you dazzled?

Quote:So its gone from being a group of intellectual programmers / hackers to chat with to you looking for security activists who can perform actions that leave you dazzled? intellectual progarmmers / hackers = impress me, those with intellect are either good or learn quick to get good

Quote:Why exactly are you looking for these people? that does not concern you

Quote:And no, I'm not going to go into how ridiculous a term "security activist" is. You may as well say hacktivist which makes me cringe. If you're looking for like minded people, they don't need to be activists, do they? :) no

Benign - March 28, 2015, 3:32 am

Haha no it does not concern me you're right.

One L?ve - March 28, 2015, 3:42 am

These responses are very interesting to read.

hahdbwoannniabs - March 28, 2015, 8:01 am

Basically what he's saying is that if you don't know at least one language that's actually relevant to hacking, you probably suck. How are you going to audit web applications if you don't know PHP? How are you going to audit machine software if you don't know C or C++? How are you going to develop exploits if you don't know any languages to craft one in?

If you're calling yourself a hacker and don't know any programming/coding languages (excluding irrelevant languages like HTML and CSS) then you aren't a hacker.

Benign - March 28, 2015, 10:08 am

What if your area of expertise lies in attacking Cisco network switches and uploading hacked configs? Or social engineering, or lock picking, or creating custom network packets to target SCADA connected devices? None of these require prior knowledge of programming to be the best in the world at, but would you stand in front of an expert of one of those fields and say "your not a hacker"?

You can be an expert hacker and not be a good programmer, just look at some of the most famous hackers...

But like the guy said, it doesn't concern me, but don't try to defend a closed minded point of view.

ICE ? - March 28, 2015, 10:12 am

name: nate

brief description of what you do best: i am excellent at marketing, most programming/designing, + more

programming languages I know: mostly all web based languages (html, php, css, js, etc...), java, C#

you've worked on (Not required): many stressers, resolvers/OG and stat sales website, web hosting website (if you would like links for this and proof that i own all of them, please pm me, I own a stresser, resolver, and a web host with the BEST ddos protection atm, lmk for link)

Do you prefer Skype or IRC (Personal preference): Skype is so much easier for me, it's just really easy to use and everyone has it

Skype(if you have): pm for skype ;) (don't want tons of ppl adding)

Th3PonyWizard - March 28, 2015, 10:14 am

programming languaes I know: None fluently. I have studied a fair amount of PHP and HTML, along with some Java and Javascript.

you've worked on (Not required): Various projects unrelated to the group.

Do you prefer Skype or IRC (Personal preference): IRC

Skype(If you have): N/A

Note: By no means am I skilled. Though I am probably more skilled than many members of this site, by anyone who actually knows something about my field's standards I would be considered a beginner. However, let me tell you now, I'm a determined one, and I sure as hell will prove it.Added as a beginner after IRC interview.

FractumSeraph - March 29, 2015, 3:35 pm

Name:

Fallen Archangel, Dakota if you prefer to be personal.

What I do best:

Pentesting has always been my strong point. I also like to teach things I've learned.

Programming languages I know:

Java, although I will admit that I'm not very good at it, the only reason I know it is because my university requires it for the security degree.

I've worked on:

Improving many networks around my hometown.

I've also taught lots of security related things, both online as well as in person at a few events.

IRC has its uses, but I prefer Skype.

I'll PM you my Skype since I'd rather not have it this public.

How bout using your brain - April 8, 2015, 1:43 am

(Apr 7, 2015 07:42 PM)D?V?? Wrote: [\[CITE\]](#) I am driven by money.

I'm pretty sure you are the kind of people pony doesn't wanna hang out with lol

Money is not everything my friend and if your only motivation in life is money, I feel a bit sorry for you :/ to each his own i guess

Benign - April 8, 2015, 2:22 am

OP did mention the opportunity to make big money. And being driven by money is not the same as money being everything. And I agree with the statement about groups sounding all ambitious and amazing and ending up doing sweet FA.

But saying that, I normally agree with most things you say Mr. Root alot sir so blah

How bout using your brain - April 8, 2015, 2:47 am

(Apr 8, 2015 02:22 AM)Benign Wrote: [\[CITE\]](#) And being driven by money is not the same as money being everything.

I just don't think money is a good reason for "being driven". I rather would like to do something I like and believe in than just always try to make money, money, money. There is no joy in that, and it pretty much shows you have no principles. If you have nothing else that drives you, how can you ever do something good? You will do whatever makes more money, not what you believe in or what is right. HF is a good example for this, just look at all the garbage that is being sold here. Anyway, we should not take this too far offtopic lol

Th3PonyWizard - April 8, 2015, 3:01 am

(Apr 7, 2015 07:42 PM)D?V?? Wrote: [\[CITE\]](#) I've joined tons of these 'groups'. It usually ends with everyone saying 'Let's make a booter guys!'. Its around that time that I quietly slip away from the "elite HF coders".

I'm working on my bachelors of computer science at a University in Canada. Unlike my peers who try to pass the class and get their degree, I am at university solely for the purpose of making connections with like-minded programmers and geeks. Refreshing myself on the foundations and basics of programming in a COMP 101 or 102 class is alright but I need something more.

I have no lack of skill when it comes to creating whatever I want.

The question is never, "Can I make it?" but rather "Do I really want to make it?".

I am driven by money. I believe money is an accurate way to measure financial success in life. Being geared towards computers from a young age has played a key role in my ability to make money.

Right now I am in the process of making something big. It is a website that I believe will go far; Not just because of my ability to create, but because of my relentless motivation to achieve success.

I prefer Skype because it is easy to use and nothing I am doing or plan on doing is illegal.

When attempting to make money for school e-whoring awhile back I was able to leverage my skill in programming to generate intense \$1,000+ profits daily.

After making enough money for a nice PC setup and pay for school I decided to stop with the 'methods' and start a real business.

Yes, I read your thread and saw the format you want this 'application' in. No, I am not applying for any sort of partnership with the skids on HF.

I know there are people out there on HF like me. I want to find you! I want to help you and I want you to help me. I don't care how young you all are. If you have a passion for creation that keeps you awake at night I need you as a skype contact.

If you think I am HQ enough add me in the group. I'd love to help out some of the less experienced

coders on here and get opinions on some higher-level shit too.

Thanks for reading,

D?V??Denied. I'll reconsider when you'll use my application form. It's not a way to limit your freedom of expression, it's for me to skip past the bullshit and just see what you can do. Here, I was forced to read a lot of stuff I didn't want to and as a result already annoyed me.

Also I don't give two shits about your drive. I literally only care about your skills and I'm not seeing enough mentioning of them here anyways.

"help some of the less experienced coders" my ass. We're working on a multi-layer series of challenges already and the only problem we're facing is that we have too many members and not enough work to give them. We're way past that, and I make sure that's not a problem with actual intensive interviews and how I filter members.

Quote:I've joined tons of these 'groups'. It usually ends with everyone saying 'Let's make a booter guys!'. Its around that time that I quietly slip away from the "elite HF coders". It will be really interesting if I'll do something THAT IS IN MY BLACKLISTED LIST

Quote:If you think I am HQ enough add me in the group do a 180 to the front page and read the introduction for the group. I don't "THINK" you're HQ, I put my thoughts in the shitter when it comes to recruits. What goes on in my mind is absolutely irrelevant to the process of being accepted. What your brain contains is the only criteria this group will ever have. I couldn't give less of a fuck about how much an "HQ" member is. Most of my group are regulars anyway.

I'd consider myself decently skilled in crypto as compared to the rest of the forum. Can I make a math paper out of it and describe a new way of decreasing the half time for a hash? No. Can I break and create ciphers, crack cryptoware, and make new concepts? Yep.

<https://hackforums.net/showthread.php?tid=4462424>

I would thinking getting into crypto requires huge amounts of dedication to be able to wrap your head around different concepts and so it should be because it has great potential as an effective tool for most applications in combination with any field of hacking. I see you've attempted to create your own cipher and I hope it goes well - I'm sure you're aware of the golden rule of crypto.

Zapchast - August 26, 2015, 3:55 pm

name: Zapchast

brief description of what you do best: My main area is low level exploitation. Stack based buffer overflow, heap overflow, integer overflow/underflow (to stack overflow allowing arbitrary command execution), off-by-one, format string expl., understanding a different types of protections such as ASLR, NX bit, RELRO, SSP etc.. concepts of different methods, how to circumvent them (ret2libc, ret2plt, ROP, GOT overwrite..), Fair enough overview when it comes to web application security.

programming languaes I know: C, Ruby, a bit of Python, bash, x86 ASM

you've worked on (Not required): I can send something, if needed.

Skype(If you have): Nope. XMPP only.

Th3PonyWizard - August 27, 2015, 12:04 am

I've received enough for now

Th3PonyWizard - September 5, 2015, 2:32 pm

Opening again. Looking for 1 new member and 1 new student.

Hinch - September 5, 2015, 2:38 pm

can i join as a student thank in advanced

Septunx - September 5, 2015, 2:49 pm

name:Septunx

brief description of what you do best: Most probably Websire creation
programming langugaes I know:HTML ,CSS , learning JS and Python(want to pursue python in more detail)

you've worked on (Not required): Offered a free website creation service for as few HF users

Skype(If you have):I'll pm if i get accepted

Th3PonyWizard - September 5, 2015, 2:53 pm

JohnHolsten - September 5, 2015, 6:38 pm

name: JohnHolsten

brief description of what you do best: I personally chill out planing on setting up a IRC botnet im not a proffessional and i dont think anyone here can really call themselves a pro but besides coming up with spreading methods that work on paper but not in real world not much at all.

programming languages I know: None fluently. ive always wanted to know how to code but haven't got the time due to my high school not letting me have the spear time recently.

you've worked on (Not required): IRC botnet and small out of hackforums blackhat group.

Do you prefer Skype or IRC (Personal preference): BOTH i dont care.

Skype(If you have): N/A

sunrix - September 5, 2015, 8:43 pm

Student Application

Name: Sunrix

Brief description of what you do best: Extreme interest in Low-Level Exploitation(Still at the extreme basics but burning desire to learn.)

Programming Languages I Know: C (finished the basics)

You've worked on: (2 extremely basic projects).

Skype Or IRC: (I don't have both but Im using XMPP.)

Thank you for your time.

(Mar 22, 2015 12:45 PM)Th3PonyWizard Wrote: [\[CITE\]](#) You're automatically disqualified if I ever happen to see the following words in your application:

Quote:DoS, RAT, ewhore, DOX, booter, keylogger, stealer, amp, putty, business, kali, backtrack, crypting, spreading, SentryMBA, cracking, deface, stresser, resolver, marketing, SST, VB.NET, SE, proxy lists, configs
Though botnet wasn't added. I'll add it to skid-shit now.
