Thread: [Amazon balance reduced?](#)

rubydacherry - March 25, 2015, 6:55 am

Earlier I added a £30 gift card to my account and it was confirmed etc and I just checked it again and there's no record of it? I tried re entering the code and it said it didn't exist

Contact them about it. HF members can do nothing about offsite problems. Sorry if this sounds unhelpful, but it's the truth.

Buba Corelli - March 25, 2015, 6:58 am

If it has been made through eWhoring, then it's possible that user that gave you AGC somehow refunded it, I'm not sure.

Sometimes amazon cancels gift cards, or the bank charged it back. happend to me and the guy said the bank charged it back because they thought his bankaccount got hacked because i bought so much cards and uses paypal so often to people far away because he was like fucking Quagmire and bought so much whorepics :D
