I don't really care what crypter you use ... UD is good.

I won't scan with virus total ,etc...

If you can crypt something for me please PM me or you can post here. njRat

Why don't you just download a free crypter like AegisCrypter and save yourself some time? Thats what I use for my nJRat.

dont use free or public crypters they will never stay fud for long and you will just lose clients because of this , if you want a real crypt that will last pm me or drop skype
