[TUT] How to fix your VCW [TUT]

About

This tutorial will get your VCW working flawlessly. I tried EVERYTHING on this forum. I tried endless versions of flash, all failed and instantly closed. Chrome would not work, despite any version of flash. Being a web developer, I use my localhost A LOT. Suddenly, working on a project for someone a light bulb went off. Enjoy.

Step 1

Download [XAMPP by clicking here](#) and install it
<https://i.gyazo.com/7e8a8ac66236328e405e74618b37b62d.png>

Step 2

Once XAMPP is installed, run XAMPP Control Panel
<https://i.gyazo.com/7852584abdcce5045217258f29383288.png>

Step 3

Where it says Apache, click Start. Make sure you exit skype before clicking start, skype blocks the port needed for apache and you will get an error. You can reopen skype once apache is started and it will work fine.

<https://i.gyazo.com/f6d0342b4efd7063c04ccf90a60a6580.png>

Step 4

Navigate to C:\xampp\htdocs and delete everything in the folder
<https://i.gyazo.com/37db5601c4704b464ce47765210d1c72.png>

Step 5

Take the VCW you want to use and change it to the girls name and put it in the htdocs folder
<https://i.gyazo.com/8eb3bc2a2bd9a95fcd3bb8047525f64a.png>

Step 6

Open google chrome and navigate to chrome://plugins and disable all versions of flash
<https://i.gyazo.com/6b7413a86361415f199e90362d349cd8.png>

Step 7

Download flash player 10.3.183.18 by clicking [HERE](#) and install it by running the flashplayer10_3r183_18_win.exe with the red flash icon

<https://i.gyazo.com/f98f4fb4db342761f5c41ebb6cebc5e9.png>

Step 8

Open google chrome and navigate to localhost/NAME OF VCW FOLDER
<https://i.gyazo.com/5067c12f891fd56f8a431cca35d4454e.png>

Step 9

Click EasyVCW-v1.51.swf and give it time, it should load by itself

<https://i.gyazo.com/b2b427fc3410fef16c1f7772d8927d97.png>

Step 10

Enjoy

TIPS [\(Click to View\)](#)

1. You can have multiple VCWs in the htdocs folder and basically keep a collection in there. Then to select one, navigate to the URL in chrome accordingly.

localhost/heather

localhost/racheal... etc

2. Always make sure skype or anything that blocks port 80 is closed before trying to start apache or you will get an error.

Don't have anything else, if you have anything to add to the list, feel free to share.

Come on guys no feedback? This is a great tut for a long standing VCW problem... any feedback would be appreciated. ?

Fredo - March 25, 2015, 8:52 am

Vouch for 100%. Got my VCW working and ready to go!

The-Fluffy-Kitty - March 25, 2015, 9:23 am

Hey, thanks ToXiiC. I might take another crack at VCW's today (haven't tried anything with them in a while.) This looks like a well laid out tutorial, it is greatly appreciated. :)

ToXiiC - March 25, 2015, 9:28 am

No problem and thanks for the feedback! And yes, give VCWs one more shot because this works for me when all else failed. ?

H00L - March 25, 2015, 12:44 pm

OMG this is boss! Thanks for this man!

Saynth - March 25, 2015, 1:13 pm

I'm trying this right now, I'll let you know later how it worked for me, thanks a lot in advance

No problem everyone. If you have any troubles with XAMPP or anything, feel free to PM me with your teamviewer!

Rod\$ - March 25, 2015, 1:22 pm

Nice clean tutorial , good layout. Thanks!
