Thread: [Activating a Burner Phone](#)

Lava Lamp - March 24, 2015, 1:01 pm

So I want to activate a shady burner phone from walmart. Whose phone do I call from? A public phone booth (will this even work)? Pay an internet kid \$5? Anyone?

Toph - March 24, 2015, 1:10 pm

Your stuff on cheggg is still available ?

Your PM is full

Backwoods - March 24, 2015, 1:22 pm

OP is drug dealer. Stay away at all costs. Pls don't get caught lackin'

Wtf?????

You buy phone.

You buy pre paid service plan of your choice.

Call number on the card on the phone you just bought.

Listen to the nice Vietnamese person who struggles to help you activate your new drug dealing telecommunication device.

Profit?!?!?!?!?

Stop. You're wrong. You call from a third party phone.

If it needed a ssn do you think drug dealers would use them? Common sense.

Nope. Just a third party phone. For obvious reasons I cannot use my own. You can not call with the same phone to activate the phone.

Ok whatever dude idc if your phone is activated.

I've owned over 30 pre paid phones they all where the damn same thing.

You buy phone, buy card, call number on the card from the phone you just bought and set it up with them.

You may need to take off the battery and write down the SSN and the other numbers there I forget what they're called, but even most of the time I never had to do that.

Hell I just bought a boost mobile pre paid Nokia Lumina 625 yesterday, called the card on my phone and it was all automatic from there.

Idk what kind of crappy berner you have, but if you absolutely need to call from a 3rd line, just use Skype through you're wifi.

It's far from complicated. Uneducated drug dealers can set these phones up in 5 minutes.

Lava Lamp - March 24, 2015, 3:18 pm

This isn't even about drugs, for all the dumbfucks -repping me. Anyone paying \$40 for site

upgrades to rep the unranked.... I'm out here fucking your sister while you're being "uber" Imfao. No fucks given.

Dude are you high, I know I am.

Listen, use your vpn and Skype to call and set it up if anonymity is what your looking for...

Uneducated drug dealers can set these phones up in 5 minutes.I never claimed to be, nor am I, doing anything involving drugs. I am not even breaking the law. I'm trying to avoid being traced by someone I'm making a large BTC transaction with.

Well read my post, its the best way without using a pay phone and a voice changer.

Also be careful with sending BTC for people, usually its a scam of some sort.

You don't need to be salty to people giving you advice, and I never mentioned you where a drug dealer so turn down a bit.

They're MAYBE going to have an approximate time they contacted me, and good luck getting an answer from 4chan's maintenance guys.

Activate it online.

It's pretty easy to do with carriers now.
