Thread: [Null Consolidated //Recruitment for Programmers](#)

Shanks - March 25, 2015, 2:53 pm

This is only for programmers, and only one or possibly two will be invited.

Application

Code [b]How old are you? (You may leave this blank if you want):[/b]

[b]Which programming language(s) can you?: [/b]

[b]Any certifications:[/b]

[b]Explain about past work[/b]

[b]Rate your Programming skills from 1-10[/b]

The Null team need more programmers, this is limited and will be closed when we found our guy(s)

Affluent - March 25, 2015, 2:55 pm

Which programming language/(s) can you?: html vb.net some c# and python.

Any certifications: A+, CCNA, some pentesting certs

Explain about past work Please PM me for projects I have worked on.

Rate your Programming skills from 1-10 7-8. I feel have great room to advance my skills.

Dex? - March 25, 2015, 2:56 pm

How old are you? (You may leave this blank if you want): old enough

Which programming language(s) can you?: im in an intro to c++ class

Any certifications: certified booty warrior

Explain about past work hello world

Rate your Programming skills from 1-10 6.9

Giommi - March 25, 2015, 3:10 pm

How old are you? : 18

Which programming language(s) can you?: VB.Net

Any certifications: Not in programming.

Explain about past work Secure File Transfer via SFTP to an Offshore VPS (For a company)

Rate your Programming skills from 1-10 8

xSonoro - March 25, 2015, 3:19 pm

How old are you? (You may leave this blank if you want):

-

Which programming language(s) can you?:

C#, VB.NET , C++, PHP, MSIL

Any certifications:

Coded many project for HF guys, pm me if you want to know them.

Explain about past work

I have experience in team-programming and my skill set is quite wide.

Mastered C# as a language mainly.

Rate your Programming skills from 1-10

9 (I don't feel like typing 10, there's always more to learn)

King of Hearts - March 25, 2015, 8:14 pm

Good luck to everyone. I'd love to apply but I'm busy with other things.

Funtage - March 26, 2015, 3:05 am

Coded many project for HF guys, pm me if you want to know them.

Explain about past work

I have experience in team-programming and my skill set is quite wide.

Mastered C# as a language mainly.

Rate your Programming skills from 1-10

9 (I don't feel like typing 10, there's always more to learn)

Can vouch for this - he's been working with me the past few weeks. Very punctual and time efficient

Shanks - March 26, 2015, 11:52 am

xSonoro was accepted. This is still open. web devs needed , but any is free to post

?MrRoot - March 26, 2015, 1:04 pm

How old are you?: 15

Which programming language(s) can you?: All .net langs, PHP, HTML and MYSQL if that counts.

Any certifications: I made projects on HF + Working on a lot + Made websites (mainly apis, some are blogs) + I program tiny programs that I don't publish, they are just for things to clean up or fix something very quickly for someone.

Explain about past work: I made a SkypeBot, basicly a toolbox with a lot of self coded stuff, I'm also working on a rat and another secret project (secret to preven stealing the idea)

Rate your Programming skills from 1-10 Compared to the average hackforumer? 8. To the average developer? 8.

(These things are making me an 8 and not a 10)

-I didn't learn programming at college, just from internet, and like that I tried to learn everything. (-.5)

-I'm not always clean programmer in c#, only if it's shared. (-.5)

-Not so fluent in php. (-.5)

-I still don't know EVERYTHING in my langs. (-.5)

Sakuto - March 26, 2015, 1:54 pm

How old are you? (You may leave this blank if you want): 19

Which programming language(s) can you?: PHP / HTML / CSS / SQL / JS / Java

Any certifications: Coded for many users here, you can check my reputation as a proof

Explain about past work My last project was a fully MVC Framework with a little ORM in PHP, I also created a panel for a botnet as an example for the usages of this framework.

Rate your Programming skills from 1-10 9 in PHP, 6 in Java, 9 in Html, css, js, sql.

Warren Buffett - March 26, 2015, 7:58 pm

How old are you? (You may leave this blank if you want): 23

Which programming language(s) can you?: PHP, C++

Any certifications: Google Open Source Programmer Code-in

Explain about past work Currently own 2 successful startup companies (IRL) and I'm always finding new ways to invent, even if I didn't get paid for it.

Rate your Programming skills from 1-10 9

Anakin™ - March 27, 2015, 6:18 pm

How old are you? (You may leave this blank if you want): 22

Which programming language(s) can you?: C/C++, C#(Win. Forms, WPF, Web Forms, Windows Phone, MVC etc.), Java (Swing, JavaFX, Java Web), VB.NET, PHP, SQL, HTML/CSS, JS(JQ, Angular, Node etc.), Android

Any certifications: OCA Java SE 8, a few of non-programming ones. I'm currently working on becoming a certified Scrum Master

Explain about past work: Coded some stuff for HF members. Was working for a while at as a Java developer on a huge project in a global company. I'm decent at frontend, though I prefer coding backend. I'm familiar with most of programming languages and frameworks. Can provide work examples via PM.

Rate your Programming skills from 1-10: 8. Although I'm a software engineering bachelor, I still think there's plenty of new things to learn and in the near future I'll be trying to focus on iOS development.

Shanks - March 28, 2015, 4:25 am

I feel as we got some good enteries, i will take a deeper look later today. More applications is accepted still

woahxx - March 28, 2015, 6:46 am

How old are you? (You may leave this blank if you want): I'd prefer to leave this blank.

Which programming language(s) can you?: HTML, PHP, C#, VB.NET

Any certifications: I'm quite young, so not yet. But I had a lot of projects and I'm going to start one that I worked on for a while tomorrow.

Explain about past work: HackForums first webbased SMS Spoofer with credit system, supports all countrys, no need to select carrier (just countrycode), etc.

Rate your Programming skills from 1-10: I'd say HTML = 7, PHP=6, VB.NET=9.9, C#= 4.5, Overall: 6½/7

+One - March 28, 2015, 8:31 am

How old are you? (You may leave this blank if you want): 18

Which programming language(s) can you?: vb.net // php // jquery // javascript

Any certifications: Yes, I have been a previous partner with Microsoft, and I have a certificate from Microsoft and I can show proof if wanted. I will not put the info here.

Explain about past work I have done several projects, but I need new ideas, I need to collaborate with new people to help me and I'll help them develop new and amazing things.

Rate your Programming skills from 1-10 9

MrOrang - March 28, 2015, 9:40 am

I doubt you guys need someone who only specializes in Java.

Good luck everyone!

Impulses - March 28, 2015, 7:54 pm

How old are you? (You may leave this blank if you want): --

Which programming language(s) can you?: Java, C#, PHP, MySQL, VB.NET

Any certifications: Coded several projects. Also taking Microsoft Cert. this summer - PM me for more info.

Explain about past work Experience working with teams, and other programmers. Projects have varied, coming from Minecraft plugins to Game Clients, etc.

Rate your Programming skills from 1-10 Probably around an 8.

Marwix - March 29, 2015, 4:18 am

How old are you?:

I am 17 years old.

Which programming language(s) can you?:

- C#
- VB.NET
- Java
- Python

Any certifications:

At the moment I don't have any specific certifications but I am constantly working with Java and .NET development in school. However... I'm very close to receiving my CISCO certificate.

Explain about past work:

As I said above, I am currently working with Java and .NET development in school, creating tools for different purposes. I recently made a schedule program for our school which shows what food it was each day and also the different class schedules. I am willing to show you the program through PM if you're interested, since I don't want to post it here.

I have been working with .NET for a very long time now and I'm pretty sure I got all knowledge stuck in my head. I'm fairly new to Python since I am only programming python scripts on my Raspberry Pi for monitoring different programs and chips. If you want, I could also show you a preview of what I'm currently working with it and what I have created for the past few years and believe me, it's a long hell of a list of projects.

Here you find a few of my threads which are directional to my Programming experience and knowledge:

- <https://hackforums.net/showthread.php?tid=4681341>
- <https://hackforums.net/showthread.php?tid=4592012> <- Take a look at the pictures provided in the thread.
- <https://hackforums.net/showthread.php?tid=4259379>
- <https://hackforums.net/showthread.php?tid=4415997>
- <https://hackforums.net/showthread.php?tid=4403935>

I want you to see that I'm also capable of learning by also getting help from others which I have requested a few times during my time here on HF.

Rate your Programming skills from 1-10

I would say somewhere between 8 and 9.

What will you do if you get accepted?

Well... first off, I could provide a lot of resources and help members who are struggling with their source code.

Second, I am willing to create projects and attend to group discussions.

Thank you for reading my application. ?

- ZayneZ

c x y k - March 29, 2015, 4:33 am

How old are you?: Currently 13, soon 14. Most likely a drawback in your opinion, although I believe it isn't.

Which programming language(s) can you?: I mostly do web development. I'm a fond user of PHP

and use mainly the one backend language, although I have a broad range of knowledge in the web development and design sector; also having limited experience in VBA, C#, C++, and Obj. C. I currently play around with VBA during school, although I'm sure I could get the knack of it. I have experience with Java when it comes to structure and using it - I mainly working with the Bukkit API - however I haven't used Java for any standalone application as such before except from a multi-threaded IRC bot. During the next two years, I will be taking a CS course via the school. The CS course utilizes Python - in which I will learn in a month or two. I also have experience in MySQL, jQuery - not vanilla javascript, although it's not that difficult, HTML and CSS for design and the other languages I noted above.

Any certifications: I don't currently have any certifications although I will be working on them in the future.

Explain about past work: It's highly unlikely that there's any past work that's public that you will find. I usually do private backend work although I do have public work - simple 'less-than-whitehat' work which I won't link. You can feel free to dig through my threads to find some examples of PHP development and I also have a github account - <https://github.com/TaylerKing>. I also have limited repositories that are public on this, too, however.

Rate your Programming skills from 1-10: The term 'programming skills' is too generic to describe in detail. I have a good sense of logic although understanding of a language obviously varies per language. If I were to rate my work in terms of effectiveness, layout and of course general programming, I'd say a solid 7, pushing up to an 8.

Cheers.

Sacred Symmetry - March 29, 2015, 4:37 am

How old are you? (You may leave this blank if you want): 17

Which programming language(s) can you?: JAVA

How old are you? (You may leave this blank if you want): -

Which programming language(s) can you?: C++, Python, Lua, Bits and pieces of Java, C, HTML (not really a programming language, but yeah, I know it).

Any certifications: No formal certifications. However I do have a ton of projects on my hard drive that I made for educational purposes. I am currently working on a RAT.

Explain about past work: PM me to see a full list of my projects. As I said, I am also currently working on a [RAT](#). I made a simple web browser, crypter, video player, proxy server, and much more. I work mostly in Python.

Rate your Programming skills from 1-10: Python: 9 | All else: 7-8

Username: ICE

Age: 17

Gender: Male

Country of Residence: USA

To start this off, I just want to say early on that I know that I am fairly new to hf and I have not done to much to exceed expectations, but I plan to do SO much. I will be doing so much in the near future of my years on hf. Thank you and I hope you enjoy my app. Also, my programming skills are probably a 7/10.

What are your main skills?(elaborate your experience and expertise):

I am extremely experienced with html, SQL, php (Not my favorite, but I know the language very well and use it pretty much all the time), js, css, etc.. I also know java, C#, and somewhat of python. I have owned multiple websites including VPN service websites, resolvers, and stressers. I currently own a web hosting company with some of the best ddos protection, a stresser with about 30-50 gbps per hit, and a resolver with a custom and clean source, I coded all of it fresh (for the links of the sites, just ask). If you need me to elaborate more on these skills, let me know.

What have you done for the community? (show us samples of your work and help towards the community) Or Proud Threads:

I have done multiple giveaways.

<https://hackforums.net/showthread.php?tid=4727185>

<https://hackforums.net/showthread.php?tid=4731855>

+Many more to come, I am going to do many more after my current one is over.

I am going to give out stresser api's and as much as I can to help users with problems and such. I love to help. I will soon be mainly focused in the tech sections soon.

I have also helped users with paypal disputes, like winning chargebacks and such, for instance I had just helped a user, his name was "guy cheap". I helped him with all his concerns and ensured him that he was in favor and we spent a good 45-50 minutes working with Paypal to get things straightened out. I will gladly help anyone with issues with paypal, I am fairly experienced with deal disputes and other similarities involving paypal.

Why is The Null a group of interest to you?:

This group interests me because of all the HQ people in it. There is so many reasons that I want to join. High quality, active, nice, smart, etc...

What are you willing to do for the community within our group?:

I will do as many giveaways as much as I can in the group name. I can create programs and such to benefit us, I will help every user out as much as I can. :) I will be as active as possible and continue to be HQ as well. I am open to helping literally anyone who needs something no matter what it might be, I will be there. I will also be providing free and paid HQ products as well as

programming/website language tutorials. I hope to spread my knowledge of languages/programming and basic knowledge across the group and forum. I plan on having up to 10 posts a day and I plan on doing everything I can for this group.

I hope that you enjoy my application and I look forward to see how this turns out. Have a wonderful day and please just ask if you need anything. I am going to be extremely active in the SST section soon as well. Thank you for your time. Have a wonderful day!

Mathew425 - March 29, 2015, 5:09 pm

How old are you? (You may leave this blank if you want): 15

[b]Which programming language(s) can you?: HTML, PHP, Batch, and I'm currently learning python.

Any certifications: None yet. I'm learning Python in school. I know more of PHP than any other language.

Explain about past work In 2013 I had a bot service for Xat (a chat group website). The bot was pretty good. It had many commands but I stopped updating it because I lost interest in that website. It was a pretty complex bot which had to be constantly updated. Right now, I use PHP for making online tools and sometimes tools for windows by executing a php file within the command line.

How old are you? (You may leave this blank if you want):

Right now I'm 21 years old. I almost turn 22(May 11).

Which programming language(s) can you?:

Mainly java, also have some expirience with PHP, C++ and VB.

Any certifications:

No but have about 10 years of expirience.

Explain about past work:

Have created a few java applications, also worked for a few RuneScape private servers.

Rate your Programming skills from 1-10:

For java I would say a 7.5. For PHP, C++ and VB I would say a 5. I know something about it and if I want to get something finished then I will, maybe with tutorials ect.

Tools I've made:

Some of them are very easy and just for learning purposes.

[img]http://i1.minus.com/iF2vXqpkOnpeP.png[/img]How old are you? (You may leave this blank if you want):I'd rather not disclose this piece of information as I feel it may cause bias in your judgment, but just know I am attending highschool. What programming languages do you use proficiently?:LuaThis is more of a language used for game engines. I've played around with it on various games such as Garry's Mod, WoW (World of Warcraft, etc.). I love it for its simplicity! PHPI know enough to program a web service that delivers content. I feel as if extending my knowledge in PHP would be a waste of time as it'll only ever be used for simple computations in the server. HTML, CSS, JavascriptPretty much essential things a programmer should know. Javal've rarely used Java for anything big rather I learned it just to see what the hype about it was. Rather I found Java to be filled with exploits, inefficiencies, and worst of all forcibly shoving OOP (Object-Oriented Programming) down your throat. Thus I rarely use Java though I do know how to code in it. PythonI'm still reading up on the libraries. One of the finer languages. I mostly use it to automate something quickly rather than using any other language as it is elegant in many manners (code is seemingly easy to read, efficient [c++ ftw], etc.) Languages I'm learningC++ Any certifications:AP Computer Science AICE Computer Science AS Level Explain about past work:I've created various websites that have delivered services to certain people (pretty much a niche

website). I've also created applications to automate certain things on computers. If you would like me to disclose the actual projects, please PM me. Rate your Programming skills from 1-10 - 7 My reasoning for this is quite simple, I don't think much of anyone is qualified to be within the range of 8-10 with a few exceptions in mind. Though this is due to the amount of inefficiencies I see within various communities (including HackForums); 90% of HF code is inefficient and could be done better. I personally think I would score a 7 on this scale as I'm proficient in quickly learning any language due to my vast knowledge of pragmatic programming (this > theoretical programming).

uhm, k probs the only reason I put a lot of effort into this is because a friend of mine in null said null was a hq group and that I should attempt to join.

so ya...otherwise it would of been a crap application since groups are usually stupid in every way possible...?

Syperus - April 24, 2015, 9:27 pm

How old are you? (You may leave this blank if you want):

OLD lol

Which programming language(s) can you?:

C, C++, C#, Python, VB (although i hate vb, but i can still program in it)

scripting langs: HTML, XHTML, CSS, JS, PHP

Any certifications: Not yet. Costs too much for the ones i want

Explain about past work: Worked on various encryption tools, rootkits, RCON tools for game servers, game hacking frameworks. Also created several game hacking trainers (C++). Trainers:

https://www.youtube.com/watch?v=_U3MY6am99c

<https://www.youtube.com/watch?v=Lu5zLZIY4kE>

Rate your Programming skills from 1-10: 9. Always room for improvement

HeliosHype - April 26, 2015, 1:13 am

How old are you? (You may leave this blank if you want): 18

Which programming language(s) can you?: Python

Any certifications: X

Explain about past work Did some projects, can be found in here: github.com/Koifman

Rate your Programming skills from 1-10 8, I learn quick.

Ninja - April 26, 2015, 7:27 am

How old are you? (You may leave this blank if you want): 18

Which programming language(s) can you?: I am fluent in Visual Basics, done a bit of Java in the past, and I am okay with C#.

Any certifications: No, sorry.

Explain about past work: I am a freelance programmer on Elance (top %20 in Visual Basic), and usually code bots for clients, but also other things such as scrapers, IRC clients, database tools, etc. I never really released much on Hackforums, besides a netflix cracker (was messing around with some async functions), and a Tor library to use Tor as a proxy. I have a lot more work on my computer that I can show over TeamViewer.

Rate your Programming skills from 1-10 I would say a nice, 8.

Zer0 Cool - April 26, 2015, 8:51 pm

How old are you? (You may leave this blank if you want): 53

Which programming language(s) can you?: python, java, javascript, c, perl, fortran, r, scala, sql

Any certifications: no

Explain about past work: created many websites, completed many problems on project euler, write code whenever i want to do something that requires effort, maintain and upgrade a forum

Rate your Programming skills from 1-10: 7

Devine - May 1, 2015, 5:43 am

How old are you? (You may leave this blank if you want): 25

Which programming language(s) can you?: Mostly C# but worked in many others to a good standard

Any certifications: first class degree in 'Network Technology and Communications (BSc)'

Explain about past work Worked for multiple programming jobs (rather not name names, as this gives away anonymity) mostly creating and maintain web API's and websites. built two private applications since return to HF:

- A keylogger with low leverl hooks and a few nice extras ;)
- A money making app that does a mundane job and earns 60-80 dollars a every 24 hrs.

Rate your Programming skills from 1-10 hard to say when you have nothing to compare it too but id say an above average 7

Id be happy to join Null or if you think i need to brush up first id don't mind doing the classes. In fact id rather do the classes anyway encase i learn something i don't already know :)

EDIT: p.s this is a new account. My old one is deviney (when i was noob) but i did write a very popular botnet tutorial if that helps any :)
