So here's a IRC channel for discussion of Omnicoin

irc.frenzic.net #omnicoin

OR webchat.

<http://chat.omnicoin.net/>

In order to tip or get tips your nickname must be registered.

Code /ns register password

And it's commmand's

Code !balance - displays your current wallet balance

!address - displays OmniCOin address where you can send your funds to the tip bot

!withdraw <OmniCOin address> - withdraws your whole wallet balance to specified address (you will be charged 0.25 OMC withdrawal fee)

!tip <nick> <amount> - sends the specified amount of OmniCOin to the specified nickname

!rain <amount> [max] - splits amount coins between max users or the whole channel

!bittrex - displays the current BitTrex Coin Price/Volume, You can also use it to search for a coin, eg. !bittrex CANN

!btc - displays the current BTC-e BitCoin Price/Volume

!joke - displays a joke

!random - displays a random quote

!terms - displays terms and conditions for using OmniTip

It's possible the DNS hasn't fully propogated yet.

Nice work on this Fudster :)

Nice work on this Fudster :)

I'm fixing that now. Its the mobile version. I have a script that redirects you to the correct spot based on if you have flash or not

I just fixed it. Sorry was having some error's Used a different webchat source and it works now.

I may nip in from time to time but mainly idle on freenode myself as majority of coins and exchanges have rooms there.

Should I move it to freenode?

This channel is still running and so is the bot :p
